

# SUBJECT INDEX

## INDUSTRIAL AND ENGINEERING CHEMISTRY

### ANALYTICAL EDITION

#### VOLUME 10—1938

<b>ABBOTT Laboratories, Microchemical Section.</b> E. F. Shelberg.....	704	<b>Iron Determination in, by <i>o</i>-Phenanthroline.</b> F. C. Hummel and H. H. Willard.....	13
<b>Abrasive Powders, Microdetermination of Size.</b> F. L. Jones.....	45	<b>Spectrographic Analysis of.</b> Lead, Tin, Aluminum, Copper, and Silver. Jacob Cholak and R. V. Story.....	619
<b>Absorption Apparatus for Halogen Microdetermination by Combustion.</b> L. T. Hallett.....	111	(See also kind of biological material.)	
<b>Absorption Efficiency of Spiral Gas-Lift Wash Bottle.</b> B. B. Corson..	646	<b>Bituminous Roofing, Exudation Test for "Bleeding" in.</b> G. L. Ollensis	199
<b>Acetaldehyde Determination in Wines.</b> M. A. Joslyn and C. L. Comar	364	<b>Boiler Superheater Elements, Determination of Magnetic Iron Oxide as Measure of Corrosion of.</b> R. C. Ulmer.....	24
<b>Acetylation Microapparatus of Stodola, Constant-Temperature Bath for.</b> H. G. Cassidy.....	456	<b>Boiling Point Determinations on Micro and Macro Scale.</b> Carl Rosenblum.....	449
<b>Acidimetry, Sulfamic Acid as Standard of Reference in.</b> M. J. Butler, G. F. Smith, and L. F. Audrieth.....	690	<b>Bomb, Sulfur Determinations from Bomb-Washings Titrations.</b> R. E. Kaufman.....	538
<b>Acids of Petroleum Separated by Liquid-Liquid Extraction.</b> H. G. Schutze, W. A. Quebedeaux, and H. L. Lochte.....	675	<b>Boron Estimation by Flame Test.</b> H. C. Weber and R. D. Jacobson..	273
<b>AGITATORS</b>		<b>Bottle-Shaking Apparatus.</b> G. W. Smith.....	282
for Reflux Bath in Low-Temperature Fractional Distillation Columns. J. W. Tooke.....	214	<b>Brass Plating Solutions, Determination of Free Sodium Cyanide and Ammonia in.</b> Samuel Heiman and W. M. McNabb.....	698
Shaker for Bottles. G. W. Smith.....	282	<b>Bromate-Bromide, Organic-Compound Unsaturation Determined by Mercury-Catalyzed Reaction.</b> H. J. Lucas and David Pressman.....	140
Shaker, Reciprocating. E. R. Schwarz and Leonard Shapiro.....	281	<b>Bromine Titration Method of Kurt Meyer, Improvements in.</b> S. R. Cooper and R. P. Barnes.....	379
Stirrer, Magnetic Glass-Enclosed. J. H. Simons.....	638	<b>Bunsen Burner.</b> See Burners.	
<b>AIR</b>		<b>Bureau of Mines.</b> See Mines.	
Collecting Device, Valve for. L. Williams and A. H. W. Busby.....	512	<b>Buret Top, Micro-, for Control of Rate of Outflow.</b> E. P. White.....	668
Compressor, Portable, for Laboratory Use. G. F. Flemons.....	214	<b>Burners, Bunsen, "Long Burner" Adapter for, in Microcombustions.</b> Alexander Knoll and John Schukal.....	348
Methyl Bromide in. R. L. Busbey and N. L. Drake.....	390		
<b>ALCOHOLS</b>		<b>CADMIUM Selenide Precipitation from Selenosulfate Solutions.</b> E. C. Pitzer and N. E. Gordon.....	68
Ethyl, Determination in Pharmaceutical Liquids by Chain Hydrometer and Alcohol-Water Temperature Charts. Karl Bambach.....	541	<b>CALCIUM</b>	
Methyl, Concentrated, Calcium Separated as Sulfate by Precipitation in. Analysis of Magnesite and Technical Magnesium Oxide. E. R. Caley and P. J. Elving.....	264	Microdetermination. G. H. Ellis.....	112
Methyl or Ethyl, Binary Mixtures of, with Water. Thermal Conductivity of Liquids. O. K. Bates, George Hazzard, and Gerald Palmer.....	314	Precipitation in Presence of Ammonium Molybdate and Iron. R. C. Wiley and Alec Yedinak.....	322
Solutions, Camphor Determination in, by Dinitrophenylhydrazine Method. E. M. Plein and C. F. Poe.....	78	Precipitation as Sulfate in Concentrated Methanol. Analysis of Magnesite and Magnesium Oxide. E. R. Caley and P. J. Elving.....	264
Water Determination in. H. G. Botset.....	517	Calcium Phosphates. Chemical and X-Ray Diffraction Studies. H. C. Hodge, M. L. LeFevre, and W. F. Bale.....	156
Alfalfa, Carotenoids in. L. O. Buxton and B. A. Dombrow.....	262	Camphor Determination in Alcoholic Solutions by Dinitrophenylhydrazine Method. E. M. Plein and C. F. Poe.....	78
Alkali Group Analysis. Qualitative Separations on Micro Scale. A. A. Benedetti-Pichler and J. T. Bryant.....	107	Canned Dog Food. See Dog Food.	
Alkaloid Identification by Systematic Scheme. K. E. Jackson.....	380	<b>Capillary Clamp for Microchemical Procedures.</b> H. K. Alber.....	348
Alkoxyl Determination, Hydriodic Acid Prepared for. E. P. Clark.....	677	<b>CARAMEL Color.</b> See Sugar.	
