**Review of the doctoral dissertation of Debela Geneti Desisa, MSc**  
**Additional proposal**

Taking into account the high substantive level of the work (advanced methods of computer modeling and simulation used), the modernity of the subject matter, very interesting research results, precisely formulated final conclusions and the exemplary graphic side of the work, possible technical (industry) implementation I consider the reviewed work to be outstanding.

I submit an application for the distinction award of a doctoral dissertation, entitled „**Analysis of Thermal Stresses in Steel Workpiece Heated by Induction**”, author *Mr. Debela Geneti Desisa, M.Sc. Eng.*

professor Slawomir Wiak, DSc, PhD, MEng., *dr h.c.*
