

SUBJECT INDEX

INDUSTRIAL AND ENGINEERING CHEMISTRY

VOLUME 26—1934

ABIETIC Acid, Pyrolysis of. W. A. La Lande, Jr.	678	Bentonite-Sulfur, New Fungicide. A. S. McDaniel. (E. C. Holton; McDaniel; Correspondence, 698)	340
ABSORPTION:		Benzene, Extraction of Edenborn Coal by— at Elevated Temperatures. R. S. Asbury	1301
Absorbers for Oil. <i>See</i> Petroleum.		Benzene, Removal of Thiophene from. H. N. Holmes and Norvil Beeman	172
Isothermal Flow of Liquid Layers. C. M. Cooper, T. B. Drew, and W. H. McAdams	428	Berolzheimer Series of Prints. <i>See</i> Prints.	
Prediction of Mass Transfer Coefficients from Data on Heat Transfer and Fluid Friction. T. H. Chilton and A. P. Colburn	1183	Bitumens, Pigmented Bitumastic Compositions. J. M. Fain and F. D. Snell	88
Tower—Coefficients. C. W. Simmons and H. B. Osborn, Jr.:		Bituminous Treating Mixtures, Effect of— on Moisture Absorption of Jute. J. H. Ingmanson and G. N. Vacca	1274
V. Determination and Effect of Free Volume	529	Boiler Water. <i>See</i> Water.	
VI. Absorption of Ethylene Dichloride	856	Bone Char. <i>See</i> Sugar.	
Acetylene Formation in Thermal Decomposition of Hydrocarbons. Symposium, Hydrocarbon Decomposition. H. H. Storch	56	Brass, Mechanism of Dezincification in Corrosion of. C. W. Stillwell and E. S. Turnipseed	740
ACIDS:		Brewery, Water Purification in Modern Distillery and. F. J. Lammers	1133
Acid Catalysts. <i>See</i> Catalysts.		Brewing, Enzymes in. M. A. Pozen	1127
Chemically Controlled Acidation of Oil Wells. S. W. Putnam and W. A. Fry	921	Brine Purification. The System Sodium Bicarbonate—Sodium Chloride—Magnesium Carbonate—Water. E. O. Wilson and Yü-ch'ih Ch'iu	1099
Fatty, Heat Requirements for Distillation of. Victor Mills and R. C. Daniels	248	Bromine, Commercial Extraction of— from Sea Water. L. C. Stewart	361
New Organic—Giving Oil-Soluble Metallic Salts. H. A. Bruson and Otto Stein	1268	Bubble-Cap Columns. <i>See</i> Distillation.	
Preparation of Thoria Aërogel Catalyst and Conversions of Organic— to Ketones. S. S. Kistler, Sherlock Swann, Jr., and E. G. Appel	388	n-Butane, Velocity Constants for Propane, Isobutane, and. Primary Thermal Dissociation. R. E. Paul and L. F. Marek	454
Production of Mixture of Aldehydes and—Containing Eight to Ten Carbon Atoms. C. Q. Sheely and W. H. King	1150	CALCINATION Process, Phosphate Fertilizers by. Action of Silica and Water Vapor on Phosphate Rock. D. S. Reynolds, K. D. Jacob, and L. F. Rader, Jr. (Correction, 534)	406
Relation of Viscosity of Esters of Saturated Aliphatic— to Synthesis of Fine Lubricating Oils. A. H. Gill and F. P. Dexter, Jr. Studies in Friedel-Crafts Reaction:	881	Calcium and Vitamin D in Foods. Vitamins in Canned Foods. XIV. E. F. Kohman, N. H. Sanborn, W. H. Eddy, and C. Z. Gurin	758
Condensation of Carboxylic Acids. P. H. Groggins, R. H. Nagel, and A. J. Stirton	1317	Calcium Bicarbonate, Siliceous Silicate in Water Containing Carbon Dioxide or. Value of Silicate of Soda as Detergent. III. J. D. Carter and William Stricker	277
Preparation of Ketones and Keto Acids. P. H. Groggins and R. H. Nagel	1313	Calcium Orthophosphates, Action of Urea on. C. W. Whittaker, F. O. Lundstrom, and J. H. Shimp	1307
Sulfonic— from Petroleum. E. Neyman and S. Pilat. (Correction, 651)	395	Calcium Sulfate in Setting of Portland Cement. P. S. Roller	669
(See also kind of acid.)		Camphor. <i>See</i> Naval Stores.	
Adhesives. Thinning and Gelation of Rubber Cements. C. K. Novotny	170	Canvas, Cause of Yellow Spots on—Painted with Chrome Greens. A. J. Snyder	579
Advertising, Misleading Claims in—Tend to Discredit Merchants and Testing Laboratories. Meaningless Words. Editorial	1126	Carbon, Combustion Rate of:	
Advertising, Self-Imposed Regulation in. Editorial	1017	Combustion at Surface Overlaid with Stagnant Gas. H. Davis and H. C. Hottel	889
Aërolog, Silica, Thermal Conductivity of. S. S. Kistler and A. G. Caldwell	658	Combustion of Spheres in Flowing Gas Streams. C. M. Tu, H. Davis, and H. C. Hottel	749
Aërolog Catalysts. <i>See</i> Catalysts.		Carbonated Beverages, Apple Juice Concentrate for. D. C. Carpenter and E. C. Smith	449
Agitation, Studies in. III. Simple Agitator as Classifier. A. M. White and S. D. Sumerford	82	Carbon Black, Properties of. IV. Color. W. B. Wiegand and J. W. Snyder	413
