SUBJECT INDEX

INDUSTRIAL AND ENGINEERING CHEMISTRY

VOLUME 22—1930

ABSORPTION, Relation between Mass Transfer(—)and Fluid Friction. A. P. Colburn 967
(*See also kind of absorption.*)
Acetaldehyde, Condensation Reactions of—over Certain Oxide Catalysts at Pressures from 1 to 500 Atmospheres of Hydrogen. High-Pressure Symposium. Homer Adkins, M. E. Kinsey, and Karl Folkers 1046
Acetic Acid, Synthetic, Japan to Produce 62
Acetone. Development of Butyl-Acetonic Fermentation Industry. Fermentation Symposium. C. L. Gabriel and F. M. Crawford 1163
Acetylene, Studies on Production of—from Methane:
I—Cracking under Vacuum. P. K. Frolich, A. White, and H. P. Dayton 20
II—Cracking in Electric Arc. P. K. Frolich, A. White, R. R. Uhrmacher, and L. T. Tufts 23
Acids, Coal-Tar. *See* Phenols.
Acids, Organic, from Xylose 715
(*See also name of acid.*)
Acrolein a Warning Agent in Refrigeration 684
Adhesives and Adhesion. W. B. Lee 778
Agar Industry in California. G. R. Robertson 1074
Agriculture, When—Enters Chemical Industry. W. J. Hale. (Editorial, 1267) 1311
Airship, Metalclad, ZMC-2, Inflation of. A. R. Carr and A. C. Good. 227
Albumin. *See* Egg Albumin.
ALCOHOLS:
Aliphatic. Catalytic Hydration of Olefins. High-Pressure Symposium. Sherlock Swann, Jr., R. D. Snow, and D. B. Keyes ... 1048
Catalysts for Formation of—from Carbon Monoxide and Hydrogen. VI—Investigation of Mechanism of Formation of—Higher than Methanol. High-Pressure Symposium. P. K. Frolich and D. S. Cryder 1051
Denatured, Freezing and Flow Points for Glycerol, Prestone, —, and Methanol. J. C. Olsen, A. S. Brunjes, and J. W. Olsen 1315
Ethyl. Fermentation Symposium. A. A. Backhaus 1151
Industrial, and Prohibition Act. Industry, the Broad Target. Editorial 109
Industrial, and Transfer of Prohibition Bureau to Department of Justice. Industry Brushed Aside. Editorial 569
In Motor Fuels in Germany 1300
Molasses Used for—Production in Argentina 1123
Stimulation of Cane Molasses Fermentation by Certain Metallic Salts. F. M. Hildebrandt and F. F. Boyce 1011
ALKALI:
Caustic. *See* Sodium Hydroxide.
Effect of Soap and Other—on Silk Sericin. Silk-Soaking Process—I. Ralph Hart 980
Recovery from Pulp Liquors. C. L. Wagner 122
ALLOYS:
Magnesium-Manganese. G. W. Pearson 367
Strontium-Tin, Properties of. K. W. Ray 519
Almonds, European and California, Composition of:
C. V. Hart 1128
Gilbert Pitman 1129
Aluminum Chloride. Effect of Refining Agents and Fused Caustic Alkali on Sulfur Compounds in Naphtha Solutions. M. A. Youtz and P. P. Perkins 610
Aluminum in Chemical Industry. H. V. Churchill 993
Aluminum Oxide, Minimum Voltage to Reduce. A. B. Newman and G. G. Brown 995
Aluminum, Oxy-, Blowtorch. R. A. Baker and F. M. Strong 788
AMERICAN CHEMICAL INDUSTRIES:
American Cyanamid Company 301
Brown Company 194
Champion Fiber Company. R. W. Griffith 1138
Fansteel Products Company, Inc 1409
Hooker Electrochemical Company 914
International Nickel Company. A. J. Wadhams 806
Koppers Company 101
Laclede-Christy Clay Products Company 395
Squibb, E. R., & Sons. E. Pickering 682
AMERICAN CHEMICAL SOCIETY:
Atlanta Meeting. Atlanta in April. Editorial 204
Atlanta Meeting. Who Can Be Hosts? Editorial 409
Cincinnati Meeting. Presidential Address. President McPherson's Address. Editorial 1028
Directory. Chemist's Blue Book. Editorial 1029
Endowment Fund Contributions:
Columbus Joins the List. Editorial 3
Sorry Minnesota. Editorial 111
Greetings from New President and President-Elect. Our New Officers. Editorial 1
New Directors. Editorial 1027
Publications, Gift of F. P. Garvan for. A Look Ahead. Editorial 110
AMERICAN CONTEMPORARIES:
Avery, Samuel. F. W. Upson 681
Chatfield, Henry Summers. M. H. Haertel 299
Dennis, Louis Munroe. A. W. Browne 1257
Dunnington, Francis Perry. C. L. Reese 1408
Horne, William D. G. P. Meade 805
McPherson, William. B. T. Brooks 100
Michael, Arthur. W. T. Read 1137
Miner, Harlan Sherman. A. E. Buchanan, Jr. 193
Thompson, Gustave Whyte. F. P. Ingalls 396
Vorce, Lafayette D. W. S. Smith 564
American Cyanamid Company. American Chemical Industries 301
Ammonia, Free, Injury with Concentrated Fertilizers. L. G. Willis and W. H. Rankin 1405
Ammonia, Synthetic. Development of—Industry in United States. J. E. Crane. (Editorial, 691) 795
Ammonia, Synthetic. Pressure-Synthesis Operations of Du Pont Ammonia Corporation 433
Ammonium Carbamate, Resistance of Metals to System Urea—Water. J. G. Thompson, H. J. Krase, and K. G. Clark 735
Ammonium Citrate. Composition of Citrate-Insoluble Residues from Superphosphates and Ammoniated Superphosphates. K. D. Jacob, W. L. Hill, W. H. Ross, and L. F. Rader, Jr. 1385
Ammonium Citrate. Reactions Occurring during Ammoniation of Superphosphate. F. G. Keenen 1378
Ammonium Linoleate. New Commercial Emulsifying Agents. H. Bennett 1255
Ammonium Sulfate, Imperial Chemical Industries Seeks Market for—in New Zealand 12
Amyl Acetate. *See* Esters, Secondary.
Antifreeze. Freezing and Flow Points for Glycerol, Prestone, Denatured Alcohol, and Methanol. J. C .Olsen, A. S. Brunjes, and J. W. Olsen 1315
Antifreeze, Methanol as, Investigation of Safety in Use of:
Industry Recognizes Its Responsibility. Editorial 815
Supplementary Statement. Reid Hunt 915
Antioxygens. *See* Rubber.
Apricots, Large-Scale Experiments in Sulfuring. E. M. Chace, C. G. Church, and D. G. Sorber 1317
Atlanta Meeting. *See* American Chemical Society.
Autoclave, Urea. *See* Urea.
Avery, Samuel. American Contemporaries. F. W. Upson 681
Azeotropic Data, Use of—for Calculating General Properties of Binary Systems. Clyve Allen 60

