

INDEX OF SUBJECTS.

- Acetaldehyde, spectrum of, infra-red, 20.
Acetic acid, infra-red analysis of, in mixtures with its anhydride, 14.
interconversion of, with acetoacetic acid, 206.
lead salt, oxidation by, 93, 143.
metabolism of, in tissues, 206.
oxidation in, 208.
Acetic acid, amino-, nickel salt, dihydrate, crystal structure of, 60.
Acetoacetic acid, condensation of, with oxaloacetic acid, 208.
interconversion of, with acetic acid, 206.
metabolism of, oxidation in, 208.
Acetophenone, *p*-bromo-, reduction of, to ethylbenzene, 101.
Acetyl phosphatase, 198.
phosphate, properties of, 199.
Acetylene, preparation of furans from, 157.
Acetylenedicarboxylic acid, ethyl ester, condensation of, with furan-2-valeric acid, 160.
Acids, fatty, and their esters, heat of adsorption of, on steel, 34.
films, structure of, 32.
frictional properties of, on metals, 34.
higher, metabolism of, 212.
synthesis of, from acetate, 213.
Aconitase, 204.
Acrylic acid, methyl ester, polymerisation of, 148.
Adamantane, crystal structure of, 62.
Adenine nucleotide co-enzymes, 95, 175.
nucleotides as co-enzymes of hydrogen transport, 179.
Adenosine diphosphate, 178.
preparation of, 178.
triphosphate, 176.
preparation of, 178.
Adenosine-5'-phosphoric acid, derivatives, phosphate transfer by, 175.
Adenylic acid, muscle, 175, 177.
Adipic acid, crystal structure of, 61.
preparation of, 171.
structure of, 48.
Adiponitrile, impurity in, 17.
Adrenals, biochemistry of, 214.
cholesterol in, 229.
removal of. *See Adrenalectomy.*
yield of sterols from, 222.
Adrenal cortex, biochemistry of, 214.
extracts, assay of, 218.
secretory activity of, control of, 228.
steroids, administration of, to adrenalectomised or normal animals, 225.
biological precursors of, 229.
fate of, in body, 230.
isolation of, 219.
physiological action of, 222.
Adrenal extracts, preparation and properties of, 218.
Adrenalectomy, results of, 214.
Adrenaline, effect of, on adrenal cholesterol, 229.
Adrenocorticotropin, 228.
effect of, on adrenal cholesterol, 229.
Aero-engines, foam formation in lubricating oil in, 42.
Alanine, separation of, from valine, 98.
 β -Alanine, preparation of, 97.
Alcohols, catalytic action of, in reduction processes, 102.
films, structure of, 32.
Alizarin-S, boron detn. with, 260.
Alkali halides, crystals, as prisms, 10.
metals, chemistry of, 65.
Alkaloids, isolation of, from totaquine, 98.
Alkylbenzenes, autoxidation of, 136.
Alkyl 1 : 4-dibromides, preparation of, 171.
Alloys, bearing, theory of, 27, 28.
Aluminium, detn. of, with quinosol or superol, 257.
separation of, from gallium, 263.
Aluminium alloys, detn. in, of copper, 256.
Aluminium monofluoride, 89.
halides, structure of, 68.
nitrate, decomposition of, 86.
monoxide, 89.
sulphites, 86.
Amines, cobalt complexes with, 71.
phosphorylation of, 104.
Amino-acids, basic, separation of, from protein hydrolysates, 97.
behaviour of, on ion exchange resins, 97.
crystal structure of, 59.
detn. of, 248.
by isotopic dilution, 254.
colorimetrically, 251.
enzymatically, 254.
microbiologically, 253.
from protein hydrolysis, 247.
from wool protein hydrolysates, separation of, 249.
in blood group A substance, 233.
intermediary metabolism of, 197.
separation of, 98.
electrolytically, 249.
spectra of, infra-red, 18.
a-Amino-acids, pyrazine syntheses from, 190.
a-Amino-carbonyl compounds, self-condensation of, 188.
Aminofurans, 164.
a-Amino-ketones, formation of, from oximes, 190.
Ammonia, reduction by alkali metals in, 102.

- Amontons' law, 27.
 Amplifiers, alternating-current, 8.
 Analoptics, pyrazines as, 194.
 Analysis, chromatographic, 98.
 inorganic, organic reagents for, 255.
 spectroscopic, infra-red, 11.
 Analytical chemistry, 247.
 Androgens, detn. of, in urine, 230.
 of adrenal cortex, 230.
 Androstane-3 : 11-diol-17-one, isolation of, from urine, 230.
 Anhydrocorticosterones, structure of, 224.
 Aniline molybdate, nickel detn. with, 261.
 Anilines, substituted, infra-red analysis of, 14.
 Animal viruses, constitution of, 243.
 Anisole, *p*-nitro-, conversion of, to aniline and *p*-anisidine, 102.
 Annellation, 123.
 Anorexia in adrenalectomy, 214.
 Anthranilic acid, sodium salt, cadmium and zinc detn. with, 261.
 Anthraquinone - 1 - azo - 4 - dimethylamine, lead detection with, 256.
 Antibodies, release of, controlled by adrenal substances, 228.
 Anti-foaming agents in lubricating oil, 42.
 Antimony triphenyl, crystal structure of, 62.
 Anti-oxidants for lubricating oils, 41.
 Antispasmodics, pyrazines as, 195.
 Arginine, detn. of, 252.
 Arsenic trihydride, metallic derivatives of, 64.
 triphenyl, crystal structure of, 62.
 Artichokes, Jerusalem, fructose syrup from, 96.
 Ascaridole, 142.
 Atomic weights, determination of, 65.
 Autoxidation, 131.
 inhibitors of, 93.
 Auxochromes, definition of, 117.
 interaction of, with chromophores, 117.
 ultra-violet absorption of, 118.
 Azoimide, decomposition of, by active nitrogen, 91.

 Bacteria, filtrates, spreading or diffusing factor in, 238.
 oxidation of pyruvic acid by, 198.
 Barium nitrate, decomposition of, 86.
 orthosilicate, crystal structure of, 52.
 Basophily of ribonucleic acid, 241.
 Bathochromic effect, 117.
 Bearing alloys, 27, 28.
 Beer's law, validity of, 107.
 Benzaldehyde, reduction of, to toluene, 101.
 Benzaldehyde, *p*-chloro-, reduction of, to toluene, 101.
 Benzene, purification of, from thiophen, 100.
 spectrum of, absorption, ultra-violet, 122.
 Benzene, bromo-, reduction of, to benzene, 101.
 Benzene, trichloro-, in lubricating oil, 42.
 nitro-, catalytic reduction of, 99.
 dinitro-, friction of, 29.
 Benzenearazoresorcinol, *p*-nitro-, beryllium detection with, 259.
 Benzeno-3 : 5-disulphonic acid, 1 : 2-dihydroxy-, disodium salt, iron detn. with, 258.
 Benzofuroxan, 4 : 6-dinitro-, potassium detection and detn. with, 264.
 Benzoic acid, 5-bromo-2-amino-, copper detn. with, 258.
 m-chloro-, reduction of, to benzoic acid 101.
 Benzoin, reaction of, with ammonium formate, 191.
 Benzophenone, friction of, 29.
 5 : 6-Benzquinoline, germanium detn. with, 263.
p-Benzquinone, spectrum of, absorption, ultra-violet, 121.
 Benzoylactic acid, ethyl ester, reduction of, to ethyl β -phenylpropionate, 103.
 Beryllium, detn. of, reagents for, 259.
O- β -Biotin, 94, 165.
 Biotin methyl ester, conversion of, into dethiobiotin methyl ester, 100.
 2 : 5 - Bisacetoxymethyltetrahydrofuran, conversion of, into 1 : 2 : 5 : 6-tetra-acetoxyhexane, 173.
 reaction of, with hydrogen bromide, 172.
 Bis-(5-formylfuryl-2)-mercury, 166.
 Bisfurylmercury, 166.
 2 : 5 - Bishydroxymethyltetrahydrofuran, 167.
 Bismuth, detn. of, reagents for, 259.
 separation of, from lead, 256.
 Bismuth triphenyl, crystal structure of, 62.
 Black tongue, treatment of, with pyrazine-carboxylic acids, 194.
 Blood, groups, 231.
 group A factor, 231.
 transfusion, technique of, 231.
 Bolometers, 6, 9.
 Bonds, protonated double, 67.
 Boron, detn. of, reagents for, 260.
 Boron trichloride, sulphur trioxide compound of, 81.
 halides, additive compounds of, 87, 80.
 hydrides, structure of, 67.
 monoxide, 88.
 Brass, detn. in, of iron, 258.
 Bromoform, rearrangement of, in presence of catalysts, 77.
 Butadiene, condensation of, to Buna, 18.
 production of, 171.
 spectrum of, absorption, infra-red, 20.
 ultra-violet, 113.
 Butadienes, nitro-, spectra of, absorption, ultra-violet, 115.
 Butanes, isomeric, infra-red analysis of, 14.
 cycloButane, spectrum of, infra-red, 20.
 Butane-1 : 4-diol, dehydration of, 162.