Air-Conditioning, New Glass for Windows to Aid in. Heat-Stopper. Air-Conditioning to Be Introduced into Mines. Air-Conditioning and Economic Recovery. Editorial	809	CARBON DIOXIDE:	
Aklo. <i>See</i> Glass.		Effect of—upon Cokes. Production of High-Hydrogen Water Gas from Younger Coal Cokes. R. E. Brewer and L. H. Reyerson	1002
Alanine in Rubber Latex. J. McGavaek and J. S. Rumbold	789	Effect of Concentration and Viscosity of Caustic Solutions on Rate of Absorption of. L. B. Hitchcock	1158
ALCOHOLS:		Siliceous Silicate in Water Containing Calcium Bicarbonate or. Value of Silicate of Soda as Detergent. III. J. D. Carter and William Stricker	277
Ethyl, Catalytic Oxidation of. J. A. Patterson, Jr., and A. R. Day. Ethyl— from Catalytic Vapor-Phase Hydration of Ethylene. F. J. Sanders and B. F. Dodge	208	Carbon Monoxide. Influence of Sodium Carbonate upon Producer Gas Reaction. C. B. Weiss and A. H. White	83
Physical Properties of Ternary System Methanol—Isobutanol— Water at 60° F. D. M. Smith	392	Carbon Monoxide, Rate of Reduction of Iron Ores with. W. H. Wetherill and C. C. Furnas	983
Aldehydes, Production of Mixture of— and Acids Containing Eight to Ten Carbon Atoms. C. Q. Sheely and W. H. King	1150	Carboxylic Acids. <i>See</i> Acids.	
Aliphatic Acids. <i>See</i> Acids.		Casein, Improved—Manufacture. R. W. Smith, Jr.	819
Alloys, Research on Metals and. F. C. Frary	281	CATALYSTS:	
Alumina and Potash from Georgia Shale. S. L. Madorsky	256	Acid, Mechanism of Polymerization of Olefins by. F. C. Whitmore	94
Aluminum in Chemical Industry. F. C. Frary	1231	Catalytic Oxidation of Ethyl Alcohol. J. A. Patterson, Jr., and A. R. Day	1276
Aluminum Paints. <i>See</i> Paint.		Catalytic Vapor-Phase Hydration of Ethylene. F. J. Sanders and B. F. Dodge	208
Alunite, Utilization of— through Alkali Fusion. E. O. Huffman and F. K. Cameron	1108	Copper Chromite as— in Small-Plant-Scale Liquid-Phase Hydrogenation of Furfural under High Pressure. George Calingaert and Graham Edgar	878
AMERICAN CHEMICAL SOCIETY:		Effect of— on Reaction between Olefins and Hydrogen Sulfide. H. R. Duffey, R. D. Snow, and D. B. Keyes	91
Change in Format of Publications of. A Change with Improvement. Editorial	1	For Oxidation of Ammonia to Oxides of Nitrogen. S. L. Handforth and J. N. Tilley	1287
Duties of Councilors of. Our Councilors. Editorial	2	Silica Black as— Carrier in Oil Hydrogenation. L. R. Williams and C. A. Jacobson	800
Group Plan for Local Section Meetings. Editorial	588	Thoria Aërolog—: Aliphatic Esters to Ketones. Sherlock Swann, Jr., E. G. Appel, and S. S. Kistler	1014
Improvement in Chemical Education Sought by. Our Trusteeship. Editorial	1017	Thoria Aërolog—: Preparation of— and Conversions of Organic Acids to Ketones. S. S. Kistler, Sherlock Swann, Jr., and E. G. Appel	388
Ammonia, Catalysts for Oxidation of— to Oxides of Nitrogen. S. L. Handforth and J. N. Tilley	1287	Water Gas, Fused Cobalt Oxide as. E. C. White and J. F. Shultz	95
Ammonia, Liquid, Vapor Pressures and Compositions of Saturated Solutions of Urea in. Walter Scholl and R. O. E. Davis	1299	Catgut, X-Ray Diffraction Studies of Surgical—Ligatures. G. L. Clark, R. K. Flege, and P. F. Ziegler. (Correction, 1062)	440
Anesthetic, Explosive Properties of Divinyl Ether as. G. W. Jones and B. B. Beattie	557	CELLULOSE:	
Antiseptic, Orthophenylphenol as. Communication to Editor. H. C. Fuller	946	Dark-Field Study of Fibers. A. T. Clifford and F. K. Cameron	1209
Apple Juice Concentrate. D. C. Carpenter and E. C. Smith	449	Development in Applied Chemistry of. Symposium, High Lights of Modern Industrial Chemistry. G. J. Esselen	26
Arsenic, Tabular Method of Reading— Strips. B. D. Thomas	356	Hydration and Beating of— Pulps. W. B. Campbell	218
Arsenic Content of American Cod Liver Oil. A. D. Holmes and Roe Remington	573		
Art and Chemistry. C. G. Fink. Perkin Medal Award	234		
Aspergillus niger. <i>See</i> Fermentation.			
Asphalt-Aluminum Paints. <i>See</i> Paints.			
BAGASSE. Industrial Preservation of Crop Fibers. E. C. Lathrop and T. B. Munroe	594		
Bagasse, Nitric Acid Process for Recovery of Cellulose from. J. H. Payne	1339		
Beer. <i>See</i> Brewing.			
Bentonite, Clarification of Wine with. L. G. Saywell	981		