BACTERIA Process for Recovery of Vegetable Oils and Fats. J. W. Beckman 117
Barium Fluosilicate and Cryolite, Insecticidal Properties of. S. Marcovitch and W. W. Stanley 121
Beer-Slop Waste, Observations on—from Corn-Mash Distillation. W. D. Hatfield 276
Beet House Sirups. *See* Sugar.
Benn Brothers' Jubilee. Editorial 693
Benzene, Absorption of—by Mineral Oil. Tower-Absorption Coefficients—III. C. W. Simmons and J. D. Long 718
Bidding, Business of. Editorial 692
Binary Systems, Use of Azeotropic Data for Calculating General Properties of. Clyve Allen 608
Blacksburg, Va., Initial Operation of Imhoff Tank and Contact Beds at. F. H. Fish 511
Blowtorch, Oxy-Aluminum. R. A. Baker and F. M. Strong 788
Board, Insulating. *See* Insulating Board.
Boiler Reactions at High Temperatures. W. L. Denman and Edward Bartow 36
BOOK REVIEWS. *See end of this section.*
Books, New 200, 393, 564, 1024, 1260
Bosch Magneto Company Case Dismissed. A Change of Mind. Editorial 203
Brass, Deposition of Black Copper Oxide on. H. L. Kellner and H. A. Curtis 1321
Brown Company. American Chemical Industries. G. A. Richter .. 194
Burners, Gas. *See* Fuels, Gaseous.
Business Depression, Technical Men Retained during:
Encouraging Signs. Editorial 692
Technical Men Appreciated. Editorial 1029
Business, Stabilization of. A Great Experiment. Editorial 3
Butadiene, Formation of—by Cracking of Hydrocarbons. P. K. Frolich, R. Simard, and A. White 240, 551
Butyl Acetate. *See* Esters, Secondary.
Butyl Alcohol. Development of Butyl-Acetonic Fermentation Industry. Fermentation Symposium. C. L. Gabriel and F. M. Crawford 1163
Byrd, Admiral, Message to—in Antarctic. Among the Impossibilities. Editorial 205
BOOK REVIEWS:
Adhesion Problems in Connection with Rubber Flooring. International Rubber Association. H. L. Trumbull 810
Aetherischen Öle, edited by Gildemeister and Hoffman. E. K. Nelson 200
Allen's Commercial Organic Analysis. Vol. VIII, by Mitchell. D. B. Jones 1414
l'Alluminio. I metalli leggeri e le loro leghe, by Koelliker and Magnani. A. W. Contieri 687
Aluminum Industry, by Edwards, Frary, and Jeffries. Vol. I—Aluminum and Its Production. Vol. II—Aluminum Products and Their Fabrication. H. N. Holmes 809
American Illustrated Medical Dictionary, by Dorland. H. C. Fuller 563
American Petroleum Refining, by Bell. L. L. Davis 811
Analyse der Azofarbstoffe, by Brunner. Ivan Gubelmann 197
Analyse der Fette und Wachse. Band II—Systematik Analysenergebnisse Bibliographie der natürlichen Fette und Wachse, by Grün and Halden. G. S. Jamieson 305
Analyse der Harze, Balsame und Gummiharze, by Dieterich. A. W. Schorger 687
Annual Reports on Progress of Applied Chemistry, 1929. Vol. XIV. F. P. Veitch 1140
Annual Reports on Progress of Chemistry for 1929. Vol. XXVI. F. P. Veitch. (Correction, 1140) 685