- Butanethiol, 4-hydroxy-, conversion of, into thiophan, 170.
 But-2-ene-1 : 4-diol, dehydration of, 162.
 5-Butylfurans, 5-tetrahydroxy-, 158.
 2-Butyltetrahydrofuran, 3'-hydroxy-, 167.
 But-2-yne-1 : 4-diol, production of, and its hydrogenation products, 162.
 Butyric acid, liver glycogen from, 213.
dl-Butyric acid, α -amino-, copper salt, crystal structure of, 60.
- Cadmium, detn. of, reagents for, 261. separation of, from copper and zinc, 257.
 Cadmium cyanide, crystal structure of, 52. *subiodide*, 89.
 Cesium fluosulphonate, X-ray structure of, 52.
 Calcium, detn. of, reagents for, 263.
 Calcium fluoride, crystals, as prisms, 10. *subhalides*, 89.
 nitrate, decomposition of, 86.
polysulphides, 65.
 vanadates, 83.
 Carbohydrates, chromatography of, 99. furans from, 158.
 intermediary metabolism of, 197.
 metabolism of, in adrenalectomy, 215.
 Carbon, active, catalytic action of, in complex formation, 72.
 Carbonatopentamminocobaltic salts, structure of, 73.
 Carbonyl chromophore, effect of auxochromes on, 118.
 compounds, reduction of, to methylene compounds, 100, 103.
 Carboxylase, oxalosuccinic, 204.
 Carnitine acid, lead detection with, 256.
 Carotenoids, spectra of, absorption ultra-violet, 113, 116.
 Casein, hydrolysis of, by papain, 248.
 Catalase, hydrogen peroxide decomposition by, 148.
 Catalysts for furan production, 168.
 for furfuraldehyde reduction, 167.
 for preparation of silicon alkyl and aryl halides, 76.
 palladium, 103.
 polymerisation, 149.
 Raney nickel, 99, 100, 101, 103.
 surface-active, in complex formation, 72.
 Catalytic oxidation, 146, 150.
 reduction, 99.
 Catechol, reaction of phosphorus oxy-chloride with, 104.
 Cells, photo-electric, absorption, 11.
 physiological, cytoplasm of, 240.
 division of, and growth, 246.
 nuclei, 244.
 nucleoli, 245.
 proliferation of, stimulation of, by chromatin, 245.
 Cellulose esters and ethers, spectra of, infra-red, and structure, 18.
 Ceric sulphate, complexes of, 74.
- Chalcopyrite, crystal structure of, 50.
 Charcoal, decomposition by, of amino-acids, 249.
 Chloranil, dehydrogenation by, in xylene, 156.
 Chlorates, oxidation by, in presence of catalysts, 151.
 Chloride films as lubricants, 37.
 5-Chlorobromamine acid, zirconium detn. with, 262.
 Chloroform, rearrangement of, in presence of catalysts, 77.
 Chlorophosphonic acid, dibenzyl ester, preparation and reactions of, 103.
 $\Delta^{1:4}$ -Cholestadien-3-one, spectrum of, absorption, ultra-violet, 121.
 Cholesterol, synthesis of, from acetate, 213.
 in the body, 229.
 Cholesteryl iodide, crystal structure of, 47, 52.
 Chromatin, 245.
 Chromatogram, partition, 248, 249. two-dimensional, 249.
 Chromatography, 98.
 Chromium carbides, 84.
 halides, equilibrium of, with iron, 84.
trioxide, catalytic action of, in hydrogen peroxide decomposition, 146.
 Chromophores, definition of, 117.
 four or more conjugated, ultra-violet absorption of, 116.
 interaction of, with auxochromes, 117.
 single, ultra-violet absorption of, 112.
 three conjugated, ultra-violet absorption of, 115.
 two conjugated, ultra-violet absorption of, 114.
 two cumulated, ultra-violet absorption of, 115.
 two isolated, ultra-violet absorption of, 113.
 ultra-violet absorption of, 110, 111.
 Chromosomin, 244.
 Chromous iodide, hydrazine complexes of, 75.
 preparation and properties of, 64.
 Cinchonine, tungsten detn. with, 260.
 Citric acid, formation of, from aceto-acetate and oxaloacetate, 208.
*iso*Citric dehydrogenase, 205.
 Citrogenase, 208.
 Coal, and its extracts, spectra of, infra-red, 19.
 Coatings, corrosion-resistant, in engines, 39.
 Cobalt, detn. of, reagents for, 261.
 Cobalt organic compounds, complex, with amines, 71.
 Cobaltamines, polarographic reduction of, 74.
 Cobaltous hydroxide, oxidation of, 64.
 Codehydrogenases, structure of, 180.
 Co-enzymes, adenine nucleotide, 175.
 of hydrogen transport, 179.
 Colour, measurement of, 255.