Nitric Acid Process for Recovery of— <i>from Bagasse.</i> J. H. Payne..	1339	(<i>See also Coal and Fuel.</i>)	
Sorption of Water by. S. E. Sheppard and P. T. Newsome.....	285	Copper Chromite as Catalyst in Small-Plant-Scale Liquid-Phase Hydrogenation of Furfural under High Pressure. George Calingaert and Graham Edgar.....	878
Celotex, Industrial Preservation of Crop Fibers in Manufacture of— <i>from Bagasse.</i> E. C. Lathrop and T. B. Munroe.....	594	Copper Sulfate, Removal of— <i>from Water by Ferric Flocc.</i> C. J. Brockman.....	924
CEMENT, PORTLAND:		Corn Oil. <i>See Oils, Peroxide Values of.</i>	
Hydration of—Compounds. R. H. Bogue and William Lerch.....	837	Correspondence.....	697, 1226, 1341
Influence of Composition on Volume Constancy and Salt Resistance of— <i>Pastes.</i> R. H. Bogue, William Lerch, and W. C. Taylor.....	1049	CORROSION:	
Setting of. P. S. Roller:		Economics of Corrective Treatment for— <i>by Cold Water.</i> E. S. Hopkins, J. W. Armstrong, and J. R. Baylis.....	250
Chemical Reactions and Role of Calcium Sulfate.....	669	Effect on Industrial Water-Consumption Costs of— <i>Inhibition by Lime Treatment.</i> S. T. Powell.....	254
Chemical Reactions of Seasoning, Reversion, and Restoration... Chart for Rapid Calculation of Mixtures. J. S. Baker.....	1077	Mechanism of Dezincification in— <i>of ϵ-Brass.</i> C. W. Stillwell and E. S. Turnipseed.....	740
Charts, Line Coordinate—for Vapor Pressure-Temperature Data. F. E. E. Germann and O. S. Knight. (A. J. V. Underwood; Correspondence, 1226).....	467	Metal Fastenings in Wood Treated with Zinc Chloride. R. H. Baechler.....	1336
Chemical Education. Are Expenditures for Fine University Laboratories Justified? Architectural Handicaps. Editorial.....	1019	Metals by Phenols. F. H. Rhodes, P. A. Riedel, and V. K. Hendricks.....	533
Chemical Education, Improvement in— <i>Sought by A. C. S. Our Trusteeship.</i> Editorial.....	1017	Problems in. John Johnston.....	1238
CHEMICAL INDUSTRY:		Resistance of Metals in Wine Making and Tolerance of Wines for Metals. H. E. Searle, F. L. LaQue, and R. H. Dohrow.....	617
Air Classification in Pulverizing. Harlowe Hardinge.....	1139	Soil— <i>of Ferrous Materials.</i> E. R. Shepard.....	723
Development of New Equipment Materials for Chemical Manufacture. W. R. Huey.....	10	Cosmetics, Need for Legislation to Protect Consumers of. <i>Pure Food, Drugs, and.</i> Editorial.....	810
Graphic Instruments in Chemical Processes. R. N. Shreve.....	1021	Cottonseed Oil. <i>See Oils, Peroxide Values of.</i>	
Improved Conditions in. Editorial.....	121	CRACKING:	
Industrial Hygiene and Sanitation Surveys in Chemical Establishments. R. R. Sayers, J. M. DallaValle, and W. P. Yant.....	1251	Gases from— <i>Hydrocarbon Oils.</i> Gustav Egloff and J. C. Morrell.....	940
Japanese, Danger of Continued Expansion of. Editorial.....	701	Mechanism of Formation of Aromatic Hydrocarbons by Pyrolysis. E. N. Hague and R. V. Wheeler; H. P. A. Groll. (Correspondence).....	697
Medal Award. Culture of Silicate Gardens. J. G. Vail.....	113	Primary Thermal Dissociation. Velocity Constants for Propane, <i>n</i> -Butane, and Isobutane. R. E. Paul and L. F. Marek.....	454
Need of Instruction in Industrial Hygiene for Plant Operators. Safety. Editorial.....	1230	Pyrolysis Studies. Isobutylene, Diisobutylene, Ethylene, Propylene, and 2-Pentene. C. D. Hurd and L. K. Eilers.....	776
Need of Modernization in. Modernize. Editorial.....	913	Thermal Decomposition and Distillation of Coal in High Vacuum. B. Juettner and H. C. Howard.....	1115
Power Transmission in. W. F. Schaphorst.....	598	(<i>See also Gasoline and Hydrocarbons.</i>)	