Is Steam Decomposed by? T. H. Byron; R. J. Cowan, 402; C. G. Maier; R. J. Cowan. (Correspondence) ... 916
Metallurgy of, Reactions between Iron Sulfide, Sulfur Dioxide, and Iron Oxides in. A. C. Halferdahl ... 956
Copperas, Chlorinated, Study of Floc Produced by. E. S. Hopkins and E. R. Whitmore ... 79
Copper Oxide, Black, Deposition of—on Brass. H. L. Kellner and H. A. Curtis ... 1321
Copper Sulfate. *See* Salts, Metallic.
Corn-Mash Distillation, Observations on Beer-Slop Waste from. W. D. Hatfield ... 276
Corn Oil. *See* Oil.
CORNSTALKS:
Fermentation Products from. C. S. Boruff with A. M. Buswell ... 931
Maizolith from ... 681
Production of Insulating Board from. C. E. Hartford ... 1280
CORROSION:
Acidity and—in Canned Fruits. E. F. Kohman and N. H. Sanborn. 615
Boiler Reactions at High Temperatures. W. L. Denman and Edward Bartow ... 36
Effect of Physical State of Small Amounts of Copper on—of Lead by Sulfuric Acid. E. G. Mahin and E. J. Wilhelm ... 1397
Galvanic, on Cast-Iron Pipes. R. J. Kuhn ... 335
Initial, Rate of Steels. H. O. Forrest, B. E. Roetheli, and R. H. Brown ... 1197
In Rayon Industry. P. C. Kingsbury ... 130
Particle Size as Factor in—of Lead by Soils. R. M. Burns and D. J. Salley ... 293
Preservation of Highly Polished Surfaces. A. C. Hanson ... 603
Pressure Aging of Duralumin. Leopold Pessel ... 776
Protective Films and. A. C. Hanson ... 554
Sprayed Molten Cadmium Coatings in Gasoline Storage Tanks. Leopold Pessel ... 119
Cotton, Chemical, Manufacture of. W. D. Munson ... 467
Cotton, Classification of—by Means of X-Rays. G. L. Clark ... 474
Cottonseed-Hull Bran, Semi-Commercial Production of Xylose from. W. T. Schreiber, N. V. Geib, B. Wingfield, and S. F. Acree ... 497
CRACKING:
Distillate Yields in. S. A. Kiss ... 10
Effect of Time and Temperature on—of Oils. J. C. Geniesse and Raymond Reuter ... 1274
Formation of Butadiene by—of Hydrocarbons. P. K. Frolich, R. Simard, and A. White ... 240, 551
Hydrocarbon Gas as Power in United States. Gustav Egloff ... 790
Of High-Boiling Coal-Tar Acids. C. E. Senseman ... 81
Of Hydrocarbons at Temperatures Higher than Critical Temperatures. R. H. McKee and Antoni Szayna. (Sokal, 1260) ... 953
Process in Gas-Making Industry. Gustav Egloff and J. C. Morrell. 1080
Studies on Production of Acetylene from Methane:
I—Cracking under Vacuum. P. K. Frolich, A. White, and H. P. Dayton ... 20
II—Cracking in Electric Arc. P. K. Frolich, A. White, R. R. Uhrmacher, and L. T. Tufts ... 23
Value of Straight-Run and Cycle Gas Oil. H. Sydnor and A. C. Patterson ... 1237
Cream of Tartar, Removal of—from Grape Juice by Freezing Storage. M. A. Joslyn and D. A. Tucker ... 614
Cryolite. *See* Sodium Fluoaluminate.
Cuprous Ammonium Salts, Absorption of Carbon Monoxide by. William Gump and Ilse Ernst ... 382