- Compounds, complex, chemistry of, 70.
 coloured, spectrophotometer in study
 of, 73.
- Co-ordinate link, 86.
- Cophosphorylase, yeast, 179.
- Copper as catalyst in preparation of silicon
 organic halides, 76.
 detrn. of, in steel, 257.
 reagents for, 256.
 separation of, from cadmium and zinc,
 257.
 slid on lubricated platinum, 24.
 slid on steel, 24.
 surface film on, 22.
- Copper chromite, catalytic action of, 167.
 citrate, complexes of, 74.
 organic compounds, chelate, with alde-
 hydes and diketones, 70.
 tartrate, complexes of, 74.
- Cori ester. *See* Glucose 1-phosphate.
- Coronene, crystal structure of, 57.
 structure of, 48.
- Corticosterone, structure of, 221.
- Corticosterone, 7-hydroxy-, structure of,
 221.
- Cozymasole, structure of, 180.
- Crepin, crystal structure of, 62.
- Cresylic acid, infra-red analysis of, 14.
- Crystals, friction of, 28.
- Crystallography, 46.
- Cubanito, crystal structure of, 52.
- Cupric salts as autoxidation catalysts, 152.
- Cystine, detn. of, 251.
- Cytochromistry, 240.
- Cytochrome *c* reductase, 205.
- Cytoplasm, 240.
 enzymes of, 242.
 particulate components of, 242.
 self-duplication of particles of, 243.
- Decalin, autoxidation of, 141.
- trans*-Decalyl 9-hydroperoxide, 141.
- Decarboxylase, specificity of, for amino-
 acids, 254.
- 11-Dehydrocorticosterone, structure of,
 221.
- 11-Dehydrocorticosterone, 17-hydroxy-,
 structure of, 221.
- Dehydrogenase, isocitric, 205.
 succinic, in cytoplasm, 242.
- Deoxycorticosterone acetates, crystal
 structure of, 62.
- 11-Deoxycorticosterone, structure of, 221.
- 11-Deoxycorticosterone, 17-hydroxy-,
 structure of, 221.
- Deoxyribonucleic acid, in cell nucleus, 244.
 synthesis of, in organism, 246.
- Detectors for infra-red analysis, 6, 15, 16.
- Deuteracetaldehyde, spectrum of, infra-
 red, 20.
- Deuterethanes, isotopic, infra-red analysis
 of, 13.
- Deuterium as label element for amino-
 acids, 254.
- Deuteromethanes, isotopic, infra-red
 analysis of, 13.
- Deuteromethane, nitro-, spectrum of,
 infra-red, 19.
- Di(adenosine-5'-phosphoric acid), 179.
- Diamond, friction of, on metals, 28, 29.
 surface structure of, 22.
- trans*-Dibenzoylmethylethylene, cyclis-
 ation of, to 2 : 5-diphenyl-3-methyl-
 furan, 160.
- Dibenzyl, crystal structure of, 47, 56.
- Diborane, structure of, 67.
- 3 : 4-Di(carbethoxyamino)-2-methylfuran,
 164.
- α -Dicarbethoxyglutaconic acid, ethylester,
 dimers, crystal structure of, 57.
- $\alpha\gamma$ -Dicarbomethoxyglutaconic acid, methyl
 ester, dimer, crystal structure of, 57.
- α -Dicarbonyl compounds, ultra-violet
 absorption of, 114.
- Dienes, conjugated, autoxidation of, 142.
- Diethyl dithiocarbamate, copper detn.
 with, 256.
- peroxide, thermal decomposition of, 141.
 sulphide, complexes of, with rhodium
 halides, 75.
- trans*-NN'-Diethyl-NN'-dimethylpiper-
 azinium diiodide, *trans*-di- β -chloro-,
 61.
- 2 : 5-Diethylpyrazine, 189.
- Diguanide sulphate, nickel detn. with, 261.
- Dihydriodiphosphopyridine nucleotide,
 184.
- Dihydrofarnesene hydroperoxide, 132.
- Dihydroflavin-adenine dinucleotide, 186.
- Dihydrofuran, 162.
- 2 : 3-Dihydrofuran, 94, 169.
- Dihydrotrehophosphopyridine nucleotide,
 181.
- Diketones, preparation of, 174.
- β -Diketones, copper complexes with, 70.
- anti* - 1 : 5 - Di - (*p* - methoxyphenyl) - 5 -
 hydroxyamino-3-oximino-1-pentene,
 tungsten detn. with, 261.
- 2 : 5-Dimethyl-3 : 6-diamylpyrazine, 189.
- 2 : 5 - Dimethyl - 3 : 6 - disobutylpyrazine,
 189.
- 2 : 5-Dimethyl-3 : 6-dipropylpyrazine, 189.
- 2 : 5-Dimethylfuran, formation of, from
 propenylethylnylcarbinol, 161.
- Dimethylglyoxime, nickel detn. with, 261.
 with hydrazine hydrochloride, iron detn.
 with, 259.
- 2 : 5-Dimethylpyrazine, properties of,
 192.
 synthesis of, 188.
- 3 : 6-Dimethylpyrazine, 2-amino-, 195.
- Dimethylsemiquinone, spectrum of, ab-
 sorption, ultra-violet, 121.
- 2 : 5-Dimethyltetrahydrofuran, conversion
 of, into 2 : 5-dimethylthiophan, 170.
- 2 : 5-Dimethylthiophan, formation of,
 from 2 : 5-dimethyltetrahydrofuran,
 170.
- Diphenyl oxide, hexachloro-, in lubricating
 oil, 42.
- sulphide, conversion of, into benzene,
 100.

- Diphenyl disulphide, *pp'*-dichloro-, in lubricating oil, 42.
 sulphone, conversion of, into benzene, 100.
 sulphoxide, conversion of, into benzene, 100.
- Diphenylcarbazide, lead detection by, 256.
- Diphenylene, crystal structure of, 58.
 structure of, 48.
- $3 : 6$ -Di- β -phenylethyl- $2 : 5$ -dimethyl-pyrazine, from benzylidenediacetyl oxime, 189.
- Diphonylmethane hydroperoxide, 137.
- $2 : 5$ -Diphenyl-3-methylfuran, formation of, from *trans*-dibenzoylmethyl-ethylene, 160.
- Diphenylphosphoryl chloride as phosphorylating agent, 176.
- $2 : 5$ -Diphenylpyrazine, 189.
- Diphosphoaneurin in pyruvate oxidation, 201.
- Diphosphopyridine nucleotide, 183.
- $2 : 5$ -Diisopropylpyrazine, 189.
- Diisopropylsalicylic acid, zinc salt, in lubricating oil, 41.
- $\alpha\alpha'$ -Dipropylsuccinic acid, ethyl ester, hydrogenation of, 162.
- $3 : 4$ -Dipropyltetrahydrofuran, 163.
- $\alpha\alpha'$ -Dipyridyl, ferrous sulphate complex, cadmium detn. with, 262.
 iron detn. with, 258.
- Dithiocarbonamides, copper detection with, 256.
- Dithioglycolic acid, conversion of, into acetic acid, 100.
- Dithio-oxamide. *See* Rubeanic acid.
- Dithizone, bismuth detn. with, 259.
 copper detn. with, 257.
 lead detn. with, 255.
 zinc detection with, 262.
- Dodecane- $2 : 5 : 8 : 11$ -tetraone, 174.
- Dodecane- $2 : 5 : 11$ -trione, 174.
- Drying, effect of, on physical properties, 63.
- Dyes, quinonoid, oxidation-reduction reactions of, 154.
 spectra of, absorption, infra-red, 19.
 ultra-violet, 129.
- Elaeidic acid, autoxidation of, 135.
- Electricity, frictional, 30.
- Electrons, mobile, 108.
 σ Electrons, 109.
 π Electrons, 108.
- Encephalomyelitis virus, equine, 243.
- Energy, rotational and vibrational, interaction of, 19.
- Engines, internal-combustion, abrasive and corrosive wear of, 39.
 lubrication of, 38.
- metallurgical structure in, in relation to wear, 40.
- Enzymes, in cell nucleus, 244.
 of cytoplasm, 242.
 oxidation by, 147.
- Epoxides, formation of, from olefins, 136.
- Equations, extinction coefficient, 12.
- Equilibria, heterogeneous, 81.
- Ergosterol peroxide, 142.
- Esters, spectra of, infra-red, 17.
- 2 -Ethoxy-5-methyl-5-ethyl- $2 : 5$ -dihydro-furan, 162.
- 2 -Ethoxy-2-methyltetrahydrofuran, chloro-, 162.
- Ethylbenzene, autoxidation of, 138.
 hydroperoxide, 137.
- Ethylene, spectrum of, infra-red, 20.
- Ethylenes, fluoro-, spectra of, infra-red, 20.
- Ethylenediamine, silver chromate complex, as reagent for metals, 263.
- Ethylenedithiol ethers, cleavage of, with Raney nickel, 100.
- Ethylenic chromophores, effect of auxochromes on, 119.
- $\alpha\beta$ -Ethylenic compounds, ultra-violet absorption of, 113.
- 4 -Ethyloct-4-on-1-yn-3-ol, conversion of, into 5-methyl-3-ethyl-2-propylfuran, 161.
- Euchromatin, 245.
- Eugenol, conversion of, into dihydro-eugenol, 101.
- Euphol, separation of, from euphorbium, 98.
- α -Euphorbol, separation of, from euphorbium, 98.
- Explosives, liquid and solid, initiation of, by friction, 45.
- Extinction coefficient, equation for, 12.
- Extinction curves, detn. of, 107.
- Fats, intermediary metabolism of, 197.
 metabolism of, in adrenalectomy, 216.
- Fenton's reaction, 94.
- Ferrous chloride, anhydrous, equilibrium of, with hydrogen sulphide, 83.
 hydroxide, heat of combustion of, to α -ferric oxide, 65.
- Feulgen nuclear reaction, 244.
- Fibres, natural, friction of, 29.
- Films, surface, structure of, 22.
 thickness and structure of, 31.
- Flavin-adenine dinucleotide, 186.
- Flavoproteins, 243.
- Flow-pressure between metals, 26.
- Fluoboric acid, acetyl derivative, 81.
- Formols in lubricating oil, 42.
- 5 -Formylfurans, 158.
- Fourier series method, 47.
- Friction, 20.
 chemical decomposition by, 43.
 initiation of explosives by, 45.
 kinetic and static, 26.
 kinetic, using lubricants, 31.
 sliding, electrostatic component of, 30.
 speed of, in lubrication, 33.
 static, between surfaces, using lubricants, 30.
 theory of, 21.
- Fructose syrup from Jerusalem artichokes, 96.

