

INDEX OF SUBJECTS.

- Abietic acid, crystal structure of, 60.
Absorbents, zeolites as, 31.
Acetaladol, dehydration of, to croton-aldehyde, 146.
polymerisation of, 141, 143.
spectrum of, absorption, ultra-violet, 141.
Acetic acid, diffraction study of, 55.
gallium salt, 107.
glacial, reaction of, with acetyl peroxide, 190.
magnesium salt, as ashing agent, 284.
Acotic acid, trifluoro-, diffraction study of, 55.
Acetobacter suboxydans as test organism for *p*-aminobenzoic acid, 265.
Acetyl peroxide, reaction of, with glacial acetic acid, 190.
phosphate, detn. and properties of, 235.
Acetyldehydrophenylalanyldehydro-phenylalanine, azlactone, heating of, with pyridine, 133.
Acetyldehydrophenylalanylglycine, ethyl ester, heating of, *in vacuo*, 133.
Acetylene, addition of hydrogen fluoride to, 155.
addition reactions of, 155.
catalytic condensation of, with aldehydes and ketones, 168.
catalytic polymerisation of, 151.
Friedel-Crafts reaction with, 156.
sulphur dioxide polymers of, 157.
Acetylene, dichloro-, 160.
Acetylenes, halogenation of, substitution, 159.
oxidation of, 154.
preparation of, 148.
reactions of, 152.
Acetylenes, amino-, 158.
bromo-, chloro-, and iodo-, 159.
Acetylenic chlorohydrins, reactions of, 177.
compounds, 148.
s-Acetylenic glycols, 167.
as-Acetylenic glycols, preparation of, 168.
Acetylenylcarbinols, 165.
conversion of, into hydroxy-ketones, 172.
Meyer-Schuster rearrangement with, 169.
reactions of, 168.
tert-Acetylenylcarbinols, dehydration of, 152.
Acids, *a*-halogenated, amination of, 122.
cis- and *trans*-unsaturated, oxidation of, by permanganate, 9.
Aconine, structure of, 227.
Aconite alkaloids, 226.
Aconitum *talassicum*, alkaloid from, 226.
Acyl peroxides, 188.
decomposition of, 181.
Adenine, synthesis of, 211.
thiomethyl pentoside, 207.
Adeninedeoxyriboside, 202.
Adeninedeoxyribosidephosphoric acid, 201.
Adenine-9-d-glucoside, 210.
Adenosine, 201.
regeneration of, from its picrate, 203.
spectrum of, absorption, ultra-violet, 203.
structure of, 204.
Adenosine triphosphatase, 232.
Adenylic acid, coenzyme activity of, 232.
phosphorylation of, 236.
Adonitol, synthesis of, 178.
Adsorption, equilibrium of, in zeolites, 40.
Agglutination in monolayers, 15.
Air, detn. in, of fluorine, 287.
reactions at water interfaces with, 8.
Ajacine, 226.
 β -Alanine, 126.
Alanylalanine, preparation of, 129.
Albumin, egg-, structure of, 76.
serum-, surface pressure of, 11.
Aldehydes, aliphatic, condensation of, catalysed by alkoxides, 145.
condensation of, with acetylene, 168.
Aldols, 139.
aldehyde addition products with, 143.
monomeric, structure of, 140.
polymerisation of, 141.
spectra of, Raman, 141.
Aldol condensation, catalysis of, 139.
Aldolase, muscle, 234.
Alginic acid, structure of, 72.
Alkali metasilicates, formation of, 98.
Alkaloids, 218.
aconite, 226.
cinchona, 221.
Delphinium, 226.
ergot, 220.
indole, 219.
Senecio, 224.
Solanum, 227.
Veratrum, 227.
Alkoxy groups, detn. of, 287.
Allylacetylenes, 150.
Alstonia constricta, alkaloids from, 219.
Alstoniline, 219.
Alstonine, 219.
Alstyrine, 219.
Aluminates, 97.
Aluminium alloys, analysis of, 276.
Aluminium oxyfluoride, 97.
phosphides, 94.

- Amination of α -halogeno-acids, 122.
 Amino-acids, 120.
 acylation of, anhydride formation in, 131.
 analytical chemistry of, 126.
 chromatography of, 127.
 dehydration products of, 130.
 reaction of, with formaldehyde, 128.
 structure of, 63.
 summary of, 121.
 synthesis of, 121.
 α -Amino-acids, Waser test for, 131.
 β -Amino-acids, 126.
 Amino-compounds from acetylenes, 158.
 Ammonia, distillation of, microchemical, 287.
 Ammonium chloroiridate, crystal structure of, 54.
 iodate, crystal structure of, 54.
 pentachlorozincate, crystal structure of, 52.
 Amyl chloride, chlorination of, 188.
 Amylopectin, structure of, 73.
 Amylose, structure of, 73.
 Anaemia, hypochromic, from deprivation of vitamin-B₆, 254.
 macrocytic, from vitamin-B_c deficiency, 257.
 pyridoxine in relation to, 254.
 Analcite, active, 33.
 energy of occlusion and entropy for sorption in, 40.
 diffusion of ammonia and water in, 42.
 saturation of, by gases, 37.
 Analysis, combustion, 289, 290.
 organic microchemical, 287.
 apparatus for, 287.
 polarographic, 276, 282.
 Analytical chemistry, 272.
 Anethole hydrobromide, formation from, of hexestrol dimethyl ether, 198.
 Aneurin, assay of, 258.
 heat stability of, 259.
 Anionotropic rearrangements, 175.
 α -Anisidine as indicator for zinc, 277.
 Anthranilic acid as reagent for zinc, 273.
 Antimalarials, inhibition by, of oxygen uptake by parasites, 269.
 Antimony trifluoride, crystal structure of, 54.
dl-Arabitol, synthesis of, 178.
 Arecaidaldehyde, 219.
 Arecoline, synthesis of, 219.
 Arsenates, detn. of, in presence of selenates, 282.
 Arsenic, analytical chemistry of, 278.
 detn. of, by distillation, 280.
 by Gutzeit method, 278.
 by hypophosphite reduction, 279.
 colorimetrically, 280.
 in brewing materials, 278.
 in foods, 279, 283.
 in glass, 280.
 in lead, 281.
 in soils, 280.
 in sulphur, 282.