DAIRY CHEMISTRY SYMPOSIUM:
Application of Physical Chemistry to Ice Cream. Alan Leighton. 48
Evaporated and Condensed Milk from Chemical and Nutritional Point of View. F. E. Rice ... 45
Lipase in Raw, Heated, and Desiccated Milk. J. H. Nair ... 42
Manufacture of Casein and Lactose from Skim Milk. F. P. Nabenhauer ... 54
Some Methods of Preparing Quickly Soluble Lactose. R. W. Bell. 51
Some Recent Advances in Chemistry of Milk. L. S. Palmer ... 39
Debates for Technical Students. Editorial ... 204
Dennis, Louis M. American Contemporaries. A. W. Browne ... 1257
Derris Root and Chaulmoogra Being Cultivated in Malay ... 887
Detonation, Progress toward Uniform Method of Measuring. T. A. Boyd, Chairman ... 1301
Dextrose, Sucrose, and Levulose, Relative Merits of—as Used in Preservation of Eggs by Freezing. O. M. Urbain and J. N. Miller. 355
Dichloroethyl Ether. *See* Ether.
Diffusion, Studies in. I—Estimation of Diffusivities in Gaseous Systems. J. H. Arnold ... 1091
Dimethyl Sulfate, Methylation of Phenol by. H. F. Lewis, Sherman Shaffer, Wesley Trieschmann, and Howard Cogan. (E. Y. Wolford; H. F. Lewis, 397) ... 34
DIPHENYLS:
Chlorinated, Physical Characteristics and Commercial Possibilities of. C. H. Penning ... 1180
Distillation of. Pilot-Plant Fractionating Column. Rogers McCullough and L. D. Gittings ... 584

the spot market and often your contract customers won't give you shipping instructions for it

This may or may not be waste but it's pretty near a dead loss

Cracked gasoline today is the best gasoline — especially if it is Dubbs cracked gasoline Dubbs cracking can make this best gasoline from that stored fuel oil