- Furan, spectrum of, infra-red, 20.
 Furans, 157.
 conversion of, into pyrroles and thiophens, 169.
 hydrogenation of, 94, 106.
 preparation of, 94.
 from acetylene, 157.
 ring fission in, 95, 171.
 Furan mercurials, 165.
 Furan-2 : 5-dicarboxylic acid, 159.
 Furan-2 : 3 : 5-tricarboxylic acid, 159.
 Furan-2-valeric acid, condensation of, with ethyl acetylenedicarboxylate, 160.
 Furfuraldehyde, catalytic decomposition of, 168.
 hydrogenation of, with copper chromite and nickel-cobalt catalysts, 167.
 hydrogenolysis of, 174.
 Furfuryl alcohol, catalytic decomposition of, 168.
 preparation of, from furfuraldehyde, 168.
 Furfurylamine, preparation of, 167.
 Furfurylideneacetaldehyde, hydrogenation of, 167.
 Furfurylideneacetone, hydrogenation of, 167.
 Furyl cyanide, hydrogenation of, 167.
 Furylchloroarsines, 165.
 Fusel oil, pyrazines in, 188.

 Gallium, separation of, from aluminium, 263.
 Gammexane, production of, infra-red analysis of benzene hexachlorides formed in, 14.
 Gases, films, effect of, on metallic friction, 32.
 Gastric juice, blood group substances in, 234.
 Geranylamine hydrochloride, crystal structure of, 47, 54.
 Germanium, detn. and separation of, reagents for, 262, 263.
 Germanium trichloroisocyanate, 78.
 Glass, friction of, 29.
 lubricated by fatty acid film, 31.
 Gliotoxin, crystal structure of, 62.
 Globar rod, 11.
 Glucos, absorption of, from intestines in adrenalectomy, 217.
 action of ammonia on, 191.
 Glucose 1-phosphate, preparation and purification of, 97.
N-Glucosido-1 : 2 : dihydronicotinamide, 183.
 Glutamic acid, detn. of, 252.
 by enzymes, 247.
 Glycerol, distillation of, with ammonium salts, 191.
 Glycine, detn. of, 251.
 Glycogen, liver and muscle, effect on, of adrenal steroids, 226.
 α -Glycols, oxidation of, with lead tetraacetate, 144.
 with periodic acid, 145.

 Glycolic acid, oxidation of, in presence of olefins, 151.
 Gold cyanide, crystal structure of, 52.
 Growth, animal, effect on, of adrenal steroids, 227.

 Hafnium, detn. of, with 1-phenyl-3-methylpyrazoline, 263.
 Halogen oxy-acids, chemistry of, 67.
 Halogens, detn. of, in organic compounds, 102.
 δ -Halogenobutyl esters, preparation of, 173.
 α -Halogeno-ketones, action of ammonia on, 190.
 Heat, frictional, decomposition by, 44.
O-Heterobiотin, 165.
 Heterochromatin, 245.
 Heterocyclic compounds, spectra of, absorption, ultra-violet, 128.
 $\Delta^{1:3}$ -cycloHexadieno, spectrum of, absorption, ultra-violet, 120.
 $\Delta^{1:5}$ -Hexadieno - 1 : 1 : 3 : 3 : 4 : 4 : 6 : 6-octacarboxylic acid, ethyl and methyl esters, crystal structure of, 57.
 Hexafluorodisiloxane, 79.
 Hexamethylisocyanoferrrous chloride trihydrate, 48, 49.
 Hexamethylenetetramine, with triethanolamine, iron removal with, in analysis, 259.
 Hexammincobaltic chloride, preparation of, with active carbon as catalyst, 72.
n-Hexane, as solvent in spectroscopy, 107.
 spectrum of, absorption, in solution and in gas phase, 109.
 cycloHexane, infra-red analysis of, mixed with cyclohexanone, 14.
 spectrum of, infra-red, 20.
 cycloHexanediones, spectra of, absorption, ultra-violet, 120.
 cycloHexanone, infra-red analysis of, mixed with cyclohexane, 14.
 Hexaphenylmethane, oxidation of, in presence of pyrogallol, 139.
 Hexatrienes, spectra of, absorption, ultra-violet, 114.
 Δ^1 -Hexene, autoxidation of, 132.
 cycloHexene peroxide, 132.
 Hexoic acid, 2 : 5 : 6-trihydroxy-, 2 : 5 : 6-triacetyl derivative, ethyl ester, 174.
 Hexokinase, action of, in presence of hormones, 209.
 Histidine, detn. of, 252.
 Histones in nucleolus, 246.
 Hormones, detn. of, in natural products, 105.
 effect of, on hexokinase reaction, 209.
 Hyaluronic acid, 236.
 Hyaluronidase, 236.
 detn. of, 239.
 Hydrocarbons, aromatic, spectra of, absorption, ultra-violet, 122.
 autoxidation of, 93, 131.
 cracking of, infra-red spectroscopy of, 17.

- Hydrocarbons, hydroaromatic, dehydrogenation of, 156.
mixed, infra-red analysis of, 13.
saturated, autoxidation of, 141.
- Hydrocyanic acid, cadmium and gold salts, crystal structure of, 52.
solutions in, 63.
- Hydrogen peroxide, decomposition of, catalysts for, 149.
oxidation by, 93, 145.
sulphide, equilibrium of, with ferrous chloride, 83.
- Hydro-peroxides, 131.
- α -Hydroxy-acids, oxidation of, 94.
with hydrogen peroxide and ferrous salts, 150.
- α -Hydroxyaldehydes, aromatic, copper complexes with, 70.
- γ -Hydroxycarbonyl compounds, tautomerism of, 161.
- 3-Hydroxyfurans, and their acetyl derivatives, 160.
- Hydroxyl radicals in oxidation with hydrogen peroxide, 146.
- Hyperchromic effect, 117.
- Hyperconjugation, 110.
- Ice, friction of surfaces of, 29.
- Imine radical, 91.
- Immunology of blood group substances, 235.
- Indane hydroperoxide, 137.
- Indicators, oxidation-reduction, 155.
- Indium, chemistry of, 65.
detn. of, reagent for, 263.
- Influenza virus, 243.
- Infra-red analysers, 16.
rays. *See under Rays.*
spectroscopy, 5.
in analysis, 11.
in structure diagnosis, 16.
- Inhibitors for autoxidation, 139.
- Inorganic analysis, organic reagents in, 255.
chemistry, 63.
compounds, crystal structure of, 49.
- Inosine diphosphate, preparation of, 178.
- Inosinic acid, 176.
- Inositol, separation of, from molasses, 99.
- Inositol hexaacetate, deacetylation of, 98.
- Iodoform, decomposition of, by friction under pressure, 43.
- Ion exchangers, resin, 96.
- Iron, coating of, with chromium, 84.
detn. of, reagents for, 258.
equilibrium of, with oxygen, 81.
molten, transfer of, to gaseous phase, 90.
- Iron carbonyl, diamagnetism and structure of, 69.
oxides and sulphides, interconversion of, 83.
salts as catalysts for hydrogen peroxide decomposition, 148.
- Isoagglutination, inhibition of, by blood group A substance, 232.
- Isocyclic systems, ultra-violet absorption of, 120.
- Jewel pivots, friction of, 29.
- Ketones, cyclic, oxidation of, by hydrogen peroxide and vanadium catalyst, 147.
oxidative ring fission of, 140.
spectra of, infra-red, 17.
- β -Ketosuberic acid, ethyl ester, condensation of, with ethyl bromopyruvate, 159.
- Kidneys, cytoplasm, phosphatase in, 242.
- Kidney cortex, oxidation of acetate by, 206.
- Lactobacillus*, amino-acid assays with, 253.
- Lactobacillus delbrückii*, oxidation of pyruvate by, 198.
- Lanthionine from protein hydrolysis, 247.
- Lead, detn. of, reagents for, 255.
equilibrium of, with oxygen and sulphur, 84.
separation of, from bismuth, 256.
from thallium, 256.
- Lead tetraacetate, oxidation with, 93, 143.
oxide, yellow, change of, into red form, effect of grinding on, 45.
dioxide, decomposition of, by friction under pressure, 44.
sulphide, sensitivity of, to infra-red rays, 10.
- Lead ores, smelting of, 84.
- Leech extracts, spreading or diffusing factor in, 238.
- Leucine, detn. of, 251.
separation of, from proline and valine, 98.
- Leuconostoc mesenteroides*, amino-acid assays with, 253.
- Light, extinction curves for, 107.
- Linoleic acid, autoxidation of, 135.
methyl ester, autoxidation of, 134.
- Linolenic acid, autoxidation of, 135.
- Lithium arsenides and phosphides, 64.
fluoride, crystals, as prisms, 10.
- Liver, acetate conversion in, 206.
acetylation of sulphonamides in, 199.
arginase of, effect of adrenal steroids on, 228.
cytoplasm, enzymes in, 242.
glycogen in, 242.
effect on, of adrenal steroids, 226.
pentose polynucleotide from, 240.
- Lubricants, boundary, effect of temperature on, 33.
extreme pressure, 37.
life of thin films of, 31.
metal soaps as, 35.
structure of thin films of, 31.
- Lubricating oils, addition to, of additives and polymers, 41.
anti-foaming agents for, 42.
- Lubrication, 20.
boundary, 21, 30, 35.