 Arsenic, detn. of, in urine, as colloidal suspension, 280.
 in wines, 278, 281.
 polarographically, 282.
 separation of, from copper, 282.
 Arsenic halides, crystal structure of, 49.
 Arsonicals, organic, analysis of, 279.
 Ashing in fluorine detn., 283.
 Atebrin, growth inhibition by, 267.
 Atisine, dehydrogenation of, 227.
 Azidocuprates, 99.
 Azlactones, formation of, 131.
 Bacteria, adaptation of, 18, 28.
 effect of chemotherapeutics on, 266.
 growth cycle of, 16, 18.
 growth of, effect of drugs on, 25.
 physical chemistry of, 15.
 viability of, effect of chemotherapeutics on, 268.
 Bactericides, 268, 269.
 effect of drug concentration on, 26.
Bacterium lactis aerogenes, growth of, 19, 21, 25.
 growth of, effect of sulphonamides on, 266.
 Balances, errors of, 287.
 surface, 11.
 Base-exchange, effect of, on sorption equilibrium, 40.
 Bettendorf's test, 282.
 Benzaldehyde, addition product of *iso*-butyraldehyde and, 144.
 condensation of, with glycine, 132.
 Benzeneazotriphenylmethane, effect of, on styrene polymerisation, 194.
 Benzenediazonium chloride, thermal decomposition of, 184.
 hydroxide, *p*-bromo-, as catalyst in styrene polymerisation, 195.
 Bonzoic acid, *p*-amino-, assay of, 265.
 Benzoyl peroxide, reaction of, with tri-phenylmethyl, 188.
 use of, to initiate reactions involving free radicals, 186.
 Biaryls, formation of, 196.
 preparation of, 183.
 Bile acids, degradation of, by means of *N*-bromosuccinimide, 191.
meso-*omega*'-Bimethionine, 122.
 Biotin, structure of, and its assay, 263.
 synthesis of, by intestinal bacteria, 256.
 α -Biotin, degradation and structure of, 215.
 β -Biotin, structure and synthesis of, 217.
dl-*alpha*Biotin, 218.
dl-*epiallo*Biotin, 218.
 Biotin sulphone, effect of, on bacteria, 267.
 Biuret base, 130.
 Blood, detn. in, of fluorine, 283.
 of zinc, 275.
 Bomb, Parr micro-, 288.
 Boron trichloride, phosphoryl chloride compound of, 91.

- Boron trifluoride, hexamethylenetetramine compound of, 91.
dihydrate, 91.
- Brass, analysis of, 277.
- Brass plate, detn. in, of zinc, 276.
- Brassidic acid, oxidation of, 9.
- Bread, detn. in, of aneurin, 259.
- Brewing materials, detn. in, of aneurin, 259.
of arsenic, 278.
of riboflavin, 260.
- Bromination, 186.
- Bromine, detn. of, in biological fluids, 288.
- Butadienes, 2-amino-, 158.
- 1-Butyne, conversion of, into butadiene, 153.
- iso*Butyraldehyde, addition product of benzaldehyde and, 144.
aldolisation of, 144.
- n*- and *iso*-Butyryl peroxides, decomposition of, in carbon tetrachloride, 189.
- Cadmates, 97.
- Cadmium, separation of, from zinc, 272.
- Cadmium hydroxyhalides, 95.
iodide, crystal structure of, 54.
- Calcium aluminate, decomposition of, by steam, 98.
- Cameras, fibre, 62.
- apo*Camphyl radical, 189.
- apo*Camphane-1-carboxylic acid, peroxide, reaction of, with carbon tetrachloride, 189.
- Cannabinol, constitution and synthesis of, 182.
- Carbohydrates, structure of, 70.
- Carbon, detn. of, in organic compounds, 290.
fibrous, structure of, 61, 63.
isotopes, separation of, 87.
- Carbon tetrachloride, action of peroxides on, 189.
dioxide, equilibrium sorption of, in chabazite, 40.
- Carbon soot, electron microscopy of, 85.
- Carbonyl chloride, photolysis of, in cyclohexane, 188.
- Carboxyl group, structure of, 55.
- Carboxylation, 186.
- L*- β -Carboxy- γ -methylbutanesulphonic acid, 216.
- Casein, iodinated, thyroxine formation from, 243.
- Catalysts, boron trifluoride-mercuric oxide, 173, 174, 175.
for polymerisation, 192.
- Cells, division and morphology of, 24.
- Cellulose, cuprammonium complex of, 72.
ethers, detn. in, of alkoxyl groups, 288.
fibres, crystalline-amorphous ratio of, 71.
- fibrils, bacterial and chemical degradation of, 86.
structure of, 70, 73.
- Cereals, detn. in, of nicotinic acid, 261.
of riboflavin, 260.
- Cerin, structure of, 12.
- Covine, structure of, 228.
- Chabazite, 33.
adsorption by, effect of dehydration on, 43.
energy of occlusion and entropy for sorption in, 40.
equilibrium sorption of carbon dioxide in, 40.
isobars, isosteres, and isotherms in, 35.
saturation of, by gases, 37.
- Charcoal, van der Waals adsorption on, 39.
- Chemotherapeutics, action of, 266.
- Chlorination, 186.
- α -Chloro-ethers, addition of, to vinyl-acetylenes, 163.
- Cholino, formation of, in the body, 251.
- Chromammines, 100.
- Chrysotile, structure of, 63.
- Chrysotile asbestos, fibre structure of, 61, 63.
- Cinchona alkaloids, 221.
- Cinchonidine, structure of, 224.
- Cinchonine, structure of, 224.
- Clostridium acetobutylicum*, as test organism for ρ -aminobenzoic acid, 266.
- Coal, analysis of, 289.
detn. in, of fluorine, 284.
electron microscopy of, 85.
structure of, 63.
- Cobalt, tervalent, cyanato-complexes of, 101.
- Cobaltous chloride, effect of, in Grignard reactions, 196, 197, 198, 199, 200.
- Cocaine, production of, *l*-hygroline from liquors in, 218.
- Cocarboxylase, heat stability of, 259.
- Codeine, crystal structure of, 60.
- Colemanite, crystal structure of, 54.
- Collagen, structure of, 74, 80.
- Compounds, complex, 98.
- Condelphine, 226.
- Copper, separation of, from arsenic, 282.
- Copper phosphides, 94.
- Coronene, crystal structure of, 59.
- Corynebacterium diphtheriae*, training of, for pantothenate synthesis, 270.
