

# Contents

Marek BALCER	
Characteristics and decomposition of expressions in the PF-notation .....	5
Waldemar HOŁUBOWSKI, Sebastian ŻUREK	
Note on simple Lie algebras of infinite matrices .....	23
Ahmed A. ABDELHAKIM	
A strong convergence result for systems of nonlinear operator equations involving total asymptotically nonexpansive mappings in uniformly convex Banach spaces .....	27
Joanna JURECZKO	
Strong sequences and their consequences in social choice .....	49
Grzegorz SITEK	
The modes of a mixture of two normal distributions .....	59
Piotr WILCZEK	
The ultrametric properties of binary datasets .....	69
Roman CZAPLA	
Basic sums as parameters characterizing .....	85
Ferdinand Evert UILHOORN	
Estimating rapid flow transients using extended Kalman filter .....	97
Radosław GRZYMKOWSKI, Edyta HETMANIOK, Mariusz PLESZCZYŃSKI	
The Taylor transformation hybrid method applied for solving the Stefan problem .....	111
Rafał BROCIEK, Damian SŁOTA	
Implicit finite difference method for the space fractional heat conduction equation with the mixed boundary condition .....	125

Katarzyna ADRIANOWICZ, Iwona NOWAK

Mathematical methods in algorithm for websites positioning .....137

Barbara BIŁY

The method of finding points of intersection of two cubic  
Bézier curves using the Sylvester matrix ..... 155