Problems of—and Ideas of Chemists to Be Printed by Industrial and Engineering Chemistry. What Is Wanted? Editorial.....	914	Cresote, Weathering of. H. E. Gillander, C. G. King, E. O. Rhodes, and J. N. Roche.....	175
Proposed Changes in Tariff Regulations of Importance to. Beware of Bad Bargains. Editorial.....	473	Cresols, Corrosion of Metals by Phenols and. F. H. Rhodes, P. A. Riedel, and V. K. Hendricks.....	533
(<i>See also Patents.</i>)		Crystal Formation, Supersaturation and—in Seeded Solutions. H. H. Ting and W. L. McCabe.....	1201
Chemical Securities. E. L. Smith.....	608	DEPRESSION Shows Value of Spiritual over Material Qualities. Things. Editorial.....	359
Chemicals, Need for Legal Recognition That Some Harmless Drugs and— <i>Cannot Be Tolerated by Some People.</i> Idiosyncrasies. Editorial.....	122	Detergent, Value of Silicate of Soda as. III. Siliceous Silicate in Water Containing Calcium Bicarbonate or Carbon Dioxide. J. D. Carter and William Stericker.....	277
Chemicals, Upturn in 1933 Foreign Trade in. Otto Wilson.....	351	Detergents, Symposium, High Lights of Modern Industrial Chemistry. R. A. Duncan.....	24
CHEMISTRY:		Deuterium. <i>See Hydrogen Isotope.</i>	
Accomplishments of—in 1933.....	3	Diatomite, Equilibrium and Rate of Reaction in the System Hydrated Lime-Diatomaceous Silica-Water. A. B. Cummins and L. B. Miller.....	688
Art and. C. G. Fink. Perkin Medal Award.....	234	DIFFUSION:	
Importance of—in Munitions. Editorial.....	1020	Coefficients of—in Gaseous Systems. E. R. Gilliland.....	681
Modern Industrial, Symposium on High Lights of:		Symposium on Diffusional Processes:	
Applied Cellulose Chemistry. G. J. Esselen.....	26	Applications of Film Concept in Petroleum Refining. C. C. Monrad.....	1087
Detergents. R. A. Duncan.....	24	Design of Cooler Condensers for Mixtures of Vapors with Non-condensing Gases. A. P. Colburn and O. A. Hougen.....	1178
Physical Properties of DuPrene Compounds. E. R. Bridgewater.....	33	Diffusion of Vapors through Gas Films. T. K. Sherwood and E. R. Gilliland.....	1093
Solvent Industry. E. W. Reid.....	21	Drying of Solids. VII. Moisture Movement by Capillarity in Drying Granular Materials. E. W. Comings and T. K. Sherwood.....	1096
Synthetic Resins. Carleton Ellis.....	37	Effect of Concentration and Viscosity of Caustic Solutions on Rate of Absorption of Carbon Dioxide. L. B. Hitchcock.....	1158
Synthetic Rubber Problem. W. H. Carothers.....	30	Packing Materials for Fractionating Columns. M. R. Fenske, C. O. Tongberg, and D. Quiggle.....	1169
Chemists, Are There Too Many? Editorial.....	702	Prediction of Mass Transfer (Absorption) Coefficients from Data on Heat Transfer and Fluid Friction. T. H. Chilton and A. P. Colburn.....	1183
Chemists, Ideas of—and Problems of Chemical Industries to Be Printed by Industrial and Engineering Chemistry. What Is Wanted? Editorial.....	914	Rate of Mixing of Gases in Closed Containers. A. S. Smith.....	1167
Chlorine Treatment for Elimination of Obnoxious Gases in Sulfate Pulping Process. W. O. Gordon and E. E. Creitz.....	565	Vapors into Air Streams. E. R. Gilliland and T. K. Sherwood. (Correction, 761).....	516
Chrome Greens. <i>See Paint.</i>		Diisobutylene. <i>See Cracking.</i>	
Chrome Leather. <i>See Leather.</i>		Dimethyldithiocarbamic Acid. <i>See Rubber.</i>	
Chromium, Comparison of Constancy of Gold- and—Plated Analytical Weights. H. V. Moyer and P. K. Winter.....	238	Diphenyl, Hydrogenation of American Coals in. W. L. Beuschlein, C. C. Wright, and C. M. Williams.....	465
Cigarette and Cigar Tobaccos. <i>See Tobacco.</i>		Dishwashing, Mechanical, Sodium Metaphosphate in. Charles Schwartz and B. H. Gilmore.....	998