- Cotton, X-ray fibre diagnosis of, 70.
- Counters, G-M, 62.
- Creatine, phosphorylation of, 236.
- p*-Cresol, oxidation of, by potassium ferricyanide, 244.
- Croton tiglium*, crotonoside from, 207.
- Crotonaldehyde, and its derivatives, 146.
dimeric, 146, 147.
trimeric, 148.
- Crotonoside, 207.
- Crystals, ionic, van der Waals adsorption on, 39.
X-ray analysis of, 47.
- Crystallography, 46.
- Culture media for *Lactobacillus casei*- ϵ , 266.

- Cupric azide, complexes from, 98.
chromate, basic, ammine of, 96.
Cuprous thiosulphates, complex, 99.
Cyclotomic points, 48.
Cytidine, 201.
structure of, 204.
Cytidylic acid, 201, 202.
Cytosinedeoxyribosidephosphoric acid, 201.
- 1-Decanesulphonic acid, sodium salt, crystal structure of, 57.
Dehydrating agents, 152.
Dehydrohalogenation by sodamide, 149.
Dehydropeptides, formation of, 133.
Delatine, 226.
Delphamine, 226.
Delpheline, 226.
Delphinine, structure of, 226.
Delphinium, alkaloids of, 226.
Delphinium ajacis, alkaloid from, 226.
Delphinium confusum, alkaloids from, 226.
Delphinium elatum, alkaloids from, 226.
Delphinium staphisagria, alkaloids from, 226.
Delphonine, structure of, 227.
Deoxyretonecine, 224.
Deoxyribonucleic acids, 201.
Dethiobiotin, effect of, on bacteria, 267.
Dethiocallibiotin, 218.
Dextran, structure of, 70.
Diacytylenes, 150.
Diacylenic carbinols, preparation of, 168.
Diacylenic glycols, preparation of, 168.
Dialdan, 146.
Di-p-anisylformazylformic acid, ethyl ester, 138.
Diazocompounds, 182.
as vulcanising agents, 194.
1 : 2 : 5 : 6-Dibenzfluorenone, synthesis of, 182.
3 : 5-Diethoxy-1 : 6-dihydrophthalic anhydride, 138.
Diethylacetic acid, α -amino-, 122.
Diethylidithiocarbamic acid, sodium salt, as reagent for zinc, 275.
Dihydroxyfluoboric acid, 91.
 α -Diketones from acetylenes, 154.
2 : 4-Dimethyl aldötetrose, 140.
Dimethylboron fluoride, reaction of, with trimethylamine, 90.
2 : 4-Dimethyl-1 : 3-dioxan, 6-hydroxy-, 143.
5 : 5-Dimethyl-2 : 4-diisopropyl-1 : 3-dioxan, 6-hydroxy-, 144.
Dimethylethylnylcarbinol, chlorination of, 172.
reaction of, using boron trifluoride-mercuric oxide catalyst, 173, 174.
Dimethylgallium, 104.
Dimethylvinylethylnylcarbinol, condensation of, with phenols, 179.
Di- β -naphthylthiocarbazone, as reagent for zinc, 276.
- Diphenyl, 196.
crystal structure of, 58.
Diphenylbenzenes, crystal structure of, 58.
Diphenylene, crystal structure of, 58.
Diphenylketen, reaction of, with aryl-acetylenes, 157.
Diphenylthiocarbamide. See Dithizone.
NN-Di-n-propyldithiocarbamic acid, copper salt, crystal structure of, 60.
Distillation, fluorine detn. by, 284.
Dithizone, as reagent for zinc, 274.
Divinylacetylene, polymerisation of, 164.
s- and α -Divinylacetylenes, 151.
1-Dodecanesulphonic acid, sodium salt, crystal structure of, 57.
1-Dodecyne, 153.
Drosophila, eyes, hormone forming brown pigment of, 239.
Drugs, bactericidal action of, in relation to structure, 27.
effect of, on bacterial growth, 25.
dl-Dulcitol, synthesis of, 178.
*allo*Dulcitol, synthesis of, 178.
- Electrodeposition in zinc analysis, 277.
Electrolysis, 184.
Electron microscope, 81.
Electron microscopy, 81.
Emulsions, 13.
Enolase, 234.
Ergocornine, 220.
Ergocristine, 220.
Ergocryptine, 220.
Ergot alkaloids, 220.
Ergotoxine, constituents of, 220.
Erucic acid, oxidation of, 9.
Escherichia coli, effect of chemotherapeutics on, 267.
Esters, detn. of, 289.
hydrolysis of, 9.
4-Ethoxy-1-p-anisylpyridaz-6-one, 139.
2-Ethoxybutadiene, 163.
p-Ethoxychrysoidine as indicator for zinc, 277.
Ethoxyl groups, detn. of, 288.
Ethoxytrimethylsilane, 92.
Ethyl bromide, reaction of, with ethyl-magnesium bromide, 195.
Ethylene, crystal structure of, 55.
Ethylenebisdiguanide, copper and silver complexes of, 99, 100.
Ethylgermanium trichloride, 114.
Ethylmagnesium bromide, reaction of, with ethyl bromide, 195.
Ethyoctadecylmalonic acid, β -hydroxy-, lactonisation of, 10.
Ethynylbutadiene, polymerisation of, 164.
Ethynylcarbinols, 166.
reaction of, with halogen acids, 170.
Ethynylcyclohexane, isomerisation of, 153.
1-Ethynylcyclohexanol, 171.
Ethynyl- Δ^1 -cyclohexene, isomerisation of, 153.
1-Ethynylcyclohexene, 171.

- F₂, detn. of, in urine, 253.
in urine, 252.
- Fats, detn. in, of Kirschner, Polensko, and Reichert values, 289.
- γ -Ferric hydroxide, electron microscopy of, 85.
- Ferric oxides, effect of added oxides on, 93.
- Ferritin, crystal structure of, 60.
- apo*Ferritin, crystal structure of, 60.
- "Feron" reagent, 286.
- Fibres, natural and synthetic, structure of, 60.
- Fibrin, structure of, 79.
- Fibroin, structure of, 78.
- Fibrous state, 61.
- Films, insoluble, at oil-water interfaces, 10.
interfacial, mechanical properties of, 11.
monolayer, condensed, expanded, and gaseous, 5.
evaporation through, 8.
reactions in, 8.
spreading and phase changes of, 7.
structure of, 5.