Alkoxyl Determination by Method of Vieböck and Schwappach. S. Kinsman and C. R. Noller.....	424	<b>CARBON</b>	
Alloy of Aluminum, Chromium Determination in. Louis Silverman.....	81	Determination, Combustion Train for. Samuel Natelson and E. B. Conner.....	276
Alloys, Sulfur Determined in. Louis Silverman.....	433	Microdetermination	
Aluminum Alloy, Chromium Determination in. Louis Silverman.....	81	with Hydrogen. Adalbert Elek.....	51
Aluminum Determination in Biological Material by Spectrographic Analysis. Jacob Cholak and R. V. Story.....	619	on Micro- or Semimicrosamples with One Movable Apparatus. Samuel Natelson, S. S. Brodie, and E. B. Conner.....	609
American Medical Association's Microchemical Laboratory. J. B. Peterson and E. W. Schoeffel.....	172	Weighting Tube for Volatile Liquids in. V. A. Aluisse.....	56
American Rolling Mill Co. Research Laboratories. Anson Hayes.....	97	(See also Graphite.)	
<b>AMMONIA DETERMINATION</b>		<b>CARBOXYLIC ACIDS, Chrysanthemum, Separated in Pyrethrin Estimation.</b> A. A. Pantosis.....	386
by Aspiration Method. L. A. Sarver.....	415	Carotene Determination in Forage. D. W. Bolin and A. M. Khalapur	417
in Brass Plating Solutions. Samuel Heiman and W. M. McNabb.....	698	Carotenes, Alpha- and Beta-, Determined by Spectrophotometer and Photoelectric Photometer. C. L. Shrewsbury, H. R. Kraybill, and R. B. Withrow.....	253
in Milk. A. E. Perkins.....	69	Carotenoids in Forage. L. O. Buxton and B. A. Dombrow.....	262
Ammonium Molybdate, Calcium Precipitation in Presence of Iron and R. C. Wiley and Alec Yedinak.....	322	<b>CATALYSTS</b>	
Aniline Viscosity between 20° and 100° C. L. A. Steiner.....	582	Ferrous Sulfate-Selenium as, in Kjeldahl Method. R. B. Bradstreet.....	696
Antifreeze Testing Technic. K. H. Hoover and F. E. Dolian.....	293	Mercury as, with Bromate-Bromide to Determine Unsaturation in Organic Compounds. H. J. Lucas and David Pressman.....	140
Apples, Nicotine Determination on. William Ralston.....	533	Silica Gel, Platinized, for Gas Analysis. Complete Oxidation of Methane and Ethane. K. A. Kobe and W. I. Barnett.....	139
Armo. See American Rolling Mill Company.		Tungsten as Microcatalyst in Color Reactions. E. B. Sandell.....	667
Arsenic Microdetermination. A. E. How. (Addendum, N. V. Lijmen Gelatinefabriek "Delft," 449).....	226	Cathode Ray Tube Polarograph. Theory of Micromethod. R. H. Müller, R. L. Garman, M. E. Droz, and J. Petras.....	339
Arsenious Acid as Standard of Reference in Evaluation of Solutions in Cerate Oxidimetry. G. F. Smith and C. A. Getz.....	304	Caustic Liquors Analyzed for Traces of Impurities. O. S. Duffendack and R. A. Wolfe.....	161
Arsenious Oxide Analysis by Titration with Iodine. Paul Lundman.....	387	Cellulose Nitrate. See Nitrocellulose.	
Arsenic Acid, <i>p</i> -Hydroxyphenyl-, as Reagent for Titanium and Zirconium. C. T. Simpson and G. C. Chandlee.....	642	Cement, Heat of Hydration Measured in. Correlation of Methods. R. W. Carlson and L. R. Forbrich.....	382
Ascorbic Acid. See Vitamin C.		Centrifuge, Ultra-, Field of Research of. The Svedberg. (Discussions, E. O. Kraemer, 128; H. S. Taylor, 129).....	113
Ash, Biological. See Biological Materials.		Cerate Oxidimetry. G. F. Smith and C. A. Getz	
Asphalt, Bituminous Roofing, Exudation Test for "Bleeding" in. G. L. Ollensis.....	199	Evaluation of Solutions Using Sodium Oxalate, Arsenious Acid, and Iron as Standards of Reference, and Ferroin and Nitro-Ferroin as Indicators.....	304
Asphalt Flow Shown by Method of Successive Penetrations. R. N. Traxler and L. R. Moffatt.....	188	Theoretical Considerations and Determination of Approximate Electrode Reference Potentials.....	191
Aspiration, Ammonia and Volatile Gases Determined by. L. A. Sarver	415	Cevitamic Acid. See Vitamin C.	
Aspirator for Micro-Kjeldahl Digestions. J. S. Blair.....	112	Chain Hydrometer. See Hydrometer.	