- Lubrication, engine, effect of temperature on, 40.
 extreme pressure, 37.
 metal film, 27.
 of internal combustion engines, 38.
 speed of friction in, 33.
- Lumazine, hydrolysis of, to amino-pyrazines, 195.
- Lungs, phospholipin-ribonucleoproteins with thromboplastic activity from, 243.
- Lymphocytosis in adrenalectomy, 217.
- Lymphopenia, due to adrenal steroids, 228.
- Lysine, detn. of, with *Neurospora crassa*, 254.
- Magnesium, detn. of, reagents for, 264.
- Magnesium bromophosphide, 64.
- Magnesol, 99.
- Maleic acid, reduction of, to succinic acid, 102.
 spectrum of, absorption, ultra-violet, 115.
- β -Maltose octaacetate, separation of, from sucrose octa-acetate, 99.
- Manganese nitrate, decomposition of, 86.
- Mangan-manganic oxide, 65.
- Manganous hydroxide, oxidation of, 64.
- d-Mannitol, separation of, from molasses, 99.
- Melting point, effect of pressure on, 44.
- p-Menthene, autoxidation of, 132.
- Mercurials, furan, 94.
- Mercurifurans, 165.
- Mercurifuran, 2-chloro-, 165.
- Mercurifurfuraldehyde, 5-chloro-, 166.
- Mercurifurfuryl alcohol, 5-chloro-, 165.
- Mercuri-3-isopropylfuran, 2-chloro-, 165.
- Mercury, detection of, with dithizone, 264.
- Metabolism, acotic, in tissues, 206.
 acetic and acetoinic, 208.
 carbohydrate, fat, and protein, tri-carboxylic acid cycle in, 202.
 carbohydrate, in adrenalectomy, 215.
 effect of adrenal steroids on, 226.
 electrolytes and water, in adrenalectomy, 214.
 fat, in adrenalectomy, 216.
 fatty acids, 212.
 intermediary, of amino-acids, carbohydrates, and fats, 197.
 protein, in adrenalectomy, 215.
 pyruvic acid, 197.
- Metals, polishing of, oxidation in, 44.
 properties of, pure, 65.
 shear strength of, 26.
- Metal-ammines, complex, 72.
- Metal films, lubrication with, 27, 36.
- Metal surfaces, effect of, on lubricant properties, 34.
 films on, 22.
 finish of, 27.
 friction of, effect of gas and vapour films on, 32.
- Metal surfaces, frictional properties of fatty acids on, 34.
 intimacy of contact between, 25.
 outgassing of, 25.
 rubbing, potential between, 24.
- Metal wires, effect on, of surface-active materials, 33.
- Metallurgy, X-ray methods in, 48.
- Methacrylic acid, polymerisation of, and its methyl ester, 148.
- Methane, nitro-, spectrum of, infra-red, 19.
- Methionine, detn. of, 252.
- Methoxyalkylbenzenes, reduction and de-methylation of, 102.
- 5-Methoxymethylfurfuraldehyde, formation of, from 2 : 3 : 4 : 6-tetramethyl d-1 : 2-glucosene, 158.
- Methyl chloride, reaction of, with silicon-copper, 76.
 cyanide, additive compounds of, with boron halides, 67.
 hydroperoxide, thermal decomposition of, 141.
 radicals in high temperature oxidation, 144.
- Methylamine, spectrum of, infra-red, 20.
- Methylene chloride, rearrangement of, in presence of catalyst, 77.
 groups, dehydrogenation of, by thiols, 154.
- a-Methylenic activity towards olefins, 133.
- 5-Methyl-3-ethyl-2-propylfuran, formation of, from 4-ethyloct-4-en-1-yn-3-ol, 161.
- Methylfurfural, 5-hydroxy-, hydrogenation of, 167.
- 5-Methylfurfuraldehyde, 5-hydroxy-, preparation of, from sucrose, 157.
- 5-Methylfuroic acid, oxidation of, 159.
- 5-Methylfuroic acid, 5-hydroxy-, methyl ester, hydrogenation of, over Raney nickel, 166.
- 2-Methyltetrahydrofuran, 162.
- 5 - Methyltetrahydrofuran - 2 - carboxylic acid, 5-hydroxy-, 5-acetyl derivative, ethyl ester, conversion of, into ethyl 2 : 5 : 6-triacetoxyhexoate, 174.
- Mica, friction of, 29.
 sheets, elastic deformation of, 33.
- Microscope, electron, 21.
- Microsomes, 242.
- Minerals, detn. in, of iron, 258.
- Mitochondria, 242.
- Mitosis, chemistry of, 246.
- Mixtures, spectra of, 12.
- Molasses, inositol and d-mannitol from, 99.
- Molecular structure and ultra-violet absorption, 110.
- Molecules, rotational and vibrational levels of, 19.
- Molybdenum, toluene-3 : 4-dithiol complex with, 261.
- Monel metal, catalytic action of, 168.
- Monox, 87.
- Morin, beryllium detn. with, 260.