- Flour, detn. in, of aneurin, 259.
- Fluorine, detection of, tests for, 287.
detn. of, 283.
by distillation, 284.
by titration, 284.
in air, 287.
in blood, 283.
in coal, 284.
in foods, 286.
in insecticides, 286.
in organic compounds, 286.
in rocks, 286.
in water, colorimetrically, 285.
in wood, 283.
in wool, 283.
- Folic acid, assay of, 266.
from spinach, 255.
synthesis of, by intestinal bacteria, 256.
- Foods, detn. in, of arsenic, 279, 283.
of fluorine, 286.
of zinc, 272.
with dithizone, 274.
- Formaldehyde, reaction of, with amino-acids, 128.
- Formic acid, diffraction study of, 55.
gallium salt, 107.
- Formyl groups, detn. of, 289.
- Friedelin, structure of, 12.
- Fructose 6-phosphate, phosphorylation of, 234.
- Gallium, 102.
Gallium alloys, 107.
Gallium alizarate, 107.
arsenate, 106.
borohydride, 105.
bromate, 105.
bromides, 104.
chlorate hydrate, 105.
chlorides, 103.
as catalysts, 107.
compounds, 102.
- Gallium fluorides, 104.
hydrides, 105.
iodate hydrate, 105.
iodides, 104.
nitrides, 106.
perchlorate, 105.
phosphate, 106.
sulphates, 106.
- Gases, analysis of bubbles of, 289.
- Gelatin, structure of, 80.
water in, 77.
- Gelsemine, 219.
- iso*Gelsemine, 219.
- Gelsemium sempervirens*, alkaloids from, 219.
- Germanates, 109.
- Germanic acid, 112.
- Germanioxalic acid, 112.
- Germanite, extraction of germanium from, 108.
- Germanium, 108.
detection of, 111.
detn. of, 108, 112.
- Germanium alloys, 111.
for castings, 115.
- Germanium chlorobromide, 89.
hydroxide, 110.
organic compounds, 114, 115.
monoxide, preparation of, 110.
oxides, 109.
phosphide, 111.
salts, complex, 113.
selenides, 111.
- Germanoacetic acid, 114.
- Germanoformic acid, 110.
- Germanotartrates, 112.
- Germine, structure of, 228.
- Gismondite, 33.
- Glass, addition of germanic oxide to, 115.
analysis of gas bubbles in, 289.
detn. in, of arsenic, 280.
van der Waals adsorption on, 39.
- Gliadin, surface pressure of, 11.
- Glucose, phosphorylation of, 231.
Glucose 6-phosphate, phosphorylation of, 236.
- 3-Glucosidocytosine, 209.
3-Glucosidouracil, 209.
- Glycine, condensation of, with benz-aldehyde, 132.
ethyl ester, self-condensation of, 130.
- Glycogen, synthesis of, from glucose, 234.
- Glycol esters, from aldehyde condensations, 145.
- 4-Glycosidaminopyrimidine derivatives, preparation of, 212.
- Gmelinite, 33.
- Goitrogens, 246.
- Gomberg reaction, 182.
- Gramicidin, analysis of hydrolysates of, 127.
- Gramine methiodide, 123.
- Graphite, van der Waals adsorption on, 39.
- Graves' disease, iodine collection by thyroid in, 241.

- Grignard reactions, free radicals in, 195.
 Grignard reagents, acetylenic, 165, 166.
 alkylation with, 149.
 aromatic, electrolysis of, 185.
 Growth cycle, 16, 18.
 inhibitors, effect of, on bacterial growth, 23.
 substances, for bacteria, 18.
 Guaninedeoxyribosidephosphoric acid, 201.
 Guanine glucoside, 210.
 Guanosine, 201.
 spectrum of, absorption, ultra-violet, 203.
 structure of, 204.
 Guanylic acid, 201.
 Gümbelite, structure of, 63.
 β -Guttapercha, structure of, 67.
 Gutzeit method, 278.
- Hæmolysis in monolayers, 15.
 Halides, non-metallic, 88.
 Halogens, detn. of, in organic compounds, 287, 288.
 Halogen acids, addition of, to acetylenes, 155.
 Halogenation, 186.
 Harman, 220.
 Harmotome, 33.
 dl -Heliotridan, synthesis of, 225.
iso-Heliotrideno, 224.
 Heptyne, cyano-, addition of methyl alcohol to, 161.
 Heptynyl radical, migratory ability of, 178.
 Heteratidine, and its benzoyl derivative, 226.
 Heterocyclic compounds, 215.
 Heterolysis, 181.
 Heulandite, diffusion of ammonia and water in, 42.
 1-Hexadecanesulphonic acid, sodium salt, crystal structure of, 57.
p-Hexadecylphenol, halogenation of, in monolayers, 10.
 Hexaenyne glycol, 177.
 1 : 1 : 3 : 3 : 5 : 5-Hexaethoxycyclohexane, 136.
 Hexamethyldisilamine, 91.
 Hexamethyldisiloxane, 92.
 Hexamethylenetetramine, boron trifluoride compound of, 90.
 cyclo-Hexene, chlorination of, 191.
 Δ^2 -cycloHexenyl chloride, 191.
 Hexokinase, 234.
 4-cycloHexyl-1-pentyne, isomerisation of, 153.
 1-Hexyne, halogenation of, 155.
 oxidation of, to valeric acid, 154.
 Homolysis, 181.
 Homolytic reactions, 181.
 dl -Homomeroquinone, 222.
 Homometric points, 48.
 Hormones, 240.
 Hydracraldehyde, dimeric, structure of, 142.
- Hydrocarbons, acetylenic, 148.
 occlusion of, in zeolites, 36.
 n-paraffin, sorption heat of, in chabazite, 40.
 separation of, by molecular sieve method, 45.
 Hydrogen, detn. of, in organic compounds, 290.
 Hydrogen fluoride, anhydrous, sampling of, 287.
 Hydroxy-acids, lactonisation of, 9.
 Hydroxyl groups, detn. of, 288.
 dl -Hygrine, 219.
l-Hygroline, 218.
 Hyperthyroidism, treatment of, 247.
 Hypoxanthinedeoxyriboside, 202.
- Indone, polymerisation of, 193.
 Indium chromate, 97.
 Indole alkaloids, 219.
 Inorganic chemistry, 87.