Citric Acid Fermentation. <i>See Fermentation.</i>		DISTILLATION:	
CITRUS FRUIT:		Design of Fractionating Columns. I. Entrainment and Capacity. Mott Souders, Jr., and G. G. Brown.....	98
Effect of Sodium Benzoate and Heat on Iodine Reducing Value of Orange Juice. M. A. Joslyn and G. L. Marsh.....	857	Effect of Entrainment on Plate Efficiency in Rectification. F. H. Rhodes.....	1333
Grapefruit, Naringin and Pectin from— <i>Residue.</i> H. D. Poore.....	637	Efficient Small-Scale Fractionating Equipment. C. O. Tongberg, D. Quiggle, and M. R. Fenske.....	1213
Keeping Quality of Frozen Orange Juice. M. A. Joslyn and G. L. Marsh.....	295	Entrainment in Bubble-Cap— <i>Column.</i> G. E. Holbrook and E. M. Baker.....	1063
Symposium on:		Heat Requirements for— <i>of Fatty Acids.</i> Victor Mills and R. C. Daniels.....	248
Canning of Grapefruit and Grapefruit Juice. A. E. Stevenson.....	823	Packing Materials for Fractionating Columns. M. R. Fenske, C. O. Tongberg, and D. Quiggle.....	1169
Citrus Fruit Juices from Bottler's Standpoint. J. H. Toulouse.....	765	Pressure Drop in Bubble-Cap Columns. M. C. Rogers and E. W. Thiele.....	524
Florida Grapefruit Oil. E. K. Nelson and H. H. Mottern.....	634	Purification of Vitamins by Fractional Distribution between Immiscible Solvents. R. E. Cornish, R. C. Archibald, E. A. Murphy, and H. M. Evans.....	397
Freezing Orange Juice. J. H. Shrader and A. H. Johnson.....	869	Distillery, Water Purification in Modern Brewery and. F. J. Lambers.....	1133
Oxygen-Consuming Phenomena in Beverages. J. H. Toulouse.....	769	Divinyl Ether. <i>See Anesthetic.</i>	
Preparation and Packing of Oranges for Shipment. J. R. Winston.....	762	Dolomite. <i>See Fertilizers.</i>	
Preservation of Orange Juice by Deaeration and Flash Pasteurization. H. W. von Loesecke, H. H. Mottern, and G. N. Pulley.....	771	Driers. <i>See Paint.</i>	
Classification, Air—in Pulverizing. Harlowe Hardinge.....	1139	Drugs, Need for Legislation to Protect Consumers of. <i>Pure Food, Cosmetics, and.</i> Editorial.....	810
Classifier, Simple Agitator as a. Studies in Agitation. III. A. M. White and S. D. Sumerford.....	82	DuPrene. <i>See Rubber.</i>	
Clay, Vapor-Phase— <i>Treatment of Cracked Gasoline.</i> H. M. Steinger.....	1039	Dyeing, Treatment of Waste from Printing and. F. D. Snell.....	580
COAL:		Dyes. Leuco Crystal Violet by Pressure Synthesis. T. R. Liston and W. M. Dehn.....	1073
Extraction of Edenborn— <i>by Benzene at Elevated Temperatures.</i> R. S. Asbury.....	1301		
Gas from Brown— <i>Briquets as Motor Fuel in Germany.</i>	836		
Gasoline from— <i>to Be Produced by State-Owned Plant in Saxony.</i>	324		
High-Temperature Carbonizing Properties of. A. C. Fieldner, J. D. Davis, D. A. Reynolds, and C. R. Holmes.....	300		
Hydrogenation of American—in Diphenyl. W. L. Beuschlein, C. C. Wright, and C. M. Williams.....	465		
Thermal Decomposition and Distillation of—in High Vacuum. B. Juettner and H. C. Howard.....	1115		
Thermal Decomposition of "Coal Hydrocarbon." Symposium, Hydrocarbon Decomposition. H. H. Lowry.....	320		
(<i>See also Cokes and Fuel.</i>)			
Coal-Tar Acids. <i>See Phenols.</i>			
Coal-Tar Cresote. <i>See Cresote.</i>			
Cobalt Oxide, Fused—as Water Gas Catalyst. E. C. White and J. F. Shultz.....	95		
Cod Liver Oil. <i>See Oil.</i>			
COKES:			
High- and Low-Temperature, Hygroscopicity of. D. A. Reynolds. Production of High-Hydrogen Water Gas from—from Younger Coals. R. E. Brewer and L. H. Reyerson.....	732		
Effect of Carbon Dioxide upon Cokes.....	1002		
Steam-Carbon Reactions. (Correction, 892).....	734		