Azo Derivatives of 8-Hydroxyquinoline as Microanalytical Reagents. Thomas Boyd, E. F. Degering, and R. N. Shreve.....	606	Charts. Alcohol Determination in Pharmaceutical Liquids by Alcohol-Water Temperature Charts. Karl Bambach.....	541
		Chloride Determination, Ion Effect on Mohr Method for. Hydrogen Peroxide Modification. R. T. Sheen and H. L. Kahler.....	628
<b>BALANCE, Electronic Recording Analytical.</b> R. H. Müller and R. L. Garman.....	436	Chloride, Ink Age Determined by. John Finn, Jr., and R. E. Cornish.....	524
Balance, Vapor-Density, Made of Glass. J. H. Simons.....	587	Chlorine, <i>o</i> -Tolidine Method for, Permanent Series for. Solutions for Colorimetric Standards. G. Dragt with M. G. Mellon.....	256
Barium Chloride, Titration of Sulfate in Sulfur Lamp with. Organic Sulfur in Gas. C. W. Wilson and W. A. Kemper.....	418	Chromium Determination in Aluminum Alloy. Louis Silverman.....	81
Beer. See following items.		Chromium Volatilized as Chromyl Chloride in Determination of Manganese in Stainless Steel. F. W. Smith.....	360
<b>BEVERAGES, ALCOHOLIC</b>		Chromium Trioxide Oxidation in Iodine Microdetermination in Biological Materials. N. L. Matthews, G. M. Curtis, and W. R. Brode.....	612
Beer, Air and Carbon Dioxide in. P. P. Gray and I. M. Stone....	15		
Malt Beverages, Iron Determination in. P. P. Gray and I. M. Stone	415		
Wines, Acetaldehyde Determination in. M. A. Joslyn and C. L. Comar.....	364		
<b>BIOLOGICAL MATERIALS</b>			
Ash from, Quantitative Spectrographic Estimation of Trace Elements in. P. H. Bell.....	579		
Iodine Microdetermination in. N. L. Matthews, G. M. Curtis, and W. R. Brode.....	612		
Iron Determination in. S. H. Jackson.....	302		

Chromyl Chloride from Volatilization of Chromium. Determination of Manganese in Stainless Steel. F. W. Smith.....	360	Trap for Moisture Determination. E. E. Langeland and R. W. Pratt.....	400
Chrysanthemum Carboxylic Acids. See Carboxylic Acids.		Vacuum Regulator for Constant Pressure. C. W. Ferry.....	647
Chrysanthic Acid, Phenolphthalein Detection in Presence of. E. H. Maechling.....	586	Dithizone, Soil Extracts Microanalyzed for Copper, Zinc, and Cobalt (with Nickel) by. P. L. Hibbard.....	615
Cinchophen Hydrochloride Hydrate, Octagons of. Angular Constants of Microcrystalline Profiles and Silhouettes. A. C. Shead.....	662	Dithizone, Symbol Dz to Signify. P. L. Hibbard.....	179
Citrus Fruit Juice, Ascorbic Acid Estimated in, by Iodine Titration. J. W. Stevens.....	269	Dog Food, Canned, Samples Prepared for Proximate Chemical Analysis. C. J. Koehn.....	325
Coal, Hydrogenated, Sulfur Forms Determined in Insoluble Residues from. R. F. Abernethy, H. M. Cooper, and E. C. Tarpley.....	389	Drops Counted with Photoelectric Relay. G. W. Josten.....	353
Coal. Relation between Volatile Matter and Hydrogen-Carbon Ratio in Coal and Its Banded Constituents. C. H. Fisher.....	374	Dumas Method. See Nitrogen.	
<b>COBALT</b>		Dusts, Quartz (Free Silica) Determined Chemically in. Emanuel Kaplan and W. T. Fales.....	388
Detection with 2-Nitroso-1-Naphthol-4-Sulfonic Acid. L. A. Sarver	378	<b>ELECTRIC Furnace. See Furnace.</b>	
Determination in Ores by Internal Electrolysis without Diaphragms. J. J. Lurie and L. B. Ginsburg.....	201	<b>ELECTRODES</b>	
Estimation in Soil Extracts in Presence of Copper and Zinc (with Nickel) by Dithizone Micromethods. P. L. Hibbard.....	615	Evaporation of Solutions on, Apparatus for. H. A. Wilhelm.....	327
Precipitation in Crystalline State by Hydrogen Sulfide in Presence of Pyridine. E. A. Ostroumov.....	693	Glass, Preparation of. M. L. Nichols and J. M. Schempf.....	286
Separation from Manganese by Hydrogen Sulfide in Solution Containing Pyridine and Pyridine Salt of Hydrochloric Acid. E. A. Ostroumov and G. S. Maslenkova.....	695	Graphite, Treated for Evaporation of Aqueous Solutions in Quantitative Spectrographic Analysis. H. A. Wilhelm.....	211
<b>COLORIMETRY</b>		Quinhydrone, H-Ion Concentration of Liquids and Semiplastic Solids Determined by. G. P. Sanders.....	274
Ascorbic Acid Determination. J. V. Seudi and H. D. Ratish.....	420	Support for, in Electrometric Titrations. M. E. Stansby.....	529
Iron Determined with Salicylic Acid. J. P. Mehlig.....	136	Electrolysis, Internal, without Diaphragms. Determination of Nickel, Cobalt, and Copper in Ores. J. J. Lurie and L. B. Ginsburg.....	201
Lead Determined in Maple Syrup. J. L. Perlman.....	134	<b>ELECTROMETRIC APPARATUS</b>	
Phosphoric Acids (Ortho-, Pyro-, and Meta-) Determined by pH Titrations. A. B. Gerber and F. T. Miles.....	519	Electrode Support for Titrations. M. E. Stansby.....	529
Standard Solutions for. Permanent Series for o-Tolidine Method for Chlorine. G. Dragt with M. G. Mellon.....	256	for Titrations of High Precision. Einar Stenhagen.....	432
Sugars Determined in Plant Materials by Photoelectric Method. W. T. Forsee, Jr.....	411	Titrimeter Circuit. E. B. Working.....	397
Tungsten, Microcatalytic Reaction for. E. B. Sandell.....	667	Electronic Recording Analytical Balance. R. H. Müller and R. L. Garman.....	436
Zinc Determination by Micromethod. W. L. Lott.....	335	Electronic Voltage Regulator with Supplementary Circuit to Supply Low Voltages. E. B. Working.....	434
<b>COLUMBIAN CARBON COMPANY. Colloidal Carbon Research Laboratory</b>	215	Emodin, Phenolphthalein Detection in Presence of. E. H. Maechling.....	586
<b>COLUMBIUM DETERMINATION IN STAINLESS STEEL. T. R. Cunningham.....</b>	233	Engines. Antifreeze Testing. K. H. Hoover and F. E. Dolian.....	293
<b>COMBUSTION ANALYSES</b>		Ester Saponification under Difficult Conditions. W. E. Shafer and Jean Picard.....	515
Carbon and Hydrogen Determined by Combustion Train. Samuel Natelson and E. B. Conner.....	276	Ethane Oxidation in Gas Analysis with Platinized Silica Gel as Catalyst. K. A. Kobe and W. I. Barnet.....	139
Furnace, Electric, for Automatic Combustion in Microelementary Analysis. L. T. Hallett.....	101	Ethanolamine in Microdetermination of Mercury. W. H. Rauscher.....	331
Halogen Microdetermination in Absorption Apparatus. L. T. Hallett.....	111	Ether, Ferric Chloride Extraction from Solution with. S. E. Q. Ashley and W. M. Murray, Jr.....	367
Nitrogen Oxide Absorption by Lead Peroxide in Microcombustions. W. R. Kirner.....	342	Ethyl Alcohol. See Alcohols.	