 Inosine, 201.
 spectrum of, absorption, ultra-violet, 203.
 Inosinephosphoric acid, 201.
 Insecticides, detn. in, of fluorine, 286.
 Intestines, fat absorption in, 15.
 Iodine, isotopes, radioactive, use of, in thyroid study, 240.
 Isomerisation of acetylenes, 152.
 Isotopes, separation and use of, 87.
- Jervine, structure of, 228.
 Jute, X-ray fibre diagnosis of, 70.
- Kephalin, surface pressure of, 11.
 Keratin, structure of, 79.
 wool, water in, 77.
 α - and β -Keratins, structure of, 74.
 Keten acetals, 134.
 reactivity of, 136.
 diisopropylacetal, 135.
 diisobutyl acetal, 134.
 diethylacetal, 1 : 2-addition products of, 137.
 polymerisation of, 136.
 preparation of, and its bromo- and chloro-derivatives, 134.
 dimethylacetal, heat stability of, 135.
 n-propylacetal, 134.
 Ketones, $\alpha\beta$ -acetylenic, 154.
 condensation of, with acetylene, 168.
 with vinylacetylene, 167.
 Kynurenic acid, 237.
 Kynurenine, 238.
- Lactobacillus arabinosus*, for nicotinic acid assay, 261.
 test organism for pantothenic acid, 265.
Lactobacillus casei-e as test organism for biotin and pantothenic acid, 264.
Lactobacillus casei-e as test organism in riboflavin assay, 260.
 eluate factor needed by, 255.
Lactobacillus helveticus. See *Lactobacillus casei-e*.
 Lactones, hydrolysis of, 9.

- Lanthanum nitrite, basic, 97.
 Lauric acid, sodium salt, structure of, 64.
 Lead, bivalent, co-ordination number of, 100.
 commercial, analysis of, 275.
 detn. in, of arsenic, 281.
 Lead monoxide, orthorhombic, crystal structure of, 54.
 Lecithin, surface pressure of, 11.
 Levynite, 33.
 Lignin, structure of, 73.
 Lithium azidocuprate, 99.
 Liver, autolysis of, biotin from, 263.
 crystalline growth factor from, 257.
 Lupane derivatives, structure of, 12.
 d-Lysergic acid, conversion of, into 6 : 8-dimethylergoline, 221.
 isoLysergic acid, structure of, 221.
 d- and l-n. and iso-Lysergic azides, 220.
 Lysolecithin, surface pressure of, 11.
 l-Lyxobenzimidazole, 207.
 Magnesium alloys, analysis of, 276, 277.
 detn. in, of zinc, 277.
 Magnesium carbide, crystal structure of, 54.
 hydroxide, particle shape and size in, 85.
 nitrate, basic, 96.
 Magnitudes of small objects compared with wave-lengths of electrons, light, and X-rays, 82.
 Malaria, use of oil films in measures against, 7.
 Mannitodigermanic acid, 113.
 Mannitogermanic acid, 113.
 Matter, structure of, by electron microscopy, 81.
 Meals, R.A.F., riboflavin content of, 281.
 Mercuric oxycyanide, use of, in micro-volumetric analysis, 289.
 salts, reaction of, with vinylacetylenyl-carbinols, 179.
 Metals, electron microscopy of, 85.
 Metallic halides, effect of, on Grignard reactions, 198.
 oxides, 92.
 Metantimonites, crystal structure of, 54.
 Methacrylic acid, methyl ester, polymerisation of, benzoyl peroxides as catalysts for, 193.
 Methionine, synthesis of, 122.
 Methoxyacetraldehyde, aldolisation of, 140.
 p-Methoxycinnamylideneglycine, derivatives, preparation of, 132.
 Methoxyl groups, detn. of, 288.
 Methoxytrimethylsilane, 92.
 Methyl alcohol, heat of adsorption of, in chabazite, 41.
 β -Methylacetaldol, preparation and properties of, 139.
 Methylboron difluoride, reaction of, with trimethylamine, 90.
 1-Methylcyclobutene, structure of, 57.
 2-Methyldec-3-en-5-one, reduction of, by alcoholic sodium, 140.
 Methylenecyclobutane, structure of, 57.
 Methylgermanium trichloride, 114.
 Methylketen diethylacetal, 135.
 Methylmagnesium bromide, reaction of, with acid halides, 199.
 with cyclohexyl chloride and cobaltous chloride, 197.
 iodide, electrolysis of, in n-butyl ether, 184.
 reactions of, with acid halides, 199.
 β -Methylmorphimethine, crystal structure of, 60.
 Microbiology, electron microscopy applied to, 85.
 Microscopes, electron, 81.
 X-ray, 82.
 Microscopy, electron, 81.
 Monocrotalic acid, structure of, 225.
 Monocrotaline, 225.
 Monolayers. See Films, monolayer.
 Mordenite, 33.
 Muscle, contraction of, energy for, from hydrolysis of adenosine triphosphate, 232.
 Muscle-adenylic acid, 205.
 Myokinase, 233.
 Myosin, nature and activity of, 233.
 structure of, 79.
 Myxoedema, iodine collection by thyroid in, 241.
 Natrolite, ammoniate of, 38.
 Natrophilite, crystal structure of, 54.
 Neophyl radical, reaction of, with phenyl-magnesium bromide, 200.
 Neurospora, mutants, requiring tryptophan, 240.
 use of, in vitamin- β group assays, 263.
 Neurospora crassa as test organism for p-aminobenzoic acid, 265.
 Nickel nitride, 94.
 Nickelocyanides, 101.
 Nicotinamide, effects of, in diet, 253.
 from asparagine, 130.
 Nicotinic acid, assay of, 261.
 excretion of, 252.
 Nitro-compounds, aromatic, methylation of, with lead tetra-acetate, 190.
 Nitro-groups, inhibition of polymerisation by, 193.
 Nitrogen isotopes, separation of, 87.
 Nitrogen halides, crystal structure of, 49.
 N-Nitrosoacylarylamine reaction, 182.
 N-Nitrosoacylarylamines, as catalysts for polymerisation, 195.
 Nucleic acids, chemistry of, 200.
 Nucleosides, 200.
 preparation of, 202.
 structure of, 203.
 synthesis of, 208.
 Nucleotides, 200.
 phosphoryl residue in, 206.
 preparation of, 202.
 synthesis of, 208.