904

EDITORIALS:

Air-Conditioning and Economic Recovery.....	809	Vapor on Phosphate Rock. D. S. Reynolds, K. D. Jacob, and L. F. Rader, Jr. (Correction, 534).....	406

NEW USES EVERY DAY

FOR THIS STURDY, ECONOMICAL CLAMP GATE VALVE

Read why all industry is adopting
these clamp gate valves in small sizes

● Searching for new ideas that will save money? Try this one! For small valve requirements throughout your plant, install compact, moderately priced Crane Clamp Gate Valves. They are compact in design and far less expensive. By replacing one small part *in all sizes* you have a new thread bushing for the stem. Stem threads are entirely outside the body in the outside screw and yoke type, free from the action of liquid or gas in the line. Its all-iron construction makes it ideal for caustic solutions such as alkalis and concentrated sulphuric acid and immune to gases that attack brass and bronze. The Crane Clamp Gate Valves come in a complete line of small sizes. You'll be able to use them everywhere. Available in screwed or flanged ends, brass mounted for general industrial uses, or all-iron for resistance to corrosion.

SCORES OF APPLICATIONS FOR THIS VERSATILE VALVE!

Steam Lines	Cold Water Lines	Lubricating and Fuel Oil Lines
Hot Water Lines	Air Lines	Caustic Lines (All-Iron)

Scientifically Controlled at Every Step CELITE FILTER-AIDS Insure Maximum Savings*

J-M RESEARCH LABORATORIES. Here have originated the important filtration developments of the past 20 years. Here are now being developed tomorrow's new and improved filter-aids.

TWENTY years ago the first filter-aids were produced at our Celite deposits in Lompoc, Cal.