Tubes for Microcombustions, Filled with Electrolytic Silver Wool. W. MacNevin.....	341	Ethylene Dibromide Determination. M. W. Brenner and G. L. Poland.....	528
Cooling Device, Automatic, for Thyatron-Controlled Thermostats. A. B. Garrett.....	324	Evaporation Apparatus for Solutions, on Electrodes. H. A. Wilhelm.....	327
<b>COPPER</b>		Explosive. Nitrocelluloses, Stabilization and Stability Microtests of. E. Berl, G. Rueff, and Ch. Carpenter.....	219
Determination		Explosive. Nitromethane. Potential Hazards in Use. D. S. McKittrick, R. J. Irvine, and I. Bergsteinsson.....	630
in Biological Material by Spectrographic Analysis. Jacob Cholak and R. V. Story.....	619	<b>EXTRACTION</b>	
by Iodofluoride Method. W. R. Crowell, S. H. Silver, and A. T. Spier.....	80	Acids of Petroleum Separated by Liquid-Liquid Extraction. H. G. Schutze, W. A. Quebedeaux, and H. L. Lochte.....	675
with 2-Nitroso-1-Naphthol-4-Sulfonic Acid. L. A. Sarver.....	378	Apparatus	
in Ores by Internal Electrolysis without Diaphragms. J. J. Lurie and L. B. Ginsburg.....	201	Continuous, Using Hot Solvent. T. R. P. Gibb, Jr.....	547
Estimation in Soil Extracts in Presence of Zinc and Cobalt (with Nickel) by Dithizone Micromethods. P. L. Hibbard.....	615	Devices for Extraction by Immiscible Liquids. H. J. Wollner and J. R. Matchett.....	31
Preheater Tube, Micro-. W. MacNevin and H. S. Clark.....	338	Discontinuous Fractional, Using Reflux. R. E. Hersh, K. A. Vatteresian, R. A. Rusk, and M. R. Fenske.....	86
Corrosion of Boiler Superheater Elements, Magnetic Iron Oxide as Measure of. R. C. Ulmer.....	24	of Ferric Chloride from Solution with Ether. S. E. Q. Ashley and W. M. Murray, Jr.....	367
Corrosion, Tin Plate Resistance to, Determined by Hydrogen Evolution. V. W. Vaurio, B. S. Clark, and R. H. Lueck.....	368	<b>FEED, Vitamin A Potency of. G. S. Fraps.....</b>	525
Cotton Fiber, Raw, Microphotometer for Analyzing X-Ray Diffraction Patterns of. E. E. Berkley and O. C. Woodward.....	451	Ferric Chloride Extraction from Solution with Ether. S. E. Q. Ashley and W. M. Murray, Jr.....	367
Crucibles of Fused Magnesia. E. P. Barrett and W. F. Holbrook.....	91	Ferrous as Indicator in Evaluation of Solutions in Cerate Oxidimetry. G. F. Smith and C. A. Getz.....	304
Crystals. Microcrystalline Profiles and Silhouettes, Angular Constants of. Octagons of Cinchophen Hydrochloride Hydrate and of Silver Dichromate. A. C. Shead.....	662	Ferrous Ammonium Sulfate. See following item.	
Cube, Rottenone Determination in. II. Extraction from Root. H. A. Jones and J. T. Graham.....	19	Ferrous Compounds for Standardization of 2,6-Dichlorophenolindophenol, Especially Ferrous Ammonium Sulfate. A. J. Lorenz and L. J. Arnold.....	687
Curing. Sugar Determination in Pickling Mixtures and in Dry-Curing Mixtures. A. D. Rich and J. J. Vollertsen.....	240	Ferrous Iron. See Iron.	
<b>CYANIDE</b>		Ferrous Sulfate-Selenium as Catalyst in Kjeldahl Method. R. B. Bradstreet.....	696
Determination in Brass Plating Solutions. Samuel Heiman and W. M. McNabb.....	698	<b>FERTILIZERS</b>	
Plating Solutions, Gold Determination in. J. B. Kushner.....	641	Acidity and Basicity Determined in. W. H. Pierre, Nelson Tully, and H. V. Ashburn.....	72
Solutions, Gold and Silver Determination in. W. E. Caldwell and L. E. Smith.....	318	Phosphorus Pentoxide, Available, Determined in. W. H. MacIntire, W. M. Shaw, and L. J. Hardin.....	143
<b>DELAWARE, University of, Chemical Laboratory. A. S. Eastman.....</b>	588	Sulfur in Free State Determined in. F. B. Carpenter.....	703
Derris, Rottenone Determination in. II. Extraction from Root. H. A. Jones and J. T. Graham.....	19	Fibers, Load-vs.-Compression Characteristics of. E. J. Saxl.....	82
Detergents. Sulfur Determination in Surface-Active Agents. Ralph Hart.....	688	Films, Thin, Method of Preparing. E. L. Kallander.....	40
Dew Point Determination, Accurate. A. W. Hixson and G. E. White.....	235	Flame Test for Boron Estimation. H. C. Weber and R. D. Jacobson.....	273
Dextrose in Cane Molasses. Carl Erb and F. W. Zerban.....	246	Fluorine Determination in Spray Residue on Tomatoes. W. F. Eberz, F. C. Lamb, and C. E. Lachele.....	259
Dextrose in Sugar Mixtures. F. W. Zerban and Louis Sattler.....	669	Foam-Prevention Device for Concentrating Nonflammable Liquors. E. A. Gastrock and J. D. Reid.....	440
Diffraction. See X-Ray.		Forage, Carotene Determination in. D. W. Bolin and A. M. Khalapur.....	417
Dinitrophenylhydrazine Method for Camphor Determination in Alcoholic Solutions. E. M. Plein and C. F. Poe.....	78	Forage, Carotenoids in. L. O. Buxton and B. A. Dombrow.....	262
s-Diphenylcarbazide, Mercury Determination with. F. W. Laird and Alonza Smith.....	576	Formaldehyde Determination in Dilute Solutions and in Presence of Interfering Substances. Oscar Heim.....	431
Dispersion of Pure Hydrocarbons Arranged for Analysis of Hydrocarbon Mixtures. A. L. Ward and S. S. Kurtz, Jr.....	559	Formic Acid Determination. J. D. Reid and H. D. Weihe.....	271
<b>DISTILLATION APPARATUS</b>		Franklin Institute's Biochemical Research Foundation, Microchemical Laboratory of. H. K. Aber and J. Harand.....	403
Agitator for Reflux Bath in Low-Temperature Fractional Analysis Columns. J. W. Tooke.....	214	Friedrich-Kjeldahl Determination. See Kjeldahl Method.	