 Nutrition, 252.

- Nylon, structure of, 69.
- 1-Octadecanesulphonic acid, sodium salt, crystal structure of, 57.
- 1-Octanesulphonic acid, sodium salt, crystal structure of, 57.
- Octatrienal, isomerisation of acetylenic glycol from, 176.
- Octopin, synthesis of, 129.
- Oestrogens, bactericidal action of, 288.
- Oils, drying, polymerisation of, in monolayers, 9.
- Oleanic acid, structure of, 12.
- Oleic acid, films, spreading of, 8.
- Organic analysis, microchemical, 287.
- Organic compounds, complex, molecular structure of, 12.
- Orpiment, crystal structure of, 53.
- Ortho-salts, formation of, 94.
- Oxalic acid, gallium salt, 107.
- dihydrate, diffraction study of, 55.
- silver salt, crystal structure of, 52.
- Oxalyl chloride, photolysis of, in cyclohexane, 188.
- Oxygen isotopes, separation of, 87.
- Ozonolysis, 154.
- Paints, detn. in, of zinc, 276.
- Palmitic acid, sodium salt, equilibrium of, with water, 64.
- Pantothenates, metabolism of, inhibited by pantoyltaurine, 270.
- Pantothenic acid, assay of, 264.
- Pantoyltaurine, effect of, on growth of *Streptococcus haemolyticus*, 266.
- respiratory inhibition by, 269.
- n-Paraffins, fibre structure of, 65.
- Paradol, condensation of, in presence of hydrogen cyanide, 145.
- structure of, 142.
- Pectin, structure of, 73.
- Penicillin, effect of, on viability of bacteria, 268.
- Peptides, 133.
- chromatography of, 127.
- dehydration products of, 130.
- formation of, from azlactones, 133.
- synthesis of, from α -keto-acids, 129.
- Phalloidin, α -hydroxytryptophan in, 238.
- Phenol, antihelmintic and antibacterial action of, mixed with soap, 15.
- bacterial action of, 268.
- Phenols, antibacterial action of, 27.
- halogenation of, in monolayers, 10.
- dL*-Phenylacetic acid, α -amino-, 122.
- Phenylalanine, synthesis of, 124.
- 1-Phenyl-1-butyne, 153.
- 4-Phenyl-5 : 5-dimethyl-2-isopropyl-1 : 3-dioxan, 6-hydroxy-, 144.
- β -Phenylethyl radical in ethereal solution, 199.
- Phenylethylisopropylgermanium bromide, 115.
- Phenylethylyn radical, migratory ability of, 178.
- Phenylgermanium trichloride, 114.
- Phenylmagnesium bromide, reaction of, with alkyl halides, with and without cobaltous chloride, 196.
- α -Phenylpropionic acid, α -amino-, 122.
- β -Phenylpropionic acid, β -amino-, preparation of, 126.
- Phloroglucinol dihydrate, crystal structure of, 60.
- Phosphates, precipitation of, 95.
- Phosphate bond energy, 230.
- Phosphate rock, detn. in, of fluorine, 284.
- Phospherase, Neuberg ester, 234.
- Phospherases, 233.
- Phosphides, metallic, 94.
- Phosphoglucomutase, purification of, 234.
- 3-Phosphoglyceraldehyde, phosphate addition to, 234.
- Phosphokinases, 233.
- Phosphoric acid, titration of, with calcium hydroxide, 96.
- Phosphoryl chloride, boron trichloride compound of, 91.
- halides, crystal structure of, 51.
- Phosphorylase, preparation of, 231.
- Phosphorylation, mechanism of, 230.
- oxidative, 234.
- Photometers, fibre applications of, 62.
- Phthalooyanines, 183.
- X-ray structure of, 49.
- Phthioic acid, structure of, 13.
- Phytomonic acid, crystal structure of, 60.
- Pimanthrene, 226.
- Pimelic acid, α -amino-, 124.
- Plant ash, detn. in, of zinc, 276.
- Polarography in arsenic detn., 282.
- in zinc detn., 276.
- Polyamides, structure of, 68.
- Polyisobutylene, structure of, 68.
- Polychloroprene, structure of, 67.
- Polyesters, structure of, 68.
- Polyethers, structure of, 68.
- Polyethylene oxide, structure of, 68.
- Polymerides, catalysts in, 192.
- electron microscopy of, 86.
- high, melting of, 66.
- linear, structure of films of, 14.
- rate of expansion of, 67.
- Polymerisation, addition, 192.
- inhibition of, by nitro-compounds, 193.
- in monolayers, 9.
- Polyoxymethylene, electron microscopy of, 86.
- Polyoxymethylenes, structure of, 68.
- Polysulphones from acetylenes, 156.
- Porcupine quill, structure of, 79.
- Potassium azidocuprate, 99.
- palladocyanides, 102.
- silver carbonate, crystal structure of, 52.
- Potential, surface, 5.
- Powders, grain shape and size detn. in, 85.
- Pregneninolone, 168.
- Pressure, surface, 5.
- Proflavine, bacteriostatic effect of, 26.
- Propamidine, bactericidal action of, 269.
- Propargyl alcohol, alkali fission of, 169.

- Propenylmethyliccarbinol, isomerisation of, 175, 176.
 Propiophenones, amino-, 158.
n- and *iso*-Propylketen diethylacetals, 135.
n- and *iso*-Propylmagnesium bromides, electrolysis of, 185.
 Proteins, distribution and occurrence of amino-acids in, 75.
 effect of ultra-violet light on monolayers of, 10.
 structure of, 74.
 and their monolayers, 14.
 water in, 77.
 wool-like fibres of, 75.
Proteus morganii, test organism for pantothenic acid, 265.
 Protoverine, structure of, 228.
 Purine nucleosides, 209, 211.
 Pyknometer, micro-, 287.
 Pyridine, rhodium halide complexes with, 101.
 Pyridoxal, 263.
 Pyridoxamine, 263.
 Pyridoxine, assay of, 262.
 relation of, to anaemia, 254.
 μ -Pyridoxine, 262.
 Pyridylquinolines, 183.
 Pyrimidine, 5-amino-, preparation of derivatives of, 213.
 4 : 5-diamino-, cyclisation of derivatives of, 212.
 4 : 6-diamino-, preparation of, 213.
 Pyritiamine, effect of, on bacteria, 267.
 Pyrophyllite, reactions of, 97.