- Mucin, hog gastric, blood group A substance from, 232.
 Muscle, heart, enzymes in, 242.
 Muscle adenylic acid, 175, 177.
- Naphthalene-3 : 6-disulphonic acid, 1 : 8-dihydroxy-, sodium salt, titanium detection with, 263.
 β -Naphthaquinoline, tungsten detn. with, 260.
 α -Naphthol, β -nitroso-, cobalt detn. with, 261.
 Nernst filament, 11.
Neurospora crassa, culture of, for lysine assay, 253.
 Nickel, catalytic, Raney, 99, 100, 101, 103. action of, in complex formation, 72. hydrogenation with, 166. detn. of, reagents for, 261. electroplating of, copper detn. in baths for, 257.
 Nickel citrate, complexes of, 74. tartrate, complexes of, 74.
 Nickel-cobalt, catalytic action of, 167.
 Nickel gauze, catalytic action of, 168.
 Nicotinamide methiodide, hydrogenation of, by sodium hyposulphite, 182.
 Niobium, detn. of, reagents for, 263.
 Nitric acid, structure of, 66.
 Nitriles, basic, reduction of, with ammonia and Raney nickel, 103.
 Nitrogen, heavy, as label element for amino-acids, 254.
 Nitrogen dioxide, reactions of, 86. tetroxide, reaction of, with phosphoric oxide, 63.
 Nitroglycerin, frictional initiation of, 45.
 Nitroparaffins, reduction of, 102.
 Nitroso-R-salt, cobalt detn. with, 261. iron detn. with, 259.
 Nitrosyl borofluoride, 81.
 Nonanediones, preparation of, 174.
- Oat-hulls, furans from, 157.
 Octahydroanthraquinone hydroperoxide, 137.
 isoOctane, thermal decomposition of, 142.
 n-Octanoic acid, fission of, incubated with liver, 212.
 Oestrone, reduction of, to oestradiols, 101.
 Oils, fatty sulphurised, as lubricants, 37.
 Olefins, autoxidation of, 93, 131. effect of thiophenol on, 153. hydroperoxides, decomposition of, 135. hydroxylation of, by per-acids, 151. α -methylenic dehydrogenation of, 133. polymerisation of, 149.
 Oleic acid, autoxidation of, and its ethyl ester, 135. methyl ester, autoxidation of, 134. hydroperoxide, 132.
 potassium salt, in sulphurised sperm oil, in lubricating oil, 42. reduction of, to stearic acid, 102.
 Oliguria in adrenalectomy, 215.
 Optical density, measurement of, 13.
- Organic chemistry, 92.
 Organic compounds, constitution and ultra-violet absorption spectra of, 92, 105.
 Organic reagents in inorganic analysis, 255.
 Oscillograph, cathode-ray, 9.
 Osmium, detn. and separation of, reagents for, 262.
 Osmium carbonyl halides, 76. tetroxide, catalysis by, of hydroxylation, 146. stability of, 86.
 Outgassing of metal surfaces, 25.
 Ovarian cyst fluid, blood group substances from, 235.
 Oxalic acid, spectrum of, absorption, ultra-violet, 114.
 Oxaloacetic acid, condensation of, with acetoacetic acid, 208. with pyruvic acid, 203.
 Oxalocitraconic acid, 203.
 Oxalocitramalic acid, 203.
 Oxalosuccinic acid, 204.
 Oxalosuccinic carboxylase, 204.
 Oxidase, d-amino-acid, in cytoplasm, 243. cytochrome, in cytoplasm, 242. pyruvic, 198. in brain tissue, 201.
 Oxidation, compulsory univalent, principle of, 155. mechanism of, 92, 130. of sulphur compounds, 152. with hydrogen peroxide, 145. with lead tetra-acetate, 143.
 Oximes, rearrangement of, to α -amino-ketones, 189.
 Oxine, bismuth separation with, 259. magnesium detn. with, 264. titanium detn. with, 263.
 Ozone, structure of, 67.
- Paints, spectra of, infra-red, 19.
 Palladium, catalytic, 103.
 Papilloma virus, 243.
 Paraffins, combustion of, 141.
 Paraffins, nitro-, infra-red analysis of, 14.
 Penicillin, crystal structure of, 46.
 Penta-1 : 3-diene, preparation of, 171.
 Pentamethylquercetin, boron detn. with, 260.
 Pentane-1 : 4-diol, dehydration of, 162.
 Pentane-1 : 5-diol, dehydration of, 163.
 Pentane-1 : 2 : 5-triol, dehydration of, 163. oxidation of, 161.
 Pentanol, 4 : 5-dibromo-, dehydrobromination of, 163.
 Pentan-2-ol, 1 : 5-dibromo-, 172.
 Pent-4-en-1-ol, isomerisation of, 163.
 Pentosans, furans from, 157.
 Pentose polynucleotides of cell cytoplasm, 240.
 Pepsin, blood group A substance from, 232.
 Perchloric acid as activator in catalytic reduction, 103. structure of, 66.

- Periodic acid, oxidation with, 145.
 Peroxides, formation of, from olefins, 131.
 Phenanthraquinone, dehydrogenation by, in nitrobenzene, 156.
 o-Phenanthroline, copper detn. with, 257.
 iron detn. with, 258.
 Phenols, nuclear sulphonation of, 153.
 Phenyl chromophore, effect of auxochromes on, 124.
 Phenylalanine, detn. of, 252.
 Phenylarsonic acid, and o-amino-, and p-hydroxy-, as reagents for metals, 262.
 bismuth separation with, 259.
 Phenylchlorosilanes, 77.
 Phenylidithiodiazolothiol, bismuth detn. with, 259.
 1-Phenyl-3-methylpyrazoline, hafnium detn. with, 263.
 Phenylpropionic acid, reduction of, to β -phenylpropionic acid, 102.
 3-Phenylpyrazolone, isonitroso-, copper detn. with, 257.
 Phosphatase, acetyl, 198.
 in cytoplasm, 242.
 Phosphide films as lubricants, 38.
 Phospholipin-ribonuclooproteins with thromboplastic activity, 243.
 Phosphoruspentabromido, crystal structure of, 51.
 chloroisocyanates and chlorothiocyanates, 78.
 trihydride, metallic derivatives of, 64.
 trioxide, reaction of, with nitrogen tetroxide, 63.
 oxychloride, structure of, 66.
 Phosphorylation, 103.
 Photographic developers, action of, 152.
 a-Picoline methiodide, bismuth detection with, 259.
 Picrolonic acid, calcium detn. with, 263.
 Pigments, detn. of, in natural products, 105.
 Piperidine, formation of, from dihydropyran, 170.
 from furfuraldehyde, 171.
 from tetrahydrofurfuryl alcohol, 95.
 Pituitary, anterior, control by, of adrenal cortex activity, 228.
 Plant ash, detn. in, of boron, 260.
 Plant viruses, constitution of, 243.
 Platinum, lubricant film for, 31.
 lubricated, copper slid on, 24.
 Platinum oxides, 86.
 Polishing, high surface temperatures in, 25.
 Polishing powders, reduction of, 44.
 Polyisobutylene, spectrum of, infra-red, and structure, 18.
 Polyenes, autoxidation of, 142.
 Polymerisation of unsaturated compounds, infra-red spectroscopy of, 14.
 Polysaccharides, end-group assay of, 99.
 Polystyrene, spectrum of, infra-red, and structure, 18.
 Polythene, oxidation of, 19.
 spectrum of, infra-red, and structure, 18.
 Potassium, detection and detn. of, re-agents for, 264.
 Potassium argentocyanides, 75.
 beryllium fluoride, crystal structure of, 52.
 cuprocyanides, 75.
 nickel cyanides, structure of, 69, 70.
 permanganate, oxidation by, 156.
 tetrachlorozincate, crystal structure of, 51.
 thioferrite, crystal structure of, 50.
 Powders, amorphous, spectra of, 11.
 Precipitants for amino-acids, 250.
 Pregnane-3 : 20-diol in urine after deoxy-corticosterone administration, 231.
 Δ^4 - Pregnene-12(3) : 21-diol-3 : 20-dione, 224.
 Progesterone, structure of, 224.
 Progesterone, 17-hydroxy-, structure of, 224.
 Propano, spectrum of, infra-red, 20.
 Propenylethylnylcarbinol, conversion of, into 2 : 5-dimethylfuran, 161.
 Propionic acid, liver glycogen from, 213.
 Proportionality factors in absorption spectroscopy, 107.
 isoPropylbenzo hydroperoxide, 137.
 Propylene, spectrum of, infra-red, 20.
 2-Propyltetrahydrofuran, 3'-hydroxy-, 167.
 Proteins, hydrolysis of, amino-acids from, 247.
 metabolism of, in adrenalectomy, 215.
 spectra of, infra-red, and structure, 18.
Proteus vulgaris, growth factors for, 194.
 Pyocyanine, 155.
 Pyrazine, and its derivatives, 188.
 .chemistry of, 95.
 synthesis of, 190.
 Pyrazine, 2 : 3-dicyano-, phthalocyanine-like compounds from, 194.
 Pyrazines, properties of, 192.
 Pyrazines, amino-, 195.
 hydroxy-, 196.
 Pyrazinecarboxylic acids, 193.
 antipellagra activity of, 194.
 decarboxylation of, 191.
 properties of, 194.
 Pyridine, formation of, from dihydropyran, 170.
 spectrum of, infra-red, 20.
 Pyrites, surface hardness of, in sodium chloride solution, 33.
 Pyrogallol, niobium and tantalum detn. with, 263.
 Pyrroles, formation of, from furans, 169.
 Pyrrolidine, formation of, from tetrahydrofuran, 170.
 Pyruvic acid, condensation of, with oxaloacetic acid, 203.
 metabolism of, 197.
 oxidation of, by bacteria, 198.
 in tissues, 200.
 to acetylcholine, 145.