Antifoaming Device for Concentration of Nonflammable Liquors. E. A. Gastrock and J. D. Reid.....	440	Fuel Oil, Sediment Determination in. S. H. Hulse and H. L. Thwaites.....	678
Fractional, under High Vacuum, without Gravitational Reflux. G. von Elbe and B. B. Scott.....	284	Fumigants. Methyl Bromine Determination in Air. R. L. Busbey and N. L. Drake.....	390
Fractionating Columns for Laboratory. J. H. Simons.....	29	Furnace, Electric, for Automatic Combustion in Microelementary Analysis. L. T. Hallett.....	101
Fractionating Device for Vacuum Distillations. Evan Noonan.....	34	Fusions, Microprocedure for. Charles Van Brunt.....	224
Glass Fractionating Columns, Heat Input Control in. G. H. Morey.....	531	<b>GASES</b>	
Laboratory Columns Packed with Silicon Carbide. H. J. Hall and G. B. Bachman.....	548	Absorption Efficiency of Spiral Gas-Lift Wash Bottle. B. B. Corson.....	646
Rectifying Column, Small Low-Temperature. J. H. Simons.....	648	Analyses	
Semimicro Fractionating Column. S. D. Lesesne and H. L. Lochte.....	450	Confining Liquids for. Solubility of Gases in Acid Sodium Sulfate. K. A. Kobe and F. H. Kenton.....	76

Olefins, Sulfuric Acid Analysis of. M. P. Matuszak.....	354	with Mercaptoacetic Acid. H. W. Swank with M. G. Mellon...	7
Sulfur, Organic, Determined in. Titration of Sulfate in Sulfur Lamp with Barium Chloride. C. W. Wilson and W. A. Kemper.....	418	with <i>o</i> -Phenanthroline by Spectrophotometric Method. W. B. Fortune with M. G. Mellon.....	60
Vapor-Density Balance of Glass. J. H. Simons.....	587	in Presence of Titanium, Using Zinc Reduction. Emil Truog and R. W. Pearson.....	631
Volatile, Determined by Aspiration Method. L. A. Sarver.....	415	with Salicylic Acid, Colorimetrically. J. P. Mehlig.....	136
Gasoline Analysis, Proximate. C. L. Thomas, H. S. Bloch, and James Hoekstra.....	153	Ferrous, Detection with 2-Nitroso-1-Naphthol-4-Sulfonic Acid. L. A. Sarver.....	378
Gelatins, Load- <i>vs.</i> -Compression Characteristics of. E. J. Saxl.....	82	Manganese, Nickel, and Phosphorus Determined in, by Spectro- photometric Methods. W. M. Murray, Jr., and S. E. Q. Ashley.....	1
Germanium Determination in Minerals and Solutions. W. C. Aitken- head and A. R. Middleton.....	633	Separation from Solutions of Alloys by Extraction with Ether. S. E. Q. Ashley and W. M. Murray, Jr.....	367
Germicide Testing Methods. G. F. Reddish.....	425	as Standard of Reference in Evaluation of Solutions in Cerate Oxidimetry. G. F. Smith and C. A. Getz.....	304
GLASS		Iron Oxide, Magnetic, Determined as Measure of Corrosion of Boiler Superheater Elements. R. C. Ulmer.....	24
Blowing, Accessories for. W. A. Carlson.....	644		
Electrodes. <i>See</i> Electrodes.			
Fractionating Columns, Heat Input Control in. G. H. Morey.....	531		
Magnetic Stirrer for Systems Enclosed in. J. H. Simons.....	638		
GOLD			
Assay Beads, Spectrographic Examination of. J. Seath and F. E. Beamish.....	535	KEROSENE Testing by Smoke Tendency Lamp. J. B. Terry and Edward Field.....	33
Determination in Cyanide Plating Solutions. J. B. Kushner.....	641		
Determination in Cyanide Solutions. W. E. Caldwell and L. E. Smith.....	318	KJELDAHL METHOD	
Silver Assay Beads Parted by Nitric Acid in Presence of Platinum Metals and. J. Seath and F. E. Beamish.....	639	Catalyst for Nitrogen Determination. R. B. Bradstreet.....	696
Granules, Apparatus for Testing Crushing Strength of. E. F. Harford, Graphite Electrodes. <i>See</i> Electrodes.	40	Fume Tube for Microdigestions. J. S. Blair.....	112
Graphite Purification for Spectrochemical Analysis. A. H. Staud and A. E. Ruehle.....	59	Hydriodic Acid Preparation for Friedrich-Kjeldahl Determinations. E. P. Clark.....	677
Gravimetric Determination of Zinc by Mercuric Thiocyanate. W. C. Vosburgh, Gerald Cooper, W. J. Clayton, and Harry Pfann.....	393		
Grignard Reagent Applied to Study of Mineral Oils. R. G. Larsen.....	195		
		LABORATORIES, Modern	
HALOGEN Determination in Organic Compounds by Lime Ignition Method. R. H. Kimball and L. E. Tufts.....	530	Abbott Laboratories, Microchemical Section. E. F. Shelberg.....	704
Halogen Microdetermination by Combustion in Absorption Apparatus. L. T. Hallett.....	111	American Medical Association's Microchemical Laboratory. J. B. Peterson and E. W. Schoeffel.....	172
Heat Apparatus, Micro-. Preheater of Copper Tubing. W. Mac- Nevin and H. S. Clark.....	338	Armo Research Laboratories, Anson Hayes.....	97
Heat Apparatus, Thermostats, Thyatron-Controlled, Automatic Cooling Device for. A. B. Garrett.....	324	Columbian Carbon Company, Research Laboratory.....	215
Hooker Electrochemical Company's Research Office Building. G. F. Rugar.....	649	Delaware, University of. Chemical Laboratory. A. S. Eastman.....	588
Hydriodic Acid Preparation for Alkoxy and Friedrich-Kjeldahl De- terminations. E. P. Clark.....	677	Franklin Institute's Biochemical Research Foundation, Micro- chemical Laboratory. H. K. Alber and J. Harand.....	403
Hydrocarbons. Refraction, Dispersion, and Related Properties of Pure Hydrocarbons. A. L. Ward and S. S. Kurtz, Jr.....	559	Hooker Electrochemical Company. G. F. Rugar.....	649
( <i>See also</i> Organic Compounds, Petroleum, and kind of hydrocarbon.)		Mellon Institute Research Laboratories. H. S. Coleman.....	550
		Mines, Bureau of. Petroleum Experiment Station. H. M. Smith.....	287
HYDROGEN		Monsanto Chemical Company's Research Division. Thomas and Hochwalt Laboratories. M. B. Moshier.....	441
Determination, Combustion Train for. Samuel Natelson and E. B. Conner.....	276	Owens-Illinois Glass Company. H. C. Winsor.....	42
Microdetermination		Pittsburgh Plate Glass Company. Columbia Chemical Division.....	329
with Carbon. Adalbert Elek.....	51	Lactose in Sugar Mixtures. F. W. Zerban and Louis Sattler.....	669
on Micro- or Semimicrosamples with One Movable Apparatus. Samuel Natelson, S. S. Brodie, and E. B. Conner.....	609	Lamp for Determining Smoke Tendency in Tests on Kerosene. J. B. Terry and Edward Field.....	33
Weighing Tube for Volatile Liquids in. V. A. Aluise.....	56	Latex. <i>See</i> Rubber.	