 Pyruvates, formation of, phosphorylation before, 234.
 metabolism of, phosphorylation during, 235.
 Quaterphenyl, 196.
 Quillaja acid, structure of, 12.
 Quinaldines, formation of, from acetylene, 158.
 Quinaldinic acid, as reagent for zinc, 273.
 Quinaldinic acid, 5-nitro-, as reagent for zinc, 274.
 Quinidine, structure of, 224.
 Quinino, structure of, 224.
 synthesis of, 222.
 Quinoline, 8-hydroxy-, as reagent for zinc, 274.
 Quinones, alkylation of, with acyl peroxides, 191.
 d -Quinotoxine, synthesis of, 221.
 Radicals, free, dimerisation of, 197.
 formation of, in electrolysis, 184.
 from decomposition of acyl peroxides, 181.
Rauwolfia canescens, alkaloid from, 220.
 Rauwolscine, 220.
 Reactions, electrolytic, 184.
 homolytic, 181.
 Realgar, crystal structure of, 54.
 Reflectors, use of germanium in, 115.
 Retronecanone, synthesis of, 225.
 Retronecine, structure of, 224.
 Resins, synthetic, organo-silicon compounds in relation to, 91.
 Rhenium compounds, complex, 100.
Rhizobium trifolii as test organism for biotin, 264.
 Rhodium, bivalent, complexes of, 101.
 Rhodium oxides, 93.
 9-Ribitylisalloxazine, 6 : 7-dichloro-, effect of, on bacteria, 267.
 Riboflavin, assay of, 259.
 bacterial degradation of, 270.
 Ribonucleic acids, hydrolysis of, 201.
 9-d-Ribopyranosidoadenine, 211.
 structure of, 214.
 Rice, polished, concentrates, growth factor from, 265.
 Rocks, detn. in, of fluorine, 286.
 Rosmarineine, structure of, 225.
 Rosmarinine, 225.
 Rubber, action of benzoyl peroxide on, 194.
 hydrochloride, structure of, 67.
 structure of, 66, 67.
 vulcanising agents for, 194.
 Rubber-like materials, structure of, 65.
 Rubidium azidocuprate, 99.
n- and *iso*-Rubijervines, structure of, 228.
*allo*Rubijervine, 228.
*epiallo*Rubijervine, 228.
 Rubijervone, 228.
 Rubrenes, formation and structure of, 168.
 Salicylaldehyde, azlactone, hydrolysis of, 132.
 Salicylaldoxime as reagent for zinc, 274.
 Salts, basic, 95.
 Senecio, alkaloids from, 224.
 Selenates, detn. of, in presence of arsenates, 282.
 Silicates, 97.
 Silicofluoroform, 89.
 Silicon chloroisocyanates, 88.
 isocyanates, 89.
 halides, crystal structure of, 51.
 hydrides, fluorinated, 89.
 methoxyisocyanates, 89.
 organic compounds, 91.
 Silk fibroin, structure of, 74.
 Siloxene, 34.
 Silver bromide grains in photographic emulsions, 85.
 carbonate, crystal structure of, 52.
 Silyl fluoride, 89.
 Silylene fluoride, 89.
 Smokes, grain shape and size detn. in, 85.
 Soaps, antihelmintic and antibacterial action of, mixed with phenol, 15.
 structure of, 64.
 Sodamide, preparation of, 149.
 Sodium cetyl sulphate, surface pressure of, 11.
 iodate, crystal structure of, 54.
 nitrite, crystal structure of, 54.
 oxide, compounds of, with cobalt, copper, nickel, and zinc oxides, 94.

- Soils, ashing of, 284.
detn. in, of arsenic, 280.
of zinc, 276.
alloSolanidane, 227.
Solanidanols, 227.
Solanidine, structure of, 227, 228.
Solanum, alkaloids of, 227.
Solasodine, structure of, 228.
SoluteS, kinetics of, in zeolites, 41.
Solutions, surface ageing of, 13.
Sorbaldehyde, isomerisation of acetylenic carbinol and glycol from, 176.
Spinach, folic acid from, 255.
Spreading of monolayers, 7.
Spreading pressure of films, 11.
Staphisino, structure of, 228.
Starch, structure of, 73.
Stearic acid, sodium salt, equilibrium of, with water, 64.
Stoaric acid, γ -hydroxy-, lactonisation of, 10.
Sterols, molecular structure of, 12.
Stilbene derivatives, oestrogenic, adsorption of, in monolayers, 15.
Streptobacterium plantarum as test organism for pantothenic acid, 265.
Streptococcus haemolyticus, growth of, effect of pantoyltaurine on, 266.
Streptococcus lactis as test organism for pantothenic acid, 265.
Streptococcus lactis R, folic acid for growth of, 255.
pyridoxine in growth of, 262.
Streptococcus salivarius for aneurin assay, 259.
Strontium azidocuprate, 99.
chloride hexahydrate, crystal structure of, 54.
Styrene, polymerisation of, 192.
by heat without catalysts, 195.
Succinimide, *N*-bromo-, use of, for substitution in olefins, 191.
Sulphaguanidine, goitrogenic action of, 246.
Sulphanilamide, effect of, on cell morphology, 266.
Sulphonamides, goitrogenic action of, 246.
respiratory inhibition by, 269.
Sulphonates, organic, crystal structure of, 57.
Sulphonation, 186.
Sulphur, and its compounds, crystal structure of, 53.
detn. in, of arsenic, 282.
in organic compounds, 287.
Sulphur nitride, crystal structure of, 54.
Sulphuryl chloride, use of, in chlorination and sulphonation, 186.
Surface ageing of solutions, 13.
Surface chemistry, 5.
Surface potential, 5.
Surface pressure, 5.
isoTalatisidine, 226.
Tartaric acid, gallium salt, 107.
Terphenyl, 196.
Tetra-aldan, 145.
1-Tetradecanesulphonic acid, sodium salt, crystal structure of, 57.
2 : 3 : 4 : 5-Tetradehydrobiotin, 218.
Tetrahydroacetophenones from vinyl-acetylene, 184.
Tetrahydroalstonine, 219.
Tetrahydroalstoninic acid, 219.
8-Tetrahydro-2-furyl-*n*-valeric acids, 8-3:4-diamino-, 218.
Tetramminocupric chromate, 96.
Tetraphenylenne, crystal structure of, 58.