From that day to this, Celite Filter-Aids (Hyflo Super-Cel, Filter-Cel, Standard Super-Cel) have been *scientifically controlled at every step.*

Johns-Manville Research Laboratories have developed new and better types of filter-aids, new and more efficient methods for utilizing existing filter-aids.

Credit J-M research for today's high flow rates.

Johns-Manville Control Laboratories have developed rigid standards and tests for uniformity; they have developed new and more accurate apparatus. As a result, each shipment of Celite Filter-Aids is twin brother to every other shipment.

Credit J-M laboratory control with so perfecting clarification that the modern plant finds it far easier to standardize its processes, to control rigidly the quality of its finished product.

Johns-Manville Field Engineers are fitted

J-M CONTROL LABORATORIES. For 20 years they have guarded the uniformity of Celite Filter-Aids, assuring users a high degree of perfection in clarification, in sustained rates of flow.

by training and experience to tackle *any* filtration problem.

Credit J-M's field staff with the ease, speed, and economy with which gelatine, linseed oil, grape juice, and scores of other once "unfilterable" products are now perfectly clarified.

Thanks to Celite Filter-Aids, and Johns-Manville's threefold scientific control,

J-M FIELD ENGINEERS. The link between Johns-Manville's 20 years of scientific development work and the plants employing Celite Filter-Aids. In all likelihood they can improve your filtration practice, cut your operating costs.

thousands of plants are saving many thousands of dollars annually; improving the quality of their products, increasing their salability and market value. And they have completely eliminated the difficulties and delays which once made the filter station a veritable "neck of the bottle."

No other organization can place at your disposal the fruits of so long and continuous an experience in research, in control of product, in application to specific filtration operations. No other, we believe, can approach your individual problem with so strong a likelihood of improving your product, reducing your operating costs.

May we furnish samples and prices? And send a J-M Filtration Engineer for a consultation, entirely without obligation? Address our nearest office, or Johns-Manville, 22 East 40th Street, New York City.

Hyflo Super-Cel Filter-Cel
Standard Super-Cel

*
Check the Savings in Typical Plants

Your product is different? Perhaps, but the chances are 10 to 1 that someone in your field is saving substantial sums by the use of Celite Filter-Aids. In any case, it costs nothing to find out. Ask to have a J-M Filtration Engineer call.

 A Varnish Manufacturer SAVES \$6000 per year	 A Soya Bean Oil Producer SAVES \$5930 per year
 A Beet Sugar Manufacturer SAVES \$5166 during a 90-day campaign	 An Oil Refiner SAVES \$15,000 per year

Part you see through . . . Part you can't . . .

But it's all the same piece of paper

THE "window" section of the *single piece of paper* used in this envelope has been specially treated to make it transparent—another process in which centrifugal force shows its extreme adaptability. For centrifugal force plays an important part in causing transparency—in this way:

Paper is opaque simply because the air cells between the fibers refract the light. Fill these air cells with a CLEAR liquid and you have transparency. (Our forefathers knew this when they oiled paper for windowpanes.) But liquid

brilliantly clear is required. No specks of foreign matter to mar visibility can be present. So Sharples Super Centrifuges are used for the job of clarify-

The Sharples Portable Vaporseal Super Centrifuge, for clarifying varnishes, enamels, and lacquers—one of many types of Sharples Centrifuges generating force upward of 13,000 times gravity.

ing the liquid used to bring about transparency—with the desired results.

Apply this objectively to your own processes. With centrifugal force efficiently accomplishing all kinds of unrelated jobs in a broad range of industries, perhaps you too may apply it beneficially. Sharples engineers have the fundamental and varied experience and the equipment necessary for experimentation with your processes. You may even find that centrifugal force will accomplish jobs heretofore considered impossible or impractical. The Sharples Specialty Company, 2328 Westmoreland St., Philadelphia, Pa.

What engineers have long needed
LARGE VITREOSIL POTS

for Chemical Manufacturing Operations

THE vessel illustrated represents a definite advance in fused silica technology—a 50 gallon vitreosil pot for handling batches of fine chemicals, pharmaceutical products, and in general conducting chemical processes which in the past have been carried out with indifferent success in vessels of enameled ware, resistant alloys or stoneware.

In this case the superior thermal and chemical properties of Vitreosil are available at a very moderate figure, the pots shown costing only \$155.00 each, packing included.

Several smaller sizes are available and deliveries can be made promptly to meet customers' requirements.