HYDROGEN-ION CONCENTRATION		LEAD	
Coprecipitation and pH Value in Precipitations with 8-Hydroxy- quinoline. H. V. Moyer and W. J. Remington.....	212	Determination in Biological Material by Spectrographic Analysis. Jacob Cholak and R. V. Story.....	619
of Liquids and Semiplastic Solids Determined by Quinhydrone Elec- trode. G. P. Sanders.....	274	Determination in Maple Sirup by Colorimetric Method. J. L. Perl- man.....	134
Phosphoric Acids (Ortho-, Pyro-, and Meta-) Determined by Colori- metric pH Titrations. A. B. Gerber and F. T. Miles.....	519	Maple Sirup Analyzed by Canadian Lead Method. I. E. Pudding- ton and J. F. Snell.....	132
Hydrometer, Chain, for Alcohol Determination in Pharmaceutical Liquids. Karl Bambach.....	541	Lead Peroxide, Nitrogen Oxide Absorption by, in Microcombustions. W. R. Kirner.....	342
<i>p</i> -Hydroxyphenylarsonic Acid. <i>See</i> Arsonic Acid.		Levulose in Cane Molasses. Carl Erb and F. W. Zerban.....	246

Assay Beads for Platinum, Palladium, and Gold. J. Seath and F. E. Beamish.....	535
Biological Ash, Quantitative Estimation of Trace Elements in. P. H. Bell.....	579
of Biological Material. Lead, Tin, Aluminum, Copper, and Silver. Jacob Cholak and R. V. Story.....	619
Carotenes (Alpha- and Beta-) Determined by Spectrophotometer. C. L. Shrewsbury, H. R. Kraybill, and R. B. Withrow.....	253
of Carotenoids in Forage. L. O. Buxton and B. A. Dombrow.....	262
Graphite Electrodes Treated for Evaporation of Aqueous Solutions. H. A. Wilhelm.....	211
Graphite Purification for. A. H. Staud and A. E. Ruehle.....	59
Iron Determination with <i>o</i> -Phenanthroline. W. B. Fortune with M. G. Mellon.....	60
Iron Determined Colorimetrically with Salicylic Acid. J. P. Mehlig.....	136
Manganese, Nickel, and Phosphorus Determined in Iron and Steel by Spectrophotometric Methods. W. M. Murray, Jr., and S. E. Q. Ashley.....	1
Quantitative Analysis Based on Spectral Energy. Morris Slavin.....	407
Quantitative, in Chemistry and Metallurgy. J. S. Owens.....	64
Rare Earths Estimated Quantitatively by Arc Spectra. C. N. McCarty, L. R. Scribner, Margaret Lawrenz, and B. S. Hopkins.....	184
of Sodium Hydroxide for Traces of Impurities. O. S. Duffendack and R. A. Wolfe.....	161
<b>QUARTZ Determination in Dusts. Emanuel Kaplan and W. T. Fales</b>	<b>388</b>
Quinhydrone Electrode. See Electrodes.	

Spot Tests, Azo Derivatives of 8-Hydroxyquinoline Tested as Analytical Reagents by. Thomas Boyd, E. F. Degering, and R. N. Shreve. . . . .	606	of Sulfur in Oil, Tetrahydroxyquinone as Indicator in. R. T. Sheen and H. L. Kahler. . . . .	206
Spot Tests. Paper as Medium for Analytical Reactions. B. L. Clarke and H. W. Hermance. . . . .	591	<i>o</i> -Tolidine Method for Chlorine, Permanent Series for. Solutions for Colorimetric Standards. G. Dragt with M. G. Mellon. . . . .	256
Spray Residue. Fluorine Determination on Tomatoes. W. F. Eberz, F. C. Lamb, and C. E. Lachele. . . . .	259	Tomatoes, Fluorine Spray Residue Determined on. W. F. Eberz, F. C. Lamb, and C. E. Lachele. . . . .	259
Spray Residue. Nicotine Determination on Apples. William Ralston	533	Traub Method. See Nitrogen.	