Tetraphenylsuccinonitrile, effect of, on styrene polymerisation, 194.
Tetrapyridylphthalocyanine, 183.
Thapsic acid, 177.
Theobromino-*d*-glucoside, 209.
Theophylline glycosides, 210.
Thiophan-3-ones, 2-substituted, synthesis of, 218.
Thiophosphoryl bromide, bromofluorides, and fluoride, 90.
halides, crystal structure of, 51.
Thiouracil, goitrogenic action of, 247.
Thiourea, oxidation of, to iodine, 249.
Thioureas, goitrogenic action of, 246, 247.
Thorium salts, use of, in fluorine detn., 284.
Thyminedeoxyribosidephosphoric acid, 201.
Thymonucleic acid, sodium salt, fibre structure of, 61.
Thymus-nucleic acid, enzymic fission of, 202.
Thyroglobulin, hydrolysis of, to thyroxine, 250.
Thyroid, 240.
collection of iodine by, 241, 249.
hormone of, goitrogenic effect on formation of, 248.
nature of, 249.
hyperplasia of, induced by goitrogens, 246, 247.
dl-Thyronine, 3 : 5-diiodo-, 125.
Thyroxine as thyroid hormone, 250.
formation of, from iodinated casein, 243.
from iodine in thyroidectomy, 242.
in vitro and *in vivo*, 244.
synthesis of, 125.
Tin halides, crystal structure of, 49.
Tobacco mosaic virus, structure of, 80.
Topaz, synthesis of, 97.
Tosylthymidine, 205.
Transamination, 129.
Triethylgallium, 104.
Trimethylchlorosilane, 91.
Trimethylgallium, and its ammoniate, 103.
Trimethylsilane, 91.
Trimethylsilanol, 91.
Triolein, oxidation of, by permanganate, 9.
1 : 3 : 5-Triphenylbenzene, crystal structure of, 58.
Triphenylgallium, 104.
Triphenylmethyl, addition of, to vinyl-acetylene, 103.
reaction of, with benzoyl peroxide, 188.

- Triphenylmethyl bromide and chloride, crystal structure of, 59.
 2 : 3 : 4-Triphenyl-*a*-naphthol, formation of, from diphenylacetylene, 157.
 Tris(trimethylsilyl) phosphate, 92.
 Triterpene acids, structure of, 13.
 N^6 : 2' : 3'-Tritosyladenosine, 205.
 N^6 : 2' : 3'-Tritosyltrityladenosine, 205.
 Trityladenosine, 205.
 Tritylcytidine, 205.
 Tritylguanosine, 205.
 Tritylthymidine, 205.
 Trityluridine, 205.
 Tryptophan, deficiency of, effects of, 237.
 intermediary metabolism of, 237.
 synthesis of, 123.
 Tungsten-blue, 92.
 Tungsten oxides, 92.
 Tyrocidin, analysis of hydrolysates of, 127.
 Tyrosine, synthesis of, 124.
 Tyrosine, 3-iodo-, 125.
 diido-, formation of, from iodine in thyroideectomy, 242.
 oxidation of, 245.
 Unsaturated compounds, reaction of, with diazonium compounds, 183.
 Uracil-3-*L*-arabinoside, 209.
 Uracil-3-*d*-galactoside, 209.
 Uracil-3-*d*-riboside, 209.
 Uracil-3-*d*-xyloside, 209.
 Uranium isotope, separation of, 88.
 Uric acid riboside, 207.
 Uridine, 201.
 structure of, 204.
 Uridylic acid, 201, 202.
 Urine, blue fluorescent substance in, 252.
 detn. in, of arsenic in colloidal suspension, 280.
 intermediary products from tryptophan in, 237, 238.
 Valine, synthesis of, 124.
 Vegetables, frozen, detn. in, of aneurin, 259.
Veratrum, alkaloids of, 227.
 Vinylacetylene, formation and polymerisation of, 151.
 polymerisation of, 162.
 Vinylacetylenes, 151.
 alkylation of, 150.
 reactions of, 161.
 spectra of, absorption, ultra-violet, 161.
 Vinylacetylenic carbinols, reactions of, 178.
 Vinylisopropenylacetylene, condensation of, with phenols, 179.
 Viruses, structure of, 80.
 Vitamin *B* group, assay of, 258.
 Vitamin-*B*₁₀, 257.
 Vitamin-*B*₁₁, 257.
 Vitamin-*B*_c, 257.
 Water, detn. in, of fluorine, 285.
 evaporation of, prevention of, 7, 8.
 reactions at air interfaces with, 8.
 Willhelmy plate, 11.
 Wines, ashing of, for fluorine detn., 283.
 detn. in, of arsenic, 278, 281.
 Wood, detn. in, of fluorine, 283.
 Wool, detn. in, of fluorine, 283.
 α - β -transition in, 77.
 Xanthine, synthesis of, 211.
 Xanthosine, 201.
 spectrum of, absorption, ultra-violet, 203.
 Xanthurenic acid, 238.
 Xanthyllic acid, 201.
 9-*d*-Xylopyranosidoadenine, 211.
 synthesis of, 214.
 9-*d*-Xylopyranosido-2-methyladenine, 211, 213.
 Yeast, crystalline growth factor from, 257.
 Yeast-adenylic acid, 201.
 preparation of, 202.
 Zeolites as absorbents, 31.
 diffusion of solutes into, 42.
 heat of occlusion of, 39.
 isobars, isotherms, and isotherms in, 34.
 kinetics of solutes in, 41.
 molecular sieve properties of, 44.
 occlusion of solutes by, effect of dehydration on, 42.
 saturation of, by gases, 36.
 structure of, 33.
 table of, 32.
 Zinc, analytical chemistry of, 272.
 commercial, analysis of, 277.
 detection of, reagents for, 273.
 detn. of, 272.
 in blood, 275.
 in brass plate, paints, and plant ash, 276.
 in fertilisers, 276.
 in foods, 274.
 in magnesium alloys, 277.
 in soils, 276.
 electrolytic analysis of, 277.
 in glass and reagents, 275.
 separation of, from antimony, arsenic, bismuth, iron, and manganese, 274.
 from cadmium, 272.
 Zinc cyanide, crystal structure of, 54.
 hydroxyhalides, 95.
 Zinc yellow, 96.
 Zin zadze's reagent, 281.
 Zirconyl alizarin-S lake, 283.