You can sell your pressure distillate bottoms for furnace oil, or recrack it and get still more gasoline You can make salable coke or specification fuel oil and, of course, you can also crack any other kind of oil you want to

Dubbs cracking process is *always* the answer

ON KETTLES FOR EVAPORATING BENZOL

BAKELITE VARNISH PROVED MOST SATISFACTORY

Steam jacketed, closed agitated 900 gallon kettles with glass linings, are used by the Thiophene Co. for evaporating benzol as a solvent from corrosive organic sulpho acids. A metal coating on the kettles was tried, but proved unsatisfactory because the unequal contraction and expansion of steel and the metal coating caused the latter to crack and peel. The kettles were then coated with Bakelite Varnish, and baked three times. This treatment proved to be entirely satisfactory. The same material was also successfully used for sealing cracks in the glass lining. Bakelite Varnish forms a tough and durable coating, that is non-hygroscopic, and resistant to oils and most acids. It is being used for a wide variety of purposes in the process industries. Write for copy of Booklet 8V, "Bakelite Varnish".

Bakelite Engineering Service—We manufacture a wide variety of Bakelite resinoid molding materials, varnishes, lacquers, enamels, cements, and other products. Twenty years experience in the development of these materials for chemical and other uses, provides a valuable background for the cooperation offered by our engineers and laboratories.

THE MATERIAL OF A THOUSAND USES

THEY MEET THE TEST . . .

YOU will find Dow Industrial Chemicals being used in the most exacting manufacturing processes in almost every line of industry. No matter how rigid the specifications, their uniform purity assures maximum efficiency.

All Dow Chemicals are manufactured in large volume under improved processes that permit of no variation in their extremely high quality. Use them in your processes. They will meet every test for effectiveness—and more.

Dow is a reliable source of supply. Let us quote on your requirements.

THE DOW CHEMICAL COMPANY, MIDLAND, MICHIGAN

DOW INDUSTRIAL CHEMICALS INCLUDE

Aniline Oil • Calcium Chloride, Flake 77-80%, Solid 73-75% Carbon Bisulphide 99.9% • Carbon Tetrachloride 99.9% • Caustic Soda, Flake and Solid • Chloroform • Epsom Salt Technical Ethyl Bromide • Ethyl Chloride Ferric Chloride • Ferrous Chloride • Magnesium Chloride Monochlorbenzene • Monochloracetic Acid • Phenol • Sodium Sulphide • Sulphur Chloride

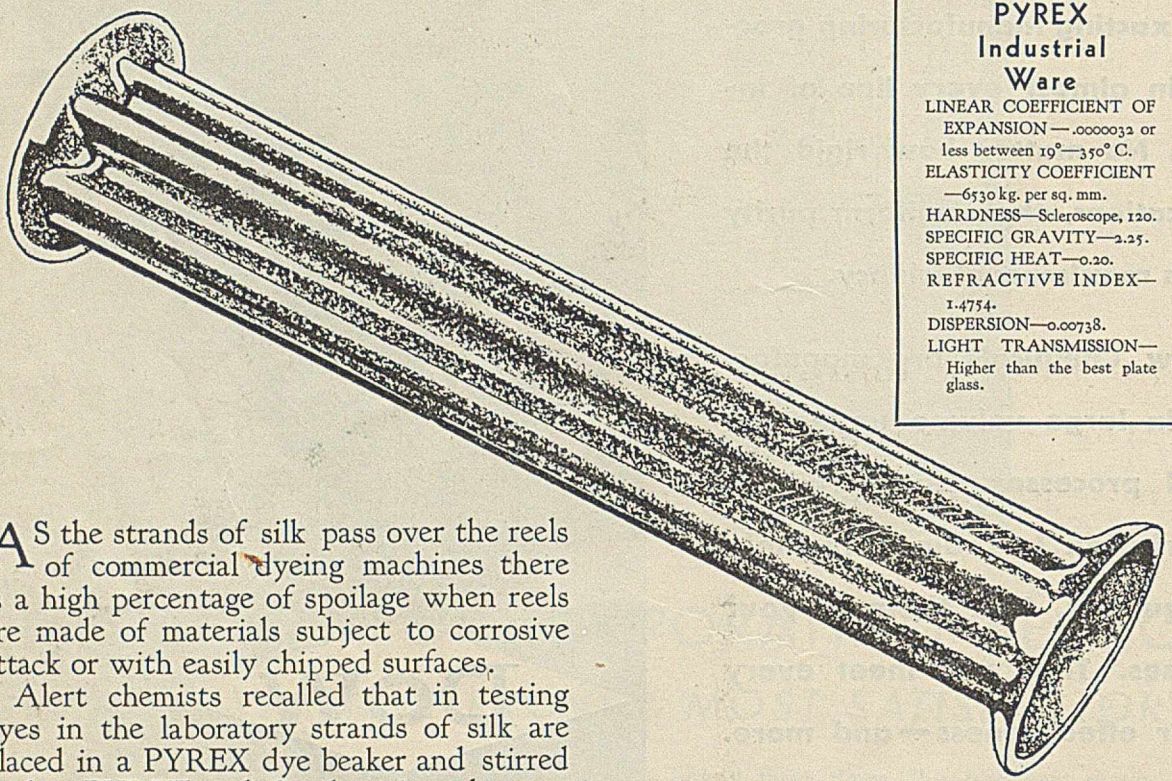
Duplicating This Laboratory Process in Production Saved Commercial Dyers Thousands of Dollars