<b>STEEL</b>		Tungsten Determination, Effect of Phosphate on. S. G. Simpson, W. C. Schumb, and M. A. Sieminski. . . . .	243
Alloy, Nickel Determination in. Photometric Titrimeter. W. J. Boyer. . . . .	175	Tungsten, Microcatalytic Color Reaction for. E. B. Sandell. . . . .	667
Manganese, Nickel, and Phosphorus Determined in, by Spectrophotometric Methods. W. M. Murray, Jr., and S. E. Q. Ashley. . . . .	1	Turbidimetry. Nicotine Microtitration by Photoelectric Cell. L. D. Goodhue. . . . .	52
Stainless, Chromium Volatilization as Chromyl Chloride in Determination of Manganese in. F. W. Smith. . . . .	360	Turbidimetry. Sugar Products. VI. Method and Formulas for Determination of Color and Turbidity in Colored Media. F. W. Zerban and Louis Sattler. . . . .	9
Stainless, Columbium and Tantalum Determination in. T. R. Cunningham. . . . .	233		
Stirrer. See Agitators.		<b>U-GAGE. See Pressure Apparatus.</b>	
Stopcock, Greaseless. L. S. Echols, Jr. . . . .	527	Ultracentrifuge. See Centrifuge.	
<b>SUGAR</b>		University of Delaware. See Delaware.	
Analysis of Mixtures Containing Dextrose, Levulose, Maltose, and Lactose. F. W. Zerban and Louis Sattler. . . . .	669	Urea Determination in Milk. A. E. Perkins. . . . .	69
-Cane Juice, Estimation of Degree of Souring in. C. A. Fort and J. I. Lauritzen. . . . .	251	Urine, Iodine Microdetermination in. A. C. Bratton, J. F. McClelland, William Foster, and Ralph White. . . . .	600
Caramel Color Analysis. W. R. Fetzer. . . . .	349	(See also Biological Materials.)	
Determination		<b>VALVE, Constant-Pressure. K. S. Willson. . . . .</b>	279
in Cane Molasses. Total Reducing Sugars, Dextrose, and Levulose. Carl Erb and F. W. Zerban. . . . .	246	Valve, Self-Regulating, for Air-Collecting Device. L. Williams and A. H. W. Busby. . . . .	512
in Curing Pickles and Dry-Curing Mixtures by Polarimetric Method. A. D. Rich and J. J. Vollertsen. . . . .	411	Vanilla. See following item.	
in Plant Materials. Photocolorimetric Method. W. T. Forsee, Jr. . . . .	9	Vanillin Determination in Vanilla Extracts by Photometric Method. T. C. Daniels, Byron Emery, and Dorothy Prather. . . . .	320
Products, Turbidity in. VI. Method and Formulas for Determination of Color and Turbidity in Colored Media. F. W. Zerban and Louis Sattler. . . . .	9	Vapor-Density Balance of Glass. J. H. Simons. . . . .	587
(See also Sirup.)		Varnish Films, Fragile, Prepared for Determining Tensile Strength, Elongation, and Permanent Set. E. H. Bayer and Leo Kampf. . . . .	280
Sulfamic Acid as Standard of Reference in Acidimetry. M. J. Butler, G. F. Smith, and L. F. Audieth. . . . .	690	Viebeck and Schwappach Method. See Alkoxy.	
Sulfanilamide Identification by Micromethod. J. V. Scudi. . . . .	346	<b>VISCOSITY</b>	
Sulfanilamide Reduction by Ascorbic Acid in Acidic Media. J. V. Soudi and H. D. Ratish. . . . .	420	of Aniline between 20° and 100° C. L. A. Steiner. . . . .	582
<b>SULFATE</b>		Asphalt Flow Shown by Method of Successive Penetrations. R. N. Traxler and L. R. Moffatt. . . . .	188
Determination by Potentiometric Method. B. E. Christensen, Herbert Wymore, and V. H. Cheldelin. . . . .	413	Measurement. M. R. Cannon and M. R. Fenske. . . . .	297
Determination. Titration with Tetrahydroxyquinone in Semimicromethod. W. A. Peabody and R. S. Fisher. . . . .	651	Viscometer, Capillary-Type. P. E. Raaschou. . . . .	35
Titration in Sulfur Lamp with Barium Chloride Using Tetrahydroxyquinone as Indicator. Determination of Organic Sulfur in Gas. C. W. Wilson and W. A. Kemper. . . . .	418	<b>VITAMINS</b>	
4-Sulfonic Acid, 2-Nitroso-1-Naphthol-, Detection of Cobalt, Copper, and Ferrous Iron with. L. A. Sarver. . . . .	378	A. Carotenes (Alpha- and Beta-) Determined by Spectrophotometer and Photoelectric Photometer. C. L. Shrewsbury, H. R. Kraybill, and R. B. Withrow. . . . .	253
<b>SULFUR DETERMINATIONS</b>		A. Carotenoids in Forage. L. O. Buxton and B. A. Dombrow. . . . .	262
in Alloys. Louis Silverman. . . . .	433	A Potency of Feeds Evaluated. G. S. Fraps. . . . .	525
from Bomb-Washings Titrations. R. E. Kaufman. . . . .	538	B <sub>1</sub> Determined by Standardized Method. G. C. Supplee, R. C. Bender, and L. C. Babcock. . . . .	636
in Coal, Forms of Sulfur in Insoluble Residues from Hydrogenation of. R. F. Abernethy, H. M. Cooper, and E. C. Tarpley. . . . .	389	C. Ascorbic Acid in Citrus Juices Estimated by Iodine Titration. J. W. Stevens. . . . .	269
Free, in Fertilizers. F. B. Carpenter. . . . .	703	C. Ascorbic Acid Determined by Colorimetric Method. J. V. Scudi and H. D. Ratish. . . . .	420
in Oil. Tetrahydroxyquinone as Indicator in Direct Titration. R. T. Sheen and H. L. Kahler. . . . .	206	C (Ascorbic Acid). 2,6-Dichlorophenolindophenol Standardized with Ferrous Compounds. A. J. Lorenz and L. J. Arnold. . . . .	687
Organic, Especially in Sulfones and Sulfoxides. G. H. Young. . . . .	686	C. 2,6-Dichlorophenolindophenol Standardized for Determination of Ascorbic Acid. M. H. Menaker and N. B. Guerrant. . . . .	25