- Pyruvic acid, bromo-, ethyl ester, condensation of, with ethyl β -ketosuberate, 159.
 Pyruvic oxidase, 198.
 in brain tissue, 201.

 Quartz, surface structure of, 22.
 Quinaldic acid, copper separation with, 257.
 Quinaldine, 8-hydroxy-, zinc detn. with, 262.
 Quinalizarin, boron detn. with, 260.
 Quinine tannate, germanium detn. with, 262.
 Quinols, oxidation of, to quinones, 152.
 Quinoline, reduction of, 102.
 Quinoline, 5 : 7-dibromo-8-hydroxy-, gallium separation with, 263.
 8-hydroxy-, copper detn. with, 256, 257.
 indium detn. with, 263.
 Quinolinicarboxylic acid, 8-hydroxy-, copper separation with, 257.
 Quinones, reaction of, with tetralin, 156.
 reduction of, 94.
 oxidation-reduction reactions of, 154.
 Quinonoid dyes, oxidation-reduction reactions of, 154.
 Quinosol, aluminium, copper, and zinc detn. with, 257, 262.

 Racemization during protein hydrolysis, 247.
 Radicals, free, inorganic, 87.
 Raman spectra. *See under Spectra.*
 Rays, infra-red, detection of, 6.
 Reactions, rearrangement, 77.
 Reagents, organic, in inorganic analysis, 255.
 Receivers, selective, 6, 10.
 Reductase, cytochrome c, 205.
 Reduction, catalytic, 99.
 Resins, ion exchange, 96.
 for separation of amino-acids, 249.
 phenolic, spectra of, infra-red, and structure, 18.
 Resonance structure of molecules, 111.
 Respiratory quotient, effect on, of adrenal steroids, 227.
 Rhodium, toluene-3 : 4-dithiol complex with, 261.
 Rhodamine-B, tungsten detn. with, 260.
 Rhodium halides, complexes of, with ethyl sulphide, 75.
 Riboflavin, 155.
 Riboflavin-5'-phosphate as co-enzyme of hydrogen transfer, 188.
 Ribonucleic acid, 240.
 detection of, 241.
 in cell nucleolus, 245.
 in cell nucleus, 245.
 Rocks, detection in, of vanadium, 264.
 Rubber, and its derivatives, spectra of, infra-red, and structure, 18.
 friction of, 29.
 natural and synthetic, infra-red analysis of mixtures of, 14.

 Rubber, oxidation of, 19.
 vulcanisation of, thiols as accelerators for, 154.
 Rubeanic acid, copper detn. with, 257.

 Salicylaldoxime, copper detn. in steel with, 257.
 Salicylic acid, iron detn. with, 258.
 Saliva, blood group substances in, 234.
 Sapphires, friction of, 29.
 Sarcoma, fowl, hyaluronic acid from, 236.
 Sarcoma virus, 243.
 Selenium, detn. of, reagent for, 262.
 Selenium dioxide, oxidation by, 156.
 Self-duplication of cytoplasmic particles, 243.
 Serine, detn. of, 251.
 Sex glands, effect of adrenalectomy on, 216.
 Silica gel, catalytic action of, in complex formation, 72.
 Silicates, systems of, containing water, 65.
 Silicon, polymers, spectra of, infra-red, and structure, 18.
 Silicon alloys as catalysts in preparation of phenylchlorosilanes, 77.
 Silicon alkyl and aryl halides, 76.
 carbide, crystal structure of, 52.
 tetrachloride, sulphur trioxide compound of, 81.
 chlorothiocyanates, 78.
 trichlorothiocyanato, disproportionation of, in heated tube, 77.
 isocyanatothiocyanates, 79.
 organic compounds, 76.
 monoxide, 87.
 oxyfluoride and oxyfluorochlorides, 79.
 monosulphide, 89.
 triisocyanatothiocyanate, 78.
 trimethoxythiocyanate, 78.
 Silicones as lubricants, 42, 43.
 Silver as catalyst in preparation of silicon organic halides, 76.
 Silver chloride, sheet, for windows of absorption cells, 10.
 nitrate, decomposition of, by friction under pressure, 43.
 Skin, hyaluronic acid from, 236.
 Soaps, crystal structure of, 62.
 films, lubrication with, and with metal films, 36.
 structure of, 32.
 metal, as lubricants, 35.
 Sodium, reduction with, in liquid ammonia, 102.
 Sodium arsenide and phosphide, 64.
 hyposulphite, friction of, 29.
 α - and β -naphthoxides, reduction of, 102.
 thiochromite, crystal structure of, 50.
 Solids, m. p. of, effect of pressure on, 44.
 surface structure of, 21.
 Solubility, amino-acid separation by, 248, 250.
 Solutions in non-aqueous solvents, 63.

- Solvents for ultra-violet absorption spectroscopy, 106.
non-aqueous, chemistry of solutions in, 63.
- Solway purple, boron detection with, 260.
- Sorbitol, separation of, from dulcitol, *d*-glucose, and *d*-mannitol, 99.
- Spectra, absorption, ultra-violet, and structure of organic compounds, 105.
interpretation of, 108.
molecular, measurement of, 5.
Raman, measurement of, 20.
- Spectrometers, double-beam, 7.
for gas analysis, 14.
prism, automatic, 7.
single-beam, 7.
- Spectrometry, absorption, ultra-violet, in analysis, 92.
- Spectroscopes, vacuum, 106.
- Spectroscopy, absorption, ultra-violet, technique of, 106.
infra-red, 5.
in analysis, 11.
in structure diagnosis, 16.
- Spreading or diffusing factor, identity of, with hyaluronidase, 238.
- Stearic acid, calcium phenyl ester, in lubricating oil, 41.
- Steel, copper slid on, 24.
detection in, of vanadium, 264.
detr. in. of boron, 260.
of cobalt, 261.
of copper, 257.
of tungsten, 261.
heat of adsorption of fatty acids and esters on, 34.
molten, silicon-oxygen equilibrium in, 88.
surface film on, 22.
- Steroids, adrenal cortex, isolation of, 219.
- Sterols, spectra of, absorption, ultra-violet, 121.
- Streptobacterium plantarium*, growth factors for, 194.
- Streptococci, haemolytic, hyaluronic acid from, 236.
- Streptococcus faecalis*, amino-acid assays with, 253.
- Stress resistance, effect of adrenal steroids on, 228.
in adrenalectomy, 216.
- Strontrium orthosilicate, crystal structure of, 52.
- Structure, diagnosis of, by infra-red spectroscopy, 16.
- Styrene, polymerisation of, 148.
infra-red spectroscopy of, 15.
- Sub-compounds, 87.
- Sucrose, 5-hydroxymethylfurfuraldehyde from, 157.
- Sucrose octaacetate, separation of, from β -maltose octa-acetate, 99.
- Sugar acetates, deacetylation of, 98.
purification of, 99.
- Sugar juice, purification of, by ion exchange resins, 96.
- Sulphapyrazine, effect of, on pneumococcal and streptococcal infections, 195, 196.
- Sulphides, crystal structure of, 50.
- Sulphide films as lubricants, 37.
- Sulphites, autoxidation of, 152.
- Sulphobenzoic acids, conversion of, to benzoic acid, 101.
- Sulphonamides, acetylation of, in liver, 199.
- Sulphosalicylic acid, iron detn. with, 258.
- Sulphur chlorides, hydrolysis of, 80.
compounds, oxidation of, 152.
organic compounds, film-forming properties of, 37.
monoxide, 89.
trioxide, crystal structure of, 51.
- Sulphuryl chloride, structure of, 66.
- Suporol, aluminium, copper, and zinc detn. with, 257.
zinc detn. with, 262.
- Surfaces, contour and structure of, 21, 22.
lubricated, 30.
sliding, friction of, 23.
- Surface-active materials, effect of, on strength of solids, 32.
- Survival, conditions of, in adrenalectomy, 217.
- Synovial fluid, hyaluronic acid from, 236.
- Tantalum, detn. of, reagents for, 263.
- Tar, coal, infra-red analysis of acids in, 14.
- Tartaric acid, recovery of, from natural wastes, 96.
- Temperature, transition, in lubricants, 34.
- Terpenes, infra-red analysis of, 14.
- Testis extracts, spreading or diffusing factor in, 238.
- Tetra - acetyl - *N* - glucosidonicotinamide bromide, 183.
- Tetra-deuterethylene, spectrum of, infra-red, 20.
- Tetrahydrofuran, 162, 169.
conversion of, into adipic acid or butadiene, 171.
into pyrrolidine, 170.
reaction of, with acyl halides, 173.
- Tetrahydrofuran, 3-bromo-, conversion of, into allylcarbinol, 174.
2-cyano-, catalytic dehydration of, 169.
2-hydroxy-, 162.
- Tetrahydrofurans, ring fission of, 171.
- Tetrahydrofurans, 3 : 4-diamino-, 94.
2-hydroxy-, 161.
- Tetrahydrofuran-2-carboxylic acid, conversion of, into $\alpha\delta$ -dibromo-*valeric acid*, 173.
- Tetrahydrofuroic acid, ethyl ester, reaction of, with acetyl chloride, 173.
methyl ester, catalytic dehydration of, 169.
- Tetrahydrofurfural, preparation of, 168.
- Tetrahydrofurfuryl alcohol, 163.
catalytic decomposition of, 169.
dehydrogenation of, 168.