Physical Characteristics of PYREX Industrial Ware

LINEAR COEFFICIENT OF EXPANSION — .0000032 or less between 19°—350° C.
ELASTICITY COEFFICIENT —6530 kg. per sq. mm.
HARDNESS—Scleroscope, 120.
SPECIFIC GRAVITY—2.25.
SPECIFIC HEAT—0.20.
REFRACTIVE INDEX—1.4754.
DISPERSION—0.00738.
LIGHT TRANSMISSION—Higher than the best plate glass.



AS the strands of silk pass over the reels of commercial dyeing machines there is a high percentage of spoilage when reels are made of materials subject to corrosive attack or with easily chipped surfaces.

Alert chemists recalled that in testing dyes in the laboratory strands of silk are placed in a PYREX dye beaker and stirred with a PYREX rod. Spoilage is unknown, for the silk touches only the chemically stable and hard surface of PYREX Ware.

To Corning Glass Works was presented the problem of developing a commercial equivalent of this laboratory process—and the PYREX silk reel was the answer. The silk is suspended in the dye on a series of PYREX reels. Contact with corrosive materials is eliminated and heavy spoilage losses saved.

If you have a contamination problem in your production, look over the characteristics of PYREX Industrial Ware. They may permit the introduction of laboratory control into your production equipment and remove the source of your trouble. Corning Glass Works engineers will gladly discuss the possibility with you, without charge or obligation.

A cheaper more efficient source of HYDROGEN

A new source of hydrogen has been discovered!

By developing a simple, economical and automatic anhydrous ammonia dissociator or "cracker"* the Du Pont Ammonia Corporation has reduced the cost of hydrogen and nitrogen to users of these gases. In this apparatus ammonia gas is dissociated or cracked into its component elements when passed over an electrically heated catalyst.*

The resulting gas contains 75 per cent hydrogen and 25 per cent nitrogen by volume. This affords a convenient and economical source of hydrogen since *one* cylinder containing 100 lbs. of ammonia will yield 4500 cu. ft. of gas containing 3400 cu. ft. of hydrogen, equivalent to the volume of hydrogen contained in *seventeen* cylinders. At present prices of cylinder ammonia, the cost of hydrogen from cracked ammonia is about half that of hydrogen in cylinders. Furthermore, there is a large saving in cylinder handling costs.

Greater proportionate economies (one cylinder of anhydrous ammonia equivalent to thirty-nine cylinders of nitrogen) can be effected if the product desired is

NITROGEN!

A POSSIBLE 50% SAVING IN YOUR HYDROGEN COSTS. ASK US FOR DETAILS

* Patents Pending