Organic, in Gas. Titration of Sulfate in Sulfur Lamp with Barium Chloride Using Tetrahydroxyquinone as Indicator. C. W. Wilson and W. A. Kemper. . . . .	418	C. 2,6-Dichlorophenolindophenol Standardized for Determination of Cevitamic Acid. R. E. Buck and W. S. Ritchie. . . . .	26
in Surface-Active Agents. Ralph Hart. . . . .	688	D Assays, Photographing Line Tests in. M. W. Taylor, Daniel Klein, and W. C. Russell. . . . .	26
Sulfuric Acid, Olefins Analyzed by. M. P. Matuszak. . . . .	354	Voltage Regulator, Electronic, with Supplementary Circuit to Supply Low Voltages. E. B. Working. . . . .	434
Surface-Active Agents, Sulfur Determination in. Ralph Hart. . . . .	688	Volumetric Work, Syringe Attachment for. A. L. Chaney. . . . .	326
Surface Tension Effects Eliminated in Specific Gravity Measurements. C. H. M. Roberts. . . . .	518		
Syringe Attachment for Volumetric Work. A. L. Chaney. . . . .	326	<b>WATER</b>	
<b>TANTALUM</b> Determination in Stainless Steel. T. R. Cunningham. . . . .	233	Boiler, Chloride Determination in. Effect of Ions on Mohr Method. R. T. Sheen and H. L. Kahler. . . . .	628
<b>TETRAHYDROXYQUINONE</b>		Determination in Alcohol. H. G. Botset. . . . .	517
as Indicator in Direct Titration of Sulfur in Oil. R. T. Sheen and H. L. Kahler. . . . .	206	Determination When Dissolved in Liquefied Gases. C. W. Perry. . . . .	513
as Indicator in Titration of Sulfate in Sulfur Lamp with Barium Chloride. Determination of Organic Sulfur in Gas. C. W. Wilson and W. A. Kemper. . . . .	418	Drinking, Iodine Microdetermination in. A. C. Bratton, J. F. McClelland, William Foster, and Ralph White. . . . .	600
for Sulfate Titration in Semimicromethod. W. A. Peabody and R. S. Fisher. . . . .	651	Moisture Determination. C. W. Griffiths. . . . .	394
Thermostats. See Heat Apparatus.		Moisture Determination by Distillation, Trap for. E. E. Langeland and R. W. Pratt. . . . .	400
Thiocyanic Acid, Selenious Acid Reduction by. W. T. Hall. . . . .	395	Pollution. Oxygen Dissolved in Water Determined by Modifications of Winkler Method. C. C. Ruchhoft, W. A. Moore, and O. R. Placak. . . . .	701
Thomas and Hochwalt Laboratories. See Monsanto Chemical Company.		Waxes. Melting Point Determination under Mercury. M. A. Coler. . . . .	164
Thyatron-Controlled Thermostats. See Heat Apparatus.		Waxes, Melting Point Studies of Binary and Ternary Mixtures of. J. R. Koch, G. J. Hable, and Lewis Wrangell. . . . .	166
Tin Determination in Biological Material by Spectrographic Analysis. Jacob Cholak and R. V. Story. . . . .	619	Wine. See Beverages, Alcoholic.	
Tin Plate, Corrosion Resistance of, Determined by Hydrogen Evolution. V. W. Vaurio, B. S. Clark, and R. H. Lueck. . . . .	368	Winkler Method. See Oxygen.	
Titanium, <i>p</i> -Hydroxyphenylarsonic Acid as Reagent for. C. T. Simpson and G. C. Chandlee. . . . .	642	Wood Preservation, Chemical Studies of. Wood-Block Method of Toxicity Assay. R. E. Waterman, John Leutritz, and C. M. Hill. . . . .	306
Titanium, Iron Determined in Presence of, Using Zinc Reduction. Emil Truog and R. W. Pearson. . . . .	631	<b>X-RAY DIFFRACTION</b>	
<b>TITRATION</b>		of Calcium Phosphates. H. C. Hodge, M. L. LeFevre, and W. F. Bale. . . . .	156
Arsenious Oxide Analysis by, with Iodine. Paul Lundman. . . . .	387	Chemical Analysis by. J. D. Hanawalt, H. W. Rinn, and L. K. Frevel. . . . .	457
of Ascorbic Acid in Citrus Juices with Iodine. J. W. Stevens. . . . .	269	Patterns of Raw Cotton Fiber, Microphotometer for Analysis of. E. E. Berkeley and O. C. Woodyard. . . . .	451
Electrometric		<b>ZINC</b>	
Apparatus of High Precision for. Einar Stenhagen. . . . .	432	Determination by Colorimetric Micromethod. W. L. Lott. . . . .	335
Circuit, Balanced, for. E. B. Working. . . . .	397	Determination Gravimetrically by Mercuric Thiocyanate Method. W. C. Vosburgh, Gerald Cooper, W. J. Clayton, and Harry Pfann	393
Electrode Support for. M. E. Stansby. . . . .	529	Estimation in Soil Extracts in Presence of Copper and Cobalt (with Nickel) by Dithizone Micromethods. P. L. Hibbard. . . . .	615
of Meyer, Kurt. Improvements in Method. S. R. Cooper and R. P. Barnes. . . . .	379	Germanium Determination in Zinc Minerals and Solutions. W. C. Aitkenhead and A. R. Middleton. . . . .	633
Nickel Determined in Alloy Steels by Photometric Titrimeter. W. J. Boyer. . . . .	175	Iron Determined in Presence of Titanium, Using Zinc Reduction. Emil Truog and R. W. Pearson. . . . .	631
of Nicotine by Turbidimetric Micromethod Using Photoelectric Cell. L. D. Goodhue. . . . .	52	Zirconium, <i>p</i> -Hydroxyphenylarsonic Acid as Reagent for. C. T. Simpson and G. C. Chandlee. . . . .	642
Phosphoric Acids (Ortho-, Pyro-, and Meta-). Colorimetric pH Determination of. A. B. Gerber and F. T. Miles. . . . .	519		
Potentiometric, in Nonaqueous Solutions. Solvents. A. E. Ruehle	130		
Rotenone Determination. H. A. Jones. . . . .	684		
of Sulfate, Tetrahydroxyquinone in Semimicromethod. W. A. Peabody and R. S. Fisher. . . . .	651		
Sulfur Determinations from Bomb-Washings Titrations. R. E. Kaufman. . . . .	538