- Tetrahydrofurfuryl alcohol, hydrogenolysis of, 174.
 reaction of, with acetyl chloride, 173.
 with ammonia over catalysts, 170.
 with hydrogen bromide, 172.
- Tetrahydrofurfuryl chloride, conversion of, into pent-4-en-1-ol, 174.
 halides, 163.
- Tetrahydrofurfurylamine, formation of, 167.
- N*-Tetrahydrofurfurylpiperidine, 171.
- Tetrahydrofuryl tetrahydrofurfuryl ether, 169.
- Tetraketones, preparation of, 174.
- Tetralin, autoxidation of, 137.
 oxidation of, to naphthalene, 153.
 reaction of, with quinones, 156.
- Tetramethylldiaminodiphenylmethane, lead detn. with, 256.
- 2 : 2 : 5 : 5-Tetramethyldihydrofuran, 162.
- Tetramethyl glucose, separation of, for end-group assay of polysaccharides, 99.
- 2 : 3 : 4 : 6-Tetramethyl glucose, separation of, from 2 : 3 : 6-trimethyl glucose, 98.
- 2 : 3 : 4 : 6-Tetramethyl *d*-1 : 2-glucoscen, conversion of, to 5-methoxymethyl-furfuraldehyde, 158.
- Tetramethyl methylglucosides, separation of, from trimethyl methylglucosides, 98.
- Tetramethylpyrazine, 189.
- Tetramethylthiuram disulphide as vulcanisation accelerator, 154.
- Tetraphenylpyrazine, 189, 191.
- Thallium halides, mixed melt of, for windows of absorption cells, 10.
 oxysulphide, sensitivity of, to infra-red rays, 10.
- Thermistors, 9.
- Thermocouples, 6.
- Thiobacillus thio-oxidans*, adenosine-3'-triphosphate from, 179.
- Thiobenzthiazole as vulcanisation accelerator, 154.
- Thiocyanates, iron detn. with, 258.
- Thiodiazoledithiol, bismuth detn. with, 259.
- Thio-ethers, oxidation of, 151.
- Thioglycollanilide, conversion of, into acetanilide, 100.
- Thioglycollic acid, conversion of, into acetic acid, 100.
- Thiols, dehydrogenation of methylene groups by, 154.
- Thiol radicals, formation of, by peroxide catalysts, 153.
- Thiophan, formation of, from 4-hydroxybutanethiol, 170.
- Thiophen, reduction of, 103.
 spectrum of, infra-red, 20.
- Thiophen, 2-bromo-, reduction of, 103.
- Thiophens, formation of, from furans, 169.
- Thiourea, osmium detn. with, 262.
- Thorium, detn. of, reagents for, 262.
- Threonine, detn. of, 251.
 from blood group A substance, 233.
- Thymus, effect of adrenal steroids on, 228.
 effect of adrenalectomy on, 217.
- Tin tetrahalides, sulphur dioxide solvates with, 81.
- Titanium, detection and detn. of, and its separation from aluminium, 263.
- Titanium tetrahalides, sulphur dioxide solvates with, 81.
 subsulphide, 89.
- Titan-yellow, magnesium detn. with, 264.
- Tobacco viruses, necrosis, crystal structure of, 62.
- Toilet preparations, detn. in, of lead, 256.
- Toluene, purification of, from methyl-thiophen, 100.
- Toluene - 3 : 4 - dithiol, molybdenum, rhenium, and tungsten detn. with, 261.
- Toluidines, substituted, infra-red analysis of, 14.
- o*-Toluidine, copper detn. with, 257.
- Totaquine, alkaloids from, 98.
- Triarylmethanes, peroxides, 137.
- Tribo-electricity in friction, 30.
- Trifurylarsines, 165.
- Trigonelline, hydrogenation of, by sodium hyposulphite, 182.
- Triketones, preparation of, 174.
- Trimethoxythiocyanic acid, silicon derivative, 78.
- Trimethylamine oxide, boron trifluoride adduct, 80.
- 2 : 3 : 6-Trimethyl glucose, separation of, from 2 : 3 : 4 : 6-tetramethyl glucose, 98.
- Trimethyl methyl-*l*-arabofuranoside, separation of, from trimethyl methyl-*d*-xylopyranoside, 98.
- Trimethyl methylglucosides, separation of, from tetramethyl methylglucosides, 98.
- Triphosphopyridine nucleotide, 180, 185.
- Tröger's base, resolution of, 98.
- Tripyridyl, cobalt detn. with, 261.
- aa'a''*-Tripyridyl, iron detn. with, 258.
- Tryptophan, detn. of, 252.
 from protein hydrolysis, 248.
- Tungsten, detn. of, reagents for, 260.
- Tungsten hexachloride, crystal structure of, 51.
 oxides, 85.
- Tyrosine, detn. of, 252.
- Umbilical cord, hyaluronic acid from, 236.
- Uranium, detn. of, cupferron test for, 262.
- Urine, assay of adrenal substances in, 218.
 detn. in, of androgens, 230.
 of lead, 256.
- human, blood group substances in, 234.
- Vaccinia virus, 243.
- Valency, 66.

- Valeric acid, δ -bromo- α -hydroxy-, 172.
 δ -chloro- α -hydroxy-, α -acetyl derivative,
 ethyl ester, 173.
- Valine, detn. of, 251.
- Vanadium, detection of, reagents for, 264.
- Vanadium *tri-* and *tetra-* chlorides, 79.
 oxides, 85.
 equilibrium of, with slag-forming
 oxides, 82.
- Vapours, films, effect of, on metallic
 friction, 32.
- Vinyl cyanide, polymerisation of, 148.
 cyanide and halides, spectra of, infra-
 red, 20.
- Vinylacetylene, spectrum of, absorption
 ultra-violet, 113.
- Vinylcarbinols, reduction of, 102.
- Viruses, constitution of, 243.
- Vitamins, detn. of, in natural products,
 105.
- Vitreous humor, hyaluronic acid from,
 236.
- Vulcanisation, infra-red spectroscopy of,
 19.
 thiols as accelerators for, 154.
- Water, detn. in, of magnesium, 264.
- Wear, abrasive and corrosive, in running
 engines, 39.
- Welding, cold, in lubricant films, 24.
- Wool fibres, friction of, 29.
- Wool proteins, hydrolysates, amino-acids
 from, 249.
- Woollen fabrics, felting of, 29.
- Wounds, healing of, accelerated by
 chromatin, 245.
- Wüstite, stability of, 81.
- p*-Xylene hydroperoxide, 137.
- Yeast, cophosphorylase from, 179.
 cytoplasm, enzymes in, 242.
 pentose polynucleotide of, 240.
- Zeolites as softeners, 96.
- Zinc, detn. of, and its separation from
 copper, 257.
 reagents for, 261.
- Zinc subiodide, 89.
- Zinc Dips. See Diisopropylsalicylic acid,
 zinc salt.
- Zirconium, detn. of, reagents for, 262.
- Zymogen granules in liver and pancreas,
 242.
